Chapter 16. Certain Conditions Originating in the Perinatal Period (P00–P96)

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

For coding and reporting purposes the perinatal period is defined as before birth through the 28th day following birth. The following guidelines are provided for reporting purposes

a. General perinatal rules

1) Use of Chapter 16 codes

Codes in this chapter are never for use on the maternal record. Codes from Chapter 15, the obstetric chapter, are never permitted on the newborn record. Chapter 16 codes may be used throughout the life of the patient if the condition is still present.

2) Principal diagnosis for birth record

When coding the birth episode in a newborn record, assign a code from category Z38, Liveborn infants according to place of birth and type of delivery, as the principal diagnosis. A code from category Z38 is assigned only once, to a newborn at the time of birth. If a newborn is transferred to another institution, a code from category Z38 should not be used at the receiving hospital.

A code from category Z38 is used only on the newborn record, not on the mother's record.

Newborn delivered via vaginal delivery in Rural Hospital A, experienced meconium aspiration resulting in pneumonia. Rural Hospital A is not equipped to handle the extensive respiratory therapy this baby needs and transfers the patient to Metropolis Hospital B, where the pneumonia resolves and the newborn is eventually discharged.

Rural Hospital A

Z38.00 Single liveborn infant, delivered vaginally

P24.01 Meconium aspiration with respiratory symptoms

Metropolis Hospital B

P24.01 Meconium aspiration with respiratory symptoms

Explanation: A code from category Z38 is a one-time use only code. The hospital that actually delivered the newborn, in this case Rural Hospital A, can append a code from category Z38 but for the delivery admission only. Once the patient is transferred or discharged, the Z38 category no longer applies for that patient.

The reason for the transfer to Metropolis Hospital B was for the respiratory symptoms (pneumonia) the newborn was exhibiting secondary to aspirating meconium.

3) Use of codes from other chapters with codes from Chapter 16

Codes from other chapters may be used with codes from chapter 16 if the codes from the other chapters provide more specific detail. Codes for signs and symptoms may be assigned when a definitive diagnosis has not been established. If the reason for the encounter is a perinatal condition, the code from chapter 16 should be sequenced first.

4) Use of Chapter 16 codes after the perinatal period

Should a condition originate in the perinatal period, and continue throughout the life of the patient, the perinatal code should continue to be used regardless of the patient's age.

A 7-year-old patient with history of birth injury that resulted in Erb's palsy is seen for subscapularis release

P14.0 Erb's paralysis due to birth injury

Explanation: Although in this instance Erb's palsy is specifically related to a birth injury, it has not resolved and continues to be a health concern. A perinatal code is appropriate even though this patient is beyond the perinatal period.

5) Birth process or community acquired conditions

If a newborn has a condition that may be either due to the birth process or community acquired and the documentation does not indicate which it is, the default is due to the birth process and the code from Chapter 16 should be used. If the condition is community-acquired, a code from Chapter 16 should not be assigned.

For COVID-19 infection in a newborn, see guideline I.C.16.h.

6) Code all clinically significant conditions

All clinically significant conditions noted on routine newborn examination should be coded. A condition is clinically significant if it requires:

clinical evaluation; or
therapeutic treatment; or
diagnostic procedures; or
extended length of hospital stay; or
increased nursing care and/or monitoring; or
has implications for future health care needs

Note: The perinatal guidelines listed above are the same as the general coding guidelines for "additional diagnoses," except for the final point regarding implications for future health care needs. Codes should be assigned for conditions that have been specified by the provider as having implications for future health care needs.

b. Observation and evaluation of newborns for suspected conditions not found

1) Use of Z05 codes

Assign a code from category Z05, Observation and evaluation of newborns and infants for suspected conditions ruled out, to identify those instances when a healthy newborn is evaluated for a suspected condition that is determined after study not to be present. Do not use a code from category Z05 when the patient has identified signs or symptoms of a suspected problem; in such cases code the sign or symptom.

2) Z05 on Other than the birth record

A code from category Z05 may also be assigned as a principal or first-listed code for readmissions or encounters when the code from category Z38 code no longer applies. Codes from category Z05 are for use only for healthy newborns and infants for which no condition after study is found to be present.

3) Z05 on a birth record

A code from category Z05 is to be used as a secondary code after the code from category Z38, Liveborn infants according to place of birth and type of delivery.

Newborn delivered via vaginal delivery; previous ultrasounds showed what appeared to be an abnormality of the right kidney. Kidney function tests were performed and ultrasounds taken and any genitourinary conditions ruled out.

Z38.00 Single liveborn infant, delivered vaginally

Z05.6 Observation and evaluation of newborn for suspected genitourinary condition ruled out

Explanation: The newborn had no signs or symptoms of kidney or other genitourinary condition but was evaluated after delivery due to the abnormal prenatal ultrasound findings. A Z code describing the type and place of birth should be coded first, followed by a Z05 category code for the work performed to rule out a suspected genitourinary condition.

c. Coding additional perinatal diagnoses

1) Assigning codes for conditions that require treatment

Assign codes for conditions that require treatment or further investigation, prolong the length of stay, or require resource utilization.

2) Codes for conditions specified as having implications for future health care needs

Assign codes for conditions that have been specified by the provider as having implications for future health care needs.

Note: This guideline should not be used for adult patients.

An abnormal noise was heard in the left hip of a post-term newborn during a physical examination. The pediatrician would like to follow the patient after discharge as a hip click can be an early sign of hip dysplasia. The newborn was delivered via cesarean at 41 weeks.

Z38.01 **Single liveborn infant, delivered by cesarean**

P08.21 **Post-term newborn**

R29.4 **Clicking hip**

Explanation: The abnormal hip noise or click is appended as a secondary diagnosis not only because it is an abnormal finding upon examination, but also due to its potential to be part of a bigger health issue. The hip dysplasia has not yet been diagnosed and does not warrant a code at this time.

d. Prematurity and fetal growth retardation

Providers utilize different criteria in determining prematurity. A code for prematurity should not be assigned unless it is documented. Assignment of codes in categories P05, Disorders of newborn related to slow fetal growth and fetal malnutrition, and P07, Disorders of newborn related to short gestation and low birth weight, not elsewhere classified, should be based on the recorded birth weight and estimated gestational age.

When both birth weight and gestational age are available, two codes from category P07 should be assigned, with the code for birth weight sequenced before the code for gestational age.

e. Low birth weight and immaturity status

Codes from category P07, Disorders of newborn related to short gestation and low birth weight, not elsewhere classified, are for use for a child or adult who was premature or had a low birth weight as a newborn and this is affecting the patient's current health status.

See Section I.C.21. Factors influencing health status and contact with health services, Status.

A 35-year-old patient, who weighed 659 grams at birth, is seen for heart disease documented as being a consequence of the low birth weight

I51.9 **Heart disease, unspecified**

P07.02 **Extremely low birth weight newborn, 500–749 grams**

Explanation: A code from subcategories P07.0- and P07.1- is appropriate, regardless of the age of the patient, as long as the documentation provides a clear link between the patient's current illness and the low birth weight.

f. Bacterial sepsis of newborn

Category P36, Bacterial sepsis of newborn, includes congenital sepsis. If a perinate is documented as having sepsis without documentation of congenital or community acquired, the default is congenital and a code from category P36 should be assigned. If the P36 code includes the causal organism, an additional code from category B95, Streptococcus, Staphylococcus, and Enterococcus as the cause of diseases classified elsewhere, or B96, Other bacterial agents as the cause of diseases classified elsewhere, should not be assigned. If the P36 code does not include the causal organism, assign an additional code from category B96. If applicable, use additional codes to identify severe sepsis (R65.2-) and any associated acute organ dysfunction.

A full-term infant develops severe sepsis 24 hours after discharge from the hospital and is readmitted; cultures identified *E. coli* as the infective agent

P36.4 **Sepsis of newborn due to *Escherichia coli***

R65.20 **Severe sepsis without septic shock**

Explanation: Even though this newborn was discharged and could have acquired *E. coli* from his/her external environment, due to the lack of documentation specifying specifically how this pathogen was acquired, the default is to code the *E. coli* sepsis as congenital. A code from chapter 1, "Certain Infectious and Parasitic Diseases," is not required because the perinatal sepsis code identifies both the sepsis and the bacteria causing the sepsis.

g. Stillbirth

Code P95, Stillbirth, is only for use in institutions that maintain separate records for stillbirths. No other code should be used with P95. Code P95 should not be used on the mother's record.

h. COVID-19 Infection in Newborn

For a newborn that tests positive for COVID-19, assign code U07.1, COVID-19, and the appropriate codes for associated manifestation(s) in neonates/newborns in the absence of documentation indicating a specific type of transmission. For a newborn that tests positive for COVID-19 and the provider documents the condition was contracted in utero or during the birth process, assign codes P35.8, Other congenital viral diseases, and U07.1, COVID-19. When coding the birth episode in a newborn record, the appropriate code from category Z38, Liveborn infants according to place of birth and type of delivery, should be assigned as the principal diagnosis.

Chapter 16. Certain Conditions Originating in the Perinatal Period (P00–P96)

- NOTE** Codes from this chapter are for use on newborn records only, never on maternal records
- INCLUDES** conditions that have their origin in the fetal or perinatal period (before birth through the first 28 days after birth) even if morbidity occurs later
- EXCLUDES2** congenital malformations, deformations and chromosomal abnormalities (Q00–Q99)
endocrine, nutritional and metabolic diseases (E00–E88)
injury, poisoning and certain other consequences of external causes (S00–T88)
neoplasms (C00–D49)
tetanus neonatorum (A33)

This chapter contains the following blocks:

- P00–P04 Newborn affected by maternal factors and by complications of pregnancy, labor, and delivery
- P05–P08 Disorders of newborn related to length of gestation and fetal growth
- P09 Abnormal findings on neonatal screening
- P10–P15 Birth trauma
- P19–P29 Respiratory and cardiovascular disorders specific to the perinatal period
- P35–P39 Infections specific to the perinatal period
- P50–P61 Hemorrhagic and hematological disorders of newborn
- P70–P74 Transitory endocrine and metabolic disorders specific to newborn
- P76–P78 Digestive system disorders of newborn
- P80–P83 Conditions involving the integument and temperature regulation of newborn
- P84 Other problems with newborn
- P90–P96 Other disorders originating in the perinatal period

Newborn affected by maternal factors and by complications of pregnancy, labor, and delivery (P00–P04)

- NOTE** These codes are for use when the listed maternal conditions are specified as the cause of confirmed morbidity or potential morbidity which have their origin in the perinatal period (before birth through the first 28 days after birth).

AHA: 2016,4Q,54–55

Newborn affected by maternal conditions classifiable to O9A.2–

P00.6 Newborn affected by surgical procedure on mother

- Newborn affected by amniocentesis
EXCLUDES1 Cesarean delivery for present delivery (P03.4)
damage to placenta from amniocentesis, Cesarean delivery or surgical induction (P02.1)
previous surgery to uterus or pelvic organs (P03.89)
EXCLUDES2 newborn affected by complication of (fetal) intrauterine procedure (P96.5)

P00.7 Newborn affected by other medical procedures on mother, not elsewhere classified

- Newborn affected by radiation to mother
EXCLUDES1 damage to placenta from amniocentesis, cesarean delivery or surgical induction (P02.1)
newborn affected by other complications of labor and delivery (P03.-)

✓5N P00.8 Newborn affected by other maternal conditions

P00.81 Newborn affected by periodontal disease in mother

P00.89 Newborn affected by other maternal conditions

- Newborn affected by conditions classifiable to T80–T88
Newborn affected by maternal genital tract or other localized infections
Newborn affected by maternal systemic lupus erythematosus
▶ Use additional code to identify infectious agent, if known ◀
AHA: 2019,2Q,9

P00.9 Newborn affected by unspecified maternal condition

✓4N P01 Newborn affected by maternal complications of pregnancy

- Code first any current condition in newborn
EXCLUDES2 encounter for observation of newborn for suspected diseases and conditions ruled out (Z05.-)

P01.0 Newborn affected by incompetent cervix

P01.1 Newborn affected by premature rupture of membranes

P01.2 Newborn affected by oligohydramnios

- EXCLUDES1** oligohydramnios due to premature rupture of membranes (P01.1)

DEF: Oligohydramnios: Low amniotic fluid level, resulting in underdeveloped organs in the fetus.

P01.3 Newborn affected by polyhydramnios

- Newborn affected by hydramnios
DEF: Polyhydramnios: Excess amniotic fluid surrounding the fetus, typically defined as a total fluid volume of greater than 24.0 cc.

P01.4 Newborn affected by ectopic pregnancy

- Newborn affected by abdominal pregnancy

P01.5 Newborn affected by multiple pregnancy

- Newborn affected by triplet (pregnancy)
Newborn affected by twin (pregnancy)

P01.6 Newborn affected by maternal death

P01.7 Newborn affected by malpresentation before labor

- Newborn affected by breech presentation before labor
Newborn affected by external version before labor
Newborn affected by face presentation before labor
Newborn affected by transverse lie before labor
Newborn affected by unstable lie before labor

P01.8 Newborn affected by other maternal complications of pregnancy

P01.9 Newborn affected by maternal complication of pregnancy, unspecified

✓4N P02 Newborn affected by complications of placenta, cord and membranes

- Code first any current condition in newborn
EXCLUDES2 encounter for observation of newborn for suspected diseases and conditions ruled out (Z05.-)

P02.0 Newborn affected by placenta previa

- DEF: Placenta developed in the lower segment of the uterus that can cause hemorrhaging leading to preterm delivery.

P02.1 Newborn affected by other forms of placental separation and hemorrhage

- Newborn affected by abruptio placenta
Newborn affected by accidental hemorrhage
Newborn affected by antepartum hemorrhage
Newborn affected by damage to placenta from amniocentesis, cesarean delivery or surgical induction
Newborn affected by maternal blood loss
Newborn affected by premature separation of placenta

- ✓SN** P02.2 Newborn affected by other and unspecified morphological and functional abnormalities of placenta
- P02.20 Newborn affected by unspecified morphological and functional abnormalities of placenta
- P02.29 Newborn affected by other morphological and functional abnormalities of placenta
Newborn affected by placental dysfunction
Newborn affected by placental infarction
Newborn affected by placental insufficiency
- P02.3 Newborn affected by placental transfusion syndromes
Newborn affected by placental and cord abnormalities resulting in twin-to-twin or other transplacental transfusion
- P02.4 Newborn affected by prolapsed cord
- P02.5 Newborn affected by other compression of umbilical cord
Newborn affected by umbilical cord (tightly) around neck
Newborn affected by entanglement of umbilical cord
Newborn affected by knot in umbilical cord

✓^{4th} P12 Birth injury to scalp

Birth Injuries to Scalp

P12.0 Cephalhematoma due to birth injury

DEF: Condition that occurs in a neonate when blood vessels between the skull and periosteum rupture and blood collects in the subperiosteal space (below the periosteum). It is typically caused by prolonged labor or trauma due to instrument-assisted delivery (e.g., forceps, vacuum extraction), although in rare circumstances, it may indicate a linear skull fracture with intracranial hemorrhage.

P12.1 Chignon (from vacuum extraction) due to birth injury

DEF: Artificial swelling of the scalp that occurs when a collection of interstitial fluid and blood forms in the area of the scalp where the suction cup was applied during a vacuum-assisted delivery.

P12.2 Epicranial subaponeurotic hemorrhage due to birth injury

Subgaleal hemorrhage

P12.3 Bruising of scalp due to birth injury

P12.4 Injury of scalp of newborn due to monitoring equipment

Sampling incision of scalp of newborn
Scalp clip (electrode) injury of newborn

✓^{5th} P12.8 Other birth injuries to scalp

P12.81 Caput succedaneum

DEF: Swelling of the scalp as a result of pressure being exerted on the head from the vaginal walls, uterus, or instrumentation used in assisting a delivery (e.g., vacuum).

P12.89 Other birth injuries to scalp

P12.9 Birth injury to scalp, unspecified

✓^{4th} P13 Birth injury to skeleton

~~EXCLUDES~~ birth injury to spine (P11.5)

✓^{4th} P22 Respiratory distress of newborn

AHA: 2019.2Q.29

P22.0 Respiratory distress syndrome of newborn

Cardiorespiratory distress syndrome of newborn

Hyaline membrane disease

Idiopathic respiratory distress syndrome [IRDS or RDS] of newborn

Pulmonary hypoperfusion syndrome

Respiratory distress syndrome, type I

~~EXCLUDES~~ respiratory arrest of newborn (P28.81)

respiratory failure of newborn NOS (P28.5)

AHA: 2019.2Q.29

DEF: Severe chest contractions upon air intake and expiratory grunting. The infant appears blue due to oxygen deficiency and has a rapid respiratory rate, formerly called hyaline membrane disease.

P22.1 Transient tachypnea of newborn

Idiopathic tachypnea of newborn

Respiratory distress syndrome, type II

Wet lung syndrome

DEF: Rapid, labored breathing of a newborn. It is a short-term problem that begins after birth and lasts about three days.

P22.8 Other respiratory distress of newborn

~~EXCLUDES~~ respiratory arrest of newborn (P28.81)

respiratory failure of newborn NOS (P28.5)

Chapter 17. Congenital Malformations, Deformations and Chromosomal Abnormalities (Q00–Q99)

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

Assign an appropriate code(s) from categories Q00–Q99, Congenital malformations, deformations, and chromosomal abnormalities when a malformation/deformation or chromosomal abnormality is documented. A malformation/deformation/or chromosomal abnormality may be the principal/first-listed diagnosis on a record or a secondary diagnosis.

When a malformation/deformation/or chromosomal abnormality does not have a unique code assignment, assign additional code(s) for any manifestations that may be present.

When the code assignment specifically identifies the malformation/deformation/or chromosomal abnormality, manifestations that are an inherent component of the anomaly should not be coded separately. Additional codes should be assigned for manifestations that are not an inherent component.

8-day-old infant with tetralogy of Fallot and pulmonary stenosis

Q21.3 Tetralogy of Fallot

Explanation: Pulmonary stenosis is inherent in the disease process of tetralogy of Fallot. When the code assignment specifically identifies the malformation/deformation/or chromosomal abnormality, manifestations that are inherent components of the anomaly should not be coded separately.

7-month-old infant with Down syndrome and common atrioventricular canal

Q90.9 Down syndrome, unspecified

Q21.2 Atrioventricular septal defect

Explanation: While a common atrioventricular canal is often associated with patients with Down syndrome, this manifestation is not an inherent component and may be reported separately. When the code assignment specifically identifies the anomaly, manifestations that are inherent components of the condition should not be coded separately. Additional codes should be assigned for manifestations that are not inherent components.

Codes from Chapter 17 may be used throughout the life of the patient. If a congenital malformation or deformity has been corrected, a personal history code should be used to identify the history of the malformation or deformity. Although present at birth, a malformation/deformation/or chromosomal abnormality may not be identified until later in life. Whenever the condition is diagnosed by the provider, it is appropriate to assign a code from codes Q00–Q99. For the birth admission, the appropriate code from category Z38, Liveborn infants, according to place of birth and type of delivery, should be sequenced as the principal diagnosis, followed by any congenital anomaly codes, Q00–Q99.

Three-year-old with history of corrected ventricular septal defect

Z87.74 Personal history of (corrected) congenital malformations of heart and circulatory system

Explanation: If a congenital malformation or deformity has been corrected, a personal history code should be used to identify the history of the malformation or deformity.

Forty-year-old man with headaches diagnosed with congenital arteriovenous malformation of cerebral vessels by brain scan

Q28.2 Arteriovenous malformation of cerebral vessels

Explanation: Although present at birth, malformations may not be identified until later in life. Whenever a congenital condition is diagnosed by the physician, it is appropriate to assign a code from the range Q00–Q99.

Newborn with anencephaly delivered vaginally in hospital

Z38.00 Single liveborn infant, delivered vaginally

Q00.0 Anencephaly

Explanation: For the birth admission, the appropriate code from category Z38 Liveborn infants, according to place of birth and type of delivery, should be sequenced as the principal diagnosis, followed by any congenital anomaly codes, Q00–Q99.

Chapter 17. Congenital Malformations, Deformations and Chromosomal Abnormalities (Q00-Q99)

NOTE Codes from this chapter are not for use on maternal records

EXCLUDES 1 inborn errors of metabolism (E70-E88)

This chapter contains the following blocks:

- Q00-Q07 Congenital malformations of the nervous system
- Q10-Q18 Congenital malformations of eye, ear, face and neck
- Q20-Q28 Congenital malformations of the circulatory system
- Q30-Q34 Congenital malformations of the respiratory system
- Q35-Q37 Cleft lip and cleft palate
- Q38-Q45 Other congenital malformations of the digestive system
- Q50-Q56 Congenital malformations of genital organs
- Q60-Q64 Congenital malformations of the urinary system
- Q65-Q79 Congenital malformations and deformations of the musculoskeletal system
- Q80-Q89 Other congenital malformations
- Q90-Q99 Chromosomal abnormalities, not elsewhere classified

Congenital malformations of the nervous system (Q00-Q07)

✓4M Q00 Anencephaly and similar malformations

Q00.0 Anencephaly

- Acephaly
- Acrania
- Amyelencephaly
- Hemianencephaly
- Hemicephaly

Q00.1 Craniorachischisis

Q00.2 Iniencephaly

✓4M Q01 Encephalocele

- INCLUDES**
- Arnold-Chiari syndrome, type III
 - encephalocystocele
 - encephalomyelocele
 - hydroencephalocele
 - hydromeningocele, cranial
 - meningocele, cerebral
 - meningoencephalocele

EXCLUDES 1 Meckel-Gruber syndrome (Q61.9)

DEF: Congenital protrusion of brain tissue through a defect in the skull.

Q01.0 Frontal encephalocele

Q01.1 Nasofrontal encephalocele

Q01.2 Occipital encephalocele

Q01.8 Encephalocele of other sites

Q01.9 Encephalocele, unspecified

Q02 Microcephaly

- INCLUDES**
- hydromicrocephaly
 - micrencephalon

Code first, if applicable, congenital Zika virus disease

EXCLUDES 1 Meckel-Gruber syndrome (Q61.9)

AHA: 2018.4Q.26

DEF: Congenital disorder in which the head circumference is more than two standard deviations below the mean for age, sex, race, and gestation and associated with a decreased life expectancy.

✓4M Q03 Congenital hydrocephalus

INCLUDES hydrocephalus in newborn

- EXCLUDES 1**
- Arnold-Chiari syndrome, type II (Q07.0-)
 - acquired hydrocephalus (G91.-)
 - hydrocephalus due to congenital toxoplasmosis (P37.1)
 - hydrocephalus with spina bifida (Q05.0-Q05.4)

DEF: Hydrocephalus: Abnormal buildup of cerebrospinal fluid in the brain causing dilation of the ventricles.

Congenital Hydrocephalus

Q03.0 Malformations of aqueduct of Sylvius

- Anomaly of aqueduct of Sylvius
- Obstruction of aqueduct of Sylvius, congenital
- Stenosis of aqueduct of Sylvius

Q03.1 Atresia of foramina of Magendie and Luschka

- Dandy-Walker syndrome

Q03.8 Other congenital hydrocephalus

Q03.9 Congenital hydrocephalus, unspecified

✓4M Q04 Other congenital malformations of brain

- EXCLUDES 1**
- cyclopia (Q87.0)
 - macrocephaly (Q75.3)

Q04.0 Congenital malformations of corpus callosum

- Agenesis of corpus callosum

Q04.1 Arhinencephaly

Q04.2 Holoprosencephaly

Q04.3 Other reduction deformities of brain

- Absence of part of brain
- Agenesis of part of brain
- Agyria
- Aplasia of part of brain
- Hydranencephaly
- Hypoplasia of part of brain
- Lissencephaly
- Microgyria
- Pachygyria

EXCLUDES 1 congenital malformations of corpus callosum (Q04.0)

Q04.4 Septo-optic dysplasia of brain

Q04.5 Megalencephaly

Q04.6 Congenital cerebral cysts

- Porencephaly
- Schizencephaly

EXCLUDES 1 acquired porencephalic cyst (G93.0)

Q04.8 Other specified congenital malformations of brain

- Arnold-Chiari syndrome, type IV
- Macrogyria

Q04.9 Congenital malformation of brain, unspecified

- Congenital anomaly NOS of brain
- Congenital deformity NOS of brain
- Congenital disease or lesion NOS of brain
- Multiple anomalies NOS of brain, congenital

✓ 4th Q05 Spina bifida

INCLUDES hydromeningocele (spinal)
meningocele (spinal)
meningomyelocele
myelocele
myelomeningocele
rachischisis
spina bifida (aperta)(cystica)
syringomyelocele

Use additional code for any associated paraplegia (paraparesis) (G82.2)

EXCLUDES 1 Arnold-Chiari syndrome, type II (Q07.0-)
spina bifida occulta (Q76.0)

DEF: Lack of closure in the vertebral column with protrusion of the spinal cord through the defect, often in the lumbosacral area. This condition can be recognized by the presence of alpha-fetoproteins in the amniotic fluid.

Spina Bifida

- Q05.0 **Cervical spina bifida with hydrocephalus** CC MCC
Q05.1 **Thoracic spina bifida with hydrocephalus** CC MCC
Dorsal spina bifida with hydrocephalus

✓ 4th Q06 **Other congenital malformations of spinal cord**
Q06.0 **Amyelia** MCC
Q06.1 **Hypoplasia and dysplasia of spinal cord** MCC
Atelomyelia
Myelatelasia
Myelodysplasia of spinal cord
Q06.2 **Diastematomyelia** MCC
DEF: Rare congenital anomaly often associated with spina bifida. The spinal cord is separated into longitudinal halves by a bony, cartilaginous or fibrous septum, each half surrounded by a dural sac.
Q06.3 **Other congenital cauda equina malformations** MCC
Q06.4 **Hydromyelia** MCC
Hydrorachis
Q06.8 **Other specified congenital malformations of spinal cord** MCC
Q06.9 **Congenital malformation of spinal cord, unspecified** MCC
Congenital anomaly NOS of spinal cord
Congenital deformity NOS of spinal cord
Congenital disease or lesion NOS of spinal cord

✓ 4th Q07 Other congenital malformations of nervous system

EXCLUDES 2 congenital central alveolar hypoventilation syndrome (G47.35)
familial dysautonomia [Riley-Day] (G90.1)
neurofibromatosis (nonmalignant) (Q85.0-)

✓ 5th Q07.0 Arnold-Chiari syndrome

Arnold-Chiari syndrome, type II

EXCLUDES 1 Arnold-Chiari syndrome, type III (Q07.1-)
Arnold-Chiari syndrome, type IV (Q07.8)

DEF: Congenital malformation of the brain in which the cerebellum protrudes through the foramen magnum into the spinal canal.

- Q07.00 **Arnold-Chiari syndrome without spina bifida or hydrocephalus** MCC
Q07.01 **Arnold-Chiari syndrome with spina bifida** MCC
Q07.02 **Arnold-Chiari syndrome with hydrocephalus** CC MCC
Q07.03 **Arnold-Chiari syndrome with spina bifida and hydrocephalus** CC MCC

- Q07.8 **Other specified congenital malformations of nervous system** MCC
Agenesis of nerve
Displacement of brachial plexus
Jaw-winking syndrome
Marcus Gunn's syndrome
Q07.9 **Congenital malformation of nervous system, unspecified** MCC
Congenital anomaly NOS of nervous system
Congenital deformity NOS of nervous system
Congenital disease or lesion NOS of nervous system

Congenital malformations of eye, ear, face and neck (Q10-Q18)

EXCLUDES 2 cleft lip and cleft palate (Q35-Q37)
congenital malformation of cervical spine (Q05.0, Q05.5, Q67.5, Q76.0-Q76.4)
congenital malformation of larynx (Q31.-)
congenital malformation of lip NEC (Q38.0)
congenital malformation of nose (Q30.-)
congenital malformation of parathyroid gland (Q89.2)
congenital malformation of thyroid gland (Q89.2)

✓ 4th Q10 Congenital malformations of eyelid, lacrimal apparatus and orbit

EXCLUDES 1 cryptophthalmos NOS (Q11.2)
cryptophthalmos syndrome (Q87.0)

- Q10.0 **Congenital ptosis**
DEF: Congenital drooping of the eyelid. Ptosis is mostly idiopathic, but may occur genetically.
Q10.1 **Congenital ectropion**
Q10.2 **Congenital entropion**
Q10.3 **Other congenital malformations of eyelid**
Ablepharon
Blepharophimosis, congenital
Coloboma of eyelid
Congenital absence or agenesis of cilia
Congenital absence or agenesis of eyelid
Congenital accessory eyelid
Congenital accessory eye muscle
Congenital malformation of eyelid NOS
Q10.4 **Absence and agenesis of lacrimal apparatus**
Congenital absence of punctum lacrimale
Q10.5 **Congenital stenosis and stricture of lacrimal duct**
Q10.6 **Other congenital malformations of lacrimal apparatus**
Congenital malformation of lacrimal apparatus NOS
Q10.7 **Congenital malformation of orbit**
✓ 4th Q11 **Anophthalmos, microphthalmos and macropthalmos**
Q11.0 **Cystic eyeball**
Q11.1 **Other anophthalmos**
Anophthalmos NOS
Agenesis of eye
Aplasia of eye
Q11.2 **Microphthalmos**
Cryptophthalmos NOS
Dysplasia of eye
Hypoplasia of eye
Rudimentary eye

Chapter 18. Symptoms, Signs and Abnormal Clinical and Laboratory Findings (R00–R99)

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

Chapter 18 includes symptoms, signs, abnormal results of clinical or other investigative procedures, and ill-defined conditions regarding which no diagnosis classifiable elsewhere is recorded. Signs and symptoms that point to a specific diagnosis have been assigned to a category in other chapters of the classification.

a. Use of symptom codes

Codes that describe symptoms and signs are acceptable for reporting purposes when a related definitive diagnosis has not been established (confirmed) by the provider.

Chest pain of unknown origin

R07.9 Chest pain, unspecified

Explanation: Codes that describe symptoms such as chest pain are acceptable for reporting purposes when the provider has not established (confirmed) a related definitive diagnosis.

b. Use of a symptom code with a definitive diagnosis code

Codes for signs and symptoms may be reported in addition to a related definitive diagnosis when the sign or symptom is not routinely associated with that diagnosis, such as the various signs and symptoms associated with complex syndromes. The definitive diagnosis code should be sequenced before the symptom code.

Signs or symptoms that are associated routinely with a disease process should not be assigned as additional codes, unless otherwise instructed by the classification.

Pneumonia with hemoptysis

J18.9 Pneumonia, unspecified organism

R04.2 Hemoptysis

Explanation: Codes for signs and symptoms may be reported in addition to a related definitive diagnosis when the sign or symptom is not routinely associated with that diagnosis.

Abdominal pain due to acute appendicitis

K35.80 Unspecified acute appendicitis

Explanation: Codes for signs or symptoms routinely associated with a disease process should not be assigned unless the classification instructs otherwise.

c. Combination codes that include symptoms

ICD-10-CM contains a number of combination codes that identify both the definitive diagnosis and common symptoms of that diagnosis. When using one of these combination codes, an additional code should not be assigned for the symptom.

Acute gastritis with hemorrhage

K29.01 Acute gastritis with bleeding

Explanation: When a combination code identifies both the definitive diagnosis and the symptom, an additional code should not be assigned for the symptom.

d. Repeated falls

Code R29.6, Repeated falls, is for use for encounters when a patient has recently fallen and the reason for the fall is being investigated.

Code Z91.81, History of falling, is for use when a patient has fallen in the past and is at risk for future falls. When appropriate, both codes R29.6 and Z91.81 may be assigned together.

e. Coma scale

The coma scale codes (R40.2-) can be used in conjunction with traumatic brain injury codes. These codes are primarily for use by trauma registries, but they may be used in any setting where this information is collected. The coma scale codes should be sequenced after the diagnosis code(s).

These codes, one from each subcategory, are needed to complete the scale. The 7th character indicates when the scale was recorded. The 7th character should match for all three codes.

At a minimum, report the initial score documented on presentation at your facility. This may be a score from the emergency medicine technician (EMT) or in the emergency department. If desired, a facility may choose to capture multiple coma scale scores.

Assign code R40.24, Glasgow coma scale, total score, when only the total score is documented in the medical record and not the individual score(s).

Do not report codes for individual or total Glasgow coma scale scores for a patient with a medically induced coma or a sedated patient.

See Section I.B.14 for coma scale documentation by clinicians other than patient's provider

23-year-old man found down after unknown injury with skull fracture and with concussion and loss of consciousness of unknown duration. EMS evaluated the patient in the field and reported the individual Glasgow coma scores:

Eye opening response—3: eyes open to speech

Verbal response—4: confused but coherent speech

Motor response—6: obeys commands fully

S02.0XXA Fracture of vault of skull, initial encounter for closed fracture

S06.0X9A Concussion with loss of consciousness of unspecified duration, initial encounter

R40.2131 Coma scale, eyes open, to sound, in the field [EMT or ambulance]

R40.2241 Coma scale, best verbal response, confused conversation, in the field [EMT or ambulance]

R40.2361 Coma scale, best motor response, obeys commands, in the field [EMT or ambulance]

Explanation: When individual scores for the Glasgow coma scale are documented, one code from each category is needed to complete the scale. The seventh character indicates when the scale was recorded and should match for all three codes. Assign a code from subcategory R40.24- Glasgow coma scale, total score, when only the total and not the individual score(s) is documented.

Patient with intractable epilepsy with status epilepticus arrives to ED with alteration of consciousness. Coma scale performed en route by EMT documented total coma score as 11. Another coma score was performed upon hospital admission that was documented as 14.

G40.911 Epilepsy, unspecified, intractable, with status epilepticus

R40.2421 Glasgow coma scale score 9-12, in the field [EMT or ambulance]

R40.2413 Glasgow coma scale score 13-15, at hospital admission

Explanation: Coma scores may be used to assess mental status in non-trauma conditions. Use only code R40.24- Glasgow coma scale, total scores when individual scores are unavailable. Multiple scores may be reported with the seventh character representing where or when the assessment was made.

f. Functional quadriplegia

GUIDELINE HAS BEEN DELETED EFFECTIVE OCTOBER 1, 2017

g. SIRS due to non-infectious process

The systemic inflammatory response syndrome (SIRS) can develop as a result of certain non-infectious disease processes, such as trauma, malignant neoplasm, or pancreatitis. When SIRS is documented with a noninfectious condition, and no subsequent infection is documented, the code for the underlying condition, such as an injury, should be assigned, followed by code R65.10, Systemic inflammatory response syndrome (SIRS) of non-infectious origin without acute organ dysfunction, or code R65.11, Systemic inflammatory response syndrome (SIRS) of non-infectious origin with acute organ dysfunction. If an associated acute organ dysfunction is documented, the appropriate code(s) for the specific type of organ dysfunction(s) should be assigned in addition to code R65.11. If acute organ dysfunction is documented, but it cannot be determined if the acute organ dysfunction is associated with SIRS or due to another condition (e.g., directly due to the trauma), the provider should be queried.

Systemic inflammatory response syndrome (SIRS) due to acute gallstone pancreatitis

K85.10 Biliary acute pancreatitis without necrosis or infection

R65.10 Systemic inflammatory response syndrome (SIRS) of non-infectious origin without acute organ dysfunction

Explanation: When SIRS is documented with a non-infectious condition without subsequent infection documented, the code for the underlying condition such as pancreatitis should be assigned followed by the appropriate code for SIRS of noninfectious origin, either with or without associated organ dysfunction.

h. Death NOS

Code R99, Ill-defined and unknown cause of mortality, is only for use in the very limited circumstance when a patient who has already died is brought into an emergency department or other healthcare facility and is pronounced dead upon arrival. It does not represent the discharge disposition of death.

i. NIHSS stroke scale

The NIH stroke scale (NIHSS) codes (R29.7- -) can be used in conjunction with acute stroke codes (I63) to identify the patient's neurological status and the severity of the stroke. The stroke scale codes should be sequenced after the acute stroke diagnosis code(s).

At a minimum, report the initial score documented. If desired, a facility may choose to capture multiple stroke scale scores.

See Section I.B.14 for NIHSS stroke scale documentation by clinicians other than patient's provider

Patient admitted with CVA seen by neurology consult who documents moderate to severe stroke, 17 on NIHSS stroke scale.

I63.9 Cerebral infarction, unspecified

R29.717 NIHSS score 17

Explanation: Unspecified cerebral vascular accident (CVA) is sequenced before the NIHSS stroke scale score code. The stroke scale is an assessment tool to help measure stroke-related neurological deficits. Fifteen items are evaluated by trained observers and include such conditions as levels of consciousness, language, dysarthria, ataxia, and sensory loss. A facility may report multiple stroke scale scores if it wants to.

Chapter 18. Symptoms, Signs and Abnormal Clinical and Laboratory Findings, Not Elsewhere Classified (R00-R99)

NOTE

This chapter includes symptoms, signs, abnormal results of clinical or other investigative procedures, and ill-defined conditions regarding which no diagnosis classifiable elsewhere is recorded.

Signs and symptoms that point rather definitely to a given diagnosis have been assigned to a category in other chapters of the classification. In general, categories in this chapter include the less well-defined conditions and symptoms that, without the necessary study of the case to establish a final diagnosis, point perhaps equally to two or more diseases or to two or more systems of the body. Practically all categories in the chapter could be designated 'not otherwise specified', 'unknown etiology' or 'transient'. The Alphabetical Index should be consulted to determine which symptoms and signs are to be allocated here and which to other chapters. The residual subcategories, numbered .8, are generally provided for other relevant symptoms that cannot be allocated elsewhere in the classification.

The conditions and signs or symptoms included in categories R00-R94 consist of:

- cases for which no more specific diagnosis can be made even after all the facts bearing on the case have been investigated;
- signs or symptoms existing at the time of initial encounter that proved to be transient and whose causes could not be determined;
- provisional diagnosis in a patient who failed to return for further investigation or care;
- cases referred elsewhere for investigation or treatment before the diagnosis was made;
- cases in which a more precise diagnosis was not available for any other reason;
- certain symptoms, for which supplementary information is provided, that represent important problems in medical care in their own right.

EXCLUDES 2 abnormal findings on antenatal screening of mother (O28.-) certain conditions originating in the perinatal period (P04-P96) signs and symptoms classified in the body system chapters signs and symptoms of breast (N63, N64.5)

AHA: 2017,1Q,6,7

This chapter contains the following blocks:

- R00-R09 Symptoms and signs involving the circulatory and respiratory systems
- R10-R19 Symptoms and signs involving the digestive system and abdomen
- R20-R23 Symptoms and signs involving the skin and subcutaneous tissue
- R25-R29 Symptoms and signs involving the nervous and musculoskeletal systems
- R30-R39 Symptoms and signs involving the genitourinary system
- R40-R46 Symptoms and signs involving cognition, perception, emotional state and behavior
- R47-R49 Symptoms and signs involving speech and voice
- R50-R69 General symptoms and signs
- R70-R79 Abnormal findings on examination of blood, without diagnosis
- R80-R82 Abnormal findings on examination of urine, without diagnosis
- R83-R89 Abnormal findings on examination of other body fluids, substances and tissues, without diagnosis
- R90-R94 Abnormal findings on diagnostic imaging and in function studies, without diagnosis
- R97 Abnormal tumor markers
- R99 Ill-defined and unknown cause of mortality

Symptoms and signs involving the circulatory and respiratory systems (R00-R09)

✓ 4th R00 Abnormalities of heart beat

EXCLUDES 1 abnormalities originating in the perinatal period (P29.1-)

EXCLUDES 2 specified arrhythmias (I47-I49)

R00.0 Tachycardia, unspecified

Rapid heart beat

Sinoauricular tachycardia NOS

Sinus [sinusal] tachycardia NOS

EXCLUDES 1 neonatal tachycardia (P29.11)

paroxysmal tachycardia (I47.-)

DEF: Excessively rapid heart rate of more than 100 beats per minute.

R00.1 Bradycardia, unspecified

Sinoatrial bradycardia

Sinus bradycardia

Slow heart beat

Vagal bradycardia

Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)

EXCLUDES 1 neonatal bradycardia (P29.12)

AHA: 2020,2Q,23

DEF: Slowed heartbeat, usually defined as a rate fewer than 60 beats per minute. Heart rhythm may be slow as a result of a congenital defect or an acquired problem.

R00.2 Palpitations

Awareness of heart beat

R00.8 Other abnormalities of heart beat

R00.9 Unspecified abnormalities of heart beat

✓ 4th R01 Cardiac murmurs and other cardiac sounds

EXCLUDES 1 cardiac murmurs and sounds originating in the perinatal period (P29.8)

R01.0 Benign and innocent cardiac murmurs

Functional cardiac murmur

R01.1 Cardiac murmur, unspecified

Cardiac bruit NOS

Heart murmur NOS

Systolic murmur NOS

R01.2 Other cardiac sounds

Cardiac dullness, increased or decreased

Precordial friction

✓ 4th R03 Abnormal blood-pressure reading, without diagnosis

R03.0 Elevated blood-pressure reading, without diagnosis of hypertension

NOTE

This category is to be used to record an episode of elevated blood pressure in a patient in whom no formal diagnosis of hypertension has been made, or as an isolated incidental finding.

R03.1 Nonspecific low blood-pressure reading

EXCLUDES 1 hypotension (I95.-)

maternal hypotension syndrome (O26.5-)

neurogenic orthostatic hypotension (G90.3)

✓ 4th R04 Hemorrhage from respiratory passages

R04.0 Epistaxis

Hemorrhage from nose

Nosebleed

R04.1 Hemorrhage from throat

hemoptysis (R04.2)

R04.2 Hemoptysis

Blood-stained sputum

Cough with hemorrhage

AHA: 2013,4Q,118

✓ 5th R04.8 Hemorrhage from other sites in respiratory passages

R04.81 Acute idiopathic pulmonary hemorrhage in infants

AIPH

Acute idiopathic hemorrhage in infants over 28 days old

EXCLUDES 1 perinatal pulmonary hemorrhage (P26.-) von Willebrand's disease (D68.0)

R04.89 Hemorrhage from other sites in respiratory passages

Pulmonary hemorrhage NOS

R04.9 Hemorrhage from respiratory passages, unspecified

R05 Cough

EXCLUDES 1 cough with hemorrhage (R04.2)

smoker's cough (J41.0)

AHA: 2016,2Q,33

✓4th R06 Abnormalities of breathing

EXCLUDES 1 acute respiratory distress syndrome (J80)
respiratory arrest (R09.2)
respiratory arrest of newborn (P28.81)
respiratory distress syndrome of newborn (P22.-)
respiratory failure (J96.-)
respiratory failure of newborn (P28.5)

✓5th R06.0 Dyspnea

EXCLUDES 1 tachypnea NOS (R06.82)
transient tachypnea of newborn (P22.1)

R06.00 Dyspnea, unspecified

AHA: 2017.1Q.26

R06.01 Orthopnea**R06.02 Shortness of breath****R06.03 Acute respiratory distress**

AHA: 2017.4Q.23

R06.09 Other forms of dyspnea**R06.1 Stridor**

EXCLUDES 1 congenital laryngeal stridor (P28.89)
laryngismus (stridulus) (J38.5)

DEF: Certain type of wheezing described as a loud, constant, musical sound produced when breathing with an obstructed airway, like the inspiratory sound heard when laryngeal or esophageal obstruction is present.

R06.2 Wheezing

EXCLUDES 1 asthma (J45.-)

AHA: 2016.2Q.33

DEF: High-pitched whistling sound during breathing due to stenosis of the respiratory passageway. Wheezing is associated with asthma, sleep apnea, bronchiectasis, bronchiolitis, COPD, and pleural effusion.

R06.3 Periodic breathing

Cheyne-Stokes breathing

R06.4 Hyperventilation

EXCLUDES 1 psychogenic hyperventilation (F45.8)

R06.5 Mouth breathing

EXCLUDES 2 dry mouth NOS (R68.2)

R06.6 Hiccough

EXCLUDES 1 psychogenic hiccough (F45.8)

R06.7 Sneezing**✓5th R06.8 Other abnormalities of breathing****R06.81 Apnea, not elsewhere classified**

Apnea NOS

EXCLUDES 1 apnea (of) newborn (P28.4)
sleep apnea (G47.3-)
sleep apnea of newborn (primary) (P28.3)

R06.82 Tachypnea, not elsewhere classified

Tachypnea NOS

EXCLUDES 1 transitory tachypnea of newborn (P22.1)

R06.83 Snoring**R06.89 Other abnormalities of breathing**

Breath-holding (spells)

Sighing

R06.9 Unspecified abnormalities of breathing**✓4th R07 Pain in throat and chest**

EXCLUDES 1 epidemic myalgia (B33.0)

EXCLUDES 2 jaw pain R68.84
pain in breast (N64.4)

R07.0 Pain in throat

EXCLUDES 1 chronic sore throat (J31.2)
sore throat (acute) NOS (J02.9)

EXCLUDES 2 dysphagia (R13.1-)
pain in neck (M54.2)

R07.1 Chest pain on breathing

Painful respiration

R07.2 Precordial pain

DEF: Pain felt in the anterior (front) chest wall over the region of the heart. This type of pain is generally felt slightly to the left of the sternum, but may also extend into the surrounding chest wall region.

✓5th R07.8 Other chest pain**R07.81 Pleurodynia**

Pleurodynia NOS

EXCLUDES 1 epidemic pleurodynia (B33.0)

R07.82 Intercostal pain**R07.89 Other chest pain**

Anterior chest-wall pain NOS

R07.9 Chest pain, unspecified**✓4th R09 Other symptoms and signs involving the circulatory and respiratory system**

EXCLUDES 1 acute respiratory distress syndrome (J80)
respiratory arrest of newborn (P28.81)
respiratory distress syndrome of newborn (P22.0)
respiratory failure (J96.-)
respiratory failure of newborn (P28.5)

✓5th R09.0 Asphyxia and hypoxemia

EXCLUDES 1 asphyxia due to carbon monoxide (T58.-)
asphyxia due to foreign body in respiratory tract (T17.-)
birth (intrauterine) asphyxia (P84)
hyperventilation (R06.4)
traumatic asphyxia (T71.-)
hypercapnia (R06.89)

R09.01 Asphyxia

CC

DEF: Interference of oxygen intake due to obstruction or injury of airways resulting in a lack of oxygen perfusion to the tissues or excessive carbon dioxide in the blood. Can cause unconsciousness or death.

R09.02 Hypoxemia

AHA: 2019.3Q.15

DEF: Insufficient oxygen in the arterial blood resulting in inadequate delivery of oxygen to the body tissues.

R09.1 Pleurisy

EXCLUDES 1 pleurisy with effusion (J90)

1 R09.2 Respiratory arrest

MCC MCC

Cardiorespiratory failure

EXCLUDES 1 cardiac arrest (I46.-)
respiratory arrest of newborn (P28.81)
respiratory distress of newborn (P22.0)
respiratory failure (J96.-)
respiratory failure of newborn (P28.5)
respiratory insufficiency (R06.89)
respiratory insufficiency of newborn (P28.5)

R09.3 Abnormal sputum

Abnormal amount of sputum

Abnormal color of sputum

Abnormal odor of sputum

Excessive sputum

EXCLUDES 1 blood-stained sputum (R04.2)

✓5th R09.8 Other specified symptoms and signs involving the circulatory and respiratory systems**R09.81 Nasal congestion****R09.82 Postnasal drip****R09.89 Other specified symptoms and signs involving the circulatory and respiratory systems**

Abnormal chest percussion

Bruit (arterial)

Chest tympany

Choking sensation

Feeling of foreign body in throat

Friction sounds in chest

Rales

Weak pulse

EXCLUDES 2 foreign body in throat (T17.2-)
wheezing (R06.2)

Symptoms and signs involving the digestive system and abdomen (R10-R19)

EXCLUDES 1 congenital or infantile pylorospasm (Q40.0)
 gastrointestinal hemorrhage (K92.0-K92.2)
 intestinal obstruction (K56.-)
 newborn gastrointestinal hemorrhage (P54.0-P54.3)
 newborn intestinal obstruction (P76.-)
 pylorospasm (K31.3)
 signs and symptoms involving the urinary system (R30-R39)
 symptoms referable to female genital organs (N94.-)
 symptoms referable to male genital organs (N48-N50)

✓ 4th R10 Abdominal and pelvic pain

EXCLUDES 1 renal colic (N23)
EXCLUDES 2 dorsalgia (M54.-)
 flatulence and related conditions (R14.-)

R10.0 Acute abdomen

Severe abdominal pain (generalized) (with abdominal rigidity)

EXCLUDES 1 abdominal rigidity NOS (R19.3)
 generalized abdominal pain NOS (R10.84)
 localized abdominal pain (R10.1-R10.3-)

✓ 5th R10.1 Pain localized to upper abdomen

R10.10 Upper abdominal pain, unspecified
R10.11 Right upper quadrant pain
R10.12 Left upper quadrant pain
R10.13 Epigastric pain
 Dyspepsia
EXCLUDES 1 functional dyspepsia (K30)

R10.2 Pelvic and perineal pain

EXCLUDES 1 vulvodynia (N94.81)

✓ 5th R10.3 Pain localized to other parts of lower abdomen

R10.30 Lower abdominal pain, unspecified
R10.31 Right lower quadrant pain
R10.32 Left lower quadrant pain
R10.33 Periumbilical pain

✓ 5th R10.8 Other abdominal pain

✓ 5th R10.81 Abdominal tenderness
 Abdominal tenderness NOS
R10.811 Right upper quadrant abdominal tenderness
R10.812 Left upper quadrant abdominal tenderness
R10.813 Right lower quadrant abdominal tenderness
R10.814 Left lower quadrant abdominal tenderness
R10.815 Periumbilical abdominal tenderness
R10.816 Epigastric abdominal tenderness
R10.817 Generalized abdominal tenderness
R10.819 Abdominal tenderness, unspecified site
✓ 5th R10.82 Rebound abdominal tenderness
R10.821 Right upper quadrant rebound abdominal tenderness

R10.822 Left upper quadrant rebound abdominal tenderness
R10.823 Right lower quadrant rebound abdominal tenderness
R10.824 Left lower quadrant rebound abdominal tenderness
R10.825 Periumbilical rebound abdominal tenderness
R10.826 Epigastric rebound abdominal tenderness
R10.827 Generalized rebound abdominal tenderness
R10.829 Rebound abdominal tenderness, unspecified site

R10.83 Colic

Colic NOS
 Infantile colic
EXCLUDES 1 colic in adult and child over 12 months old (R10.84)

DEF: Inconsolable crying in an otherwise well-fed and healthy infant for more than three hours a day, three days a week, for more than three weeks.

R10.84 Generalized abdominal pain

EXCLUDES 1 generalized abdominal pain associated with acute abdomen (R10.0)

R10.9 Unspecified abdominal pain

✓ 4th R11 Nausea and vomiting

EXCLUDES 1 cyclical vomiting associated with migraine (G43.A-)
 excessive vomiting in pregnancy (O21.-)
 hematemesis (K92.0)
 neonatal hematemesis (P54.0)
 newborn vomiting (P92.0-)
 psychogenic vomiting (F50.89)
 vomiting associated with bulimia nervosa (F50.2)
 vomiting following gastrointestinal surgery (K91.0)

AHA: 2017,1Q,28

TIP: Assign a code from this category along with K31.89 Other diseases of stomach and duodenum, to describe cyclical vomiting not due to migraine.

R11.0 Nausea

Nausea NOS
 Nausea without vomiting

✓ 5th R11.1 Vomiting

R11.10 Vomiting, unspecified
 Vomiting NOS
R11.11 Vomiting without nausea
R11.12 Projectile vomiting
R11.13 Vomiting of fecal matter
R11.14 Bilious vomiting
 Bilious emesis
R11.15 Cyclical vomiting syndrome unrelated to migraine
 Cyclic vomiting syndrome NOS
 Persistent vomiting
EXCLUDES 1 cyclical vomiting in migraine (G43.A-)
EXCLUDES 2 bulimia nervosa (F50.2)
 diabetes mellitus due to underlying condition (E08.-)

AHA: 2019,4Q,15

R11.2 Nausea with vomiting, unspecified

Persistent nausea with vomiting NOS
AHA: 2020,1Q,8

R12 Heartburn

EXCLUDES 1 dyspepsia NOS (R10.13)
 functional dyspepsia (K30)

✓ 4th R13 Aphagia and dysphagia

R13.0 Aphagia

Inability to swallow
EXCLUDES 1 psychogenic aphagia (F50.9)

✓SN R13.1 Dysphagia

Code first, if applicable, dysphagia following cerebrovascular disease (I69, with final characters -91)

EXCLUDES1 psychogenic dysphagia (F45.8)

Swallowing Function**R13.10 Dysphagia, unspecified**

Difficulty in swallowing NOS

R13.11 Dysphagia, oral phase**R13.12 Dysphagia, oropharyngeal phase****R13.13 Dysphagia, pharyngeal phase****R13.14 Dysphagia, pharyngoesophageal phase****R13.19 Other dysphagia**

Cervical dysphagia

Neurogenic dysphagia

✓4th R14 Flatulence and related conditions

EXCLUDES1 psychogenic aerophagia (F45.8)

R14.0 Abdominal distension (gaseous)

Bloating

Tympanites (abdominal) (intestinal)

R14.1 Gas pain**R14.2 Eructation****R14.3 Flatulence****✓4th R15 Fecal incontinence**

INCLUDES encopresis NOS

EXCLUDES1 fecal incontinence of nonorganic origin (F98.1)

R15.0 Incomplete defecation

EXCLUDES1 constipation (K59.0-)

fecal impaction (K56.41)

R15.1 Fecal smearing

Fecal soiling

R15.2 Fecal urgency**R15.9 Full incontinence of feces**

Fecal incontinence NOS

✓4th R16 Hepatomegaly and splenomegaly, not elsewhere classified**R16.0 Hepatomegaly, not elsewhere classified**

Hepatomegaly NOS

R16.1 Splenomegaly, not elsewhere classified

Splenomegaly NOS

R16.2 Hepatomegaly with splenomegaly, not elsewhere classified

Hepatosplenomegaly NOS

R17 Unspecified jaundice

EXCLUDES1 neonatal jaundice (P55, P57-P59)

✓4th R18 Ascites

INCLUDES fluid in peritoneal cavity

EXCLUDES1 ascites in alcoholic cirrhosis (K70.31)

ascites in alcoholic hepatitis (K70.11)

ascites in toxic liver disease with chronic active hepatitis (K71.51)

DEF: Abnormal accumulation of free fluid in the abdominal cavity, causing distention and tightness in addition to shortness of breath as the fluid accumulates. Ascites is usually an underlying disorder and can be a manifestation of any number of diseases.

R18.0 Malignant ascites

Code first malignancy, such as:

malignant neoplasm of ovary (C56.-)

secondary malignant neoplasm of retroperitoneum and peritoneum (C78.6)

R18.8 Other ascites

Ascites NOS

Peritoneal effusion (chronic)

AHA: 2018,1Q,4

✓4th R19 Other symptoms and signs involving the digestive system and abdomen

EXCLUDES1 acute abdomen (R10.0)

✓6th R19.0 Intra-abdominal and pelvic swelling, mass and lump

EXCLUDES1 abdominal distension (gaseous) (R14.-)

ascites (R18.-)

R19.00 Intra-abdominal and pelvic swelling, mass and lump, unspecified site**R19.01 Right upper quadrant abdominal swelling, mass and lump****R19.02 Left upper quadrant abdominal swelling, mass and lump****R19.03 Right lower quadrant abdominal swelling, mass and lump****R19.04 Left lower quadrant abdominal swelling, mass and lump****R19.05 Periumbilic swelling, mass or lump**

Diffuse or generalized umbilical swelling or mass

R19.06 Epigastric swelling, mass or lump**R19.07 Generalized intra-abdominal and pelvic swelling, mass and lump**

Diffuse or generalized intra-abdominal swelling or mass NOS

Diffuse or generalized pelvic swelling or mass NOS

R19.09 Other intra-abdominal and pelvic swelling, mass and lump**✓6th R19.1 Abnormal bowel sounds****R19.11 Absent bowel sounds****R19.12 Hyperactive bowel sounds****R19.15 Other abnormal bowel sounds**

Abnormal bowel sounds NOS

R19.2 Visible peristalsis

Hyperperistalsis

DEF: Visible movements of muscular attempts to move food through the digestive tract due to pyloric obstruction, stomach obstruction, or intestinal obstruction.

✓6th R19.3 Abdominal rigidity

EXCLUDES1 abdominal rigidity with severe abdominal pain (R10.0)

R19.30 Abdominal rigidity, unspecified site**R19.31 Right upper quadrant abdominal rigidity****R19.32 Left upper quadrant abdominal rigidity****R19.33 Right lower quadrant abdominal rigidity****R19.34 Left lower quadrant abdominal rigidity****R19.35 Periumbilic abdominal rigidity****R19.36 Epigastric abdominal rigidity****R19.37 Generalized abdominal rigidity****R19.4 Change in bowel habit**

EXCLUDES1 constipation (K59.0-)

functional diarrhea (K59.1)

R19.5 Other fecal abnormalities

Abnormal stool color
Bulky stools
Mucus in stools
Occult blood in feces
Occult blood in stools
EXCLUDES 1 melena (K92.1)
neonatal melena (P54.1)

AHA: 2019,1Q,32

R19.6 Halitosis**R19.7 Diarrhea, unspecified**

Diarrhea NOS
EXCLUDES 1 functional diarrhea (K59.1)
neonatal diarrhea (P78.3)
psychogenic diarrhea (F45.8)

R19.8 Other specified symptoms and signs involving the digestive system and abdomen**Symptoms and signs involving the skin and subcutaneous tissue (R20–R23)**

EXCLUDES 2 symptoms relating to breast (N64.4–N64.5)

✓4^A R20 Disturbances of skin sensation

EXCLUDES 1 dissociative anesthesia and sensory loss (F44.6)
psychogenic disturbances (F45.8)

R20.0 Anesthesia of skin**R20.1 Hypoesthesia of skin****R20.2 Paresthesia of skin**

Formication
Pins and needles
Tingling skin
EXCLUDES 1 acroparesthesia (I73.8)

R20.3 Hyperesthesia**R20.8 Other disturbances of skin sensation****R20.9 Unspecified disturbances of skin sensation****R21 Rash and other nonspecific skin eruption**

INCLUDES rash NOS
EXCLUDES 1 specified type of rash — code to condition
vesicular eruption (R23.8)

✓4^A R22 Localized swelling, mass and lump of skin and subcutaneous tissue

INCLUDES subcutaneous nodules (localized)(superficial)
EXCLUDES 1 abnormal findings on diagnostic imaging (R90–R93)
edema (R60.-)
enlarged lymph nodes (R59.-)
localized adiposity (E65)
swelling of joint (M25.4-)

R22.0 Localized swelling, mass and lump, head**R22.1 Localized swelling, mass and lump, neck****R22.2 Localized swelling, mass and lump, trunk**

EXCLUDES 1 intra-abdominal or pelvic mass and lump (R19.0-)
intra-abdominal or pelvic swelling (R19.0-)
EXCLUDES 2 breast mass and lump (N63)

✓5^A R22.3 Localized swelling, mass and lump, upper limb**R22.30 Localized swelling, mass and lump, unspecified upper limb****R22.31 Localized swelling, mass and lump, right upper limb****R22.32 Localized swelling, mass and lump, left upper limb****R22.33 Localized swelling, mass and lump, upper limb, bilateral****✓5^A R22.4 Localized swelling, mass and lump, lower limb****R22.40 Localized swelling, mass and lump, unspecified lower limb****R22.41 Localized swelling, mass and lump, right lower limb****R22.42 Localized swelling, mass and lump, left lower limb****R22.43 Localized swelling, mass and lump, lower limb, bilateral****R22.9 Localized swelling, mass and lump, unspecified****✓4^A R23 Other skin changes****R23.0 Cyanosis**

EXCLUDES 1 acrocyanosis (I73.8)
cyanotic attacks of newborn (P28.2)
DEF: Bluish or purplish discoloration of the skin due to an inadequate oxygen blood level.

R23.1 Pallor

Clammy skin

R23.2 Flushing

Excessive blushing
Code first, if applicable, menopausal and female climacteric states (N95.1)

R23.3 Spontaneous ecchymoses

Petechiae
EXCLUDES 1 ecchymoses of newborn (P54.5)
purpura (D69.-)

R23.4 Changes in skin texture

Desquamation of skin
Induration of skin
Scaling of skin
EXCLUDES 1 epidermal thickening NOS (L85.9)

R23.8 Other skin changes**R23.9 Unspecified skin changes****Symptoms and signs involving the nervous and musculoskeletal systems (R25–R29)****✓4^A R25 Abnormal involuntary movements**

EXCLUDES 1 specific movement disorders (G20–G26)
stereotyped movement disorders (F98.4)
tic disorders (F95.-)

R25.0 Abnormal head movements**R25.1 Tremor, unspecified**

EXCLUDES 1 chorea NOS (G25.5)
essential tremor (G25.0)
hysterical tremor (F44.4)
intention tremor (G25.2)

R25.2 Cramp and spasm

EXCLUDES 2 carpopedal spasm (R29.0)
charley-horse (M62.831)
infantile spasms (G40.4-)
muscle spasm of back (M62.830)
muscle spasm of calf (M62.831)

R25.3 Fasciculation

Twitching NOS

R25.8 Other abnormal involuntary movements**R25.9 Unspecified abnormal involuntary movements****✓4^A R26 Abnormalities of gait and mobility**

Carpopedal spasm

EXCLUDES 1 hysterical tetany (F44.5)
 neonatal tetany (P71.3)
 parathyroid tetany (E20.9)
 post-thyroidectomy tetany (E89.2)

DEF: Calcium or other mineral imbalance causing voluntary muscles such as hands, feet, or larynx to spasm rhythmically.

R29.1 Meningismus**R29.2 Abnormal reflex**

EXCLUDES 2 abnormal pupillary reflex (H57.0)
 hyperactive gag reflex (J39.2)
 vasovagal reaction or syncope (R55)

R29.3 Abnormal posture**R29.4 Clicking hip**

EXCLUDES 1 congenital deformities of hip (Q65.-)

R29.5 Transient paralysis

Code first any associated spinal cord injury (S14.0, S14.1-, S24.0, S24.1-, S34.0-, S34.1-)

EXCLUDES 1 transient ischemic attack (G45.9)

R29.6 Repeated falls

Falling

Tendency to fall

EXCLUDES 2 at risk for falling (Z91.81)
 history of falling (Z91.81)

Chapter 19. Injury, Poisoning and Certain Other Consequences of External Causes (S00–T88)

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

a. Application of 7th characters in Chapter 19

Most categories in chapter 19 have a 7th character requirement for each applicable code. Most categories in this chapter have three 7th character values (with the exception of fractures): A, initial encounter, D, subsequent encounter and S, sequela. Categories for traumatic fractures have additional 7th character values. While the patient may be seen by a new or different provider over the course of treatment for an injury, assignment of the 7th character is based on whether the patient is undergoing active treatment and not whether the provider is seeing the patient for the first time.

For complication codes, active treatment refers to treatment for the condition described by the code, even though it may be related to an earlier precipitating problem. For example, code T84.50XA, Infection and inflammatory reaction due to unspecified internal joint prosthesis, initial encounter, is used when active treatment is provided for the infection, even though the condition relates to the prosthetic device, implant or graft that was placed at a previous encounter.

7th character "A", initial encounter is used for each encounter where the patient is receiving active treatment for the condition.

Patient admitted after fall from a skateboard onto the sidewalk, x-rays identify a nondisplaced fracture to the distal pole of the right scaphoid bone. The patient is placed in a cast.

S62.014A Nondisplaced fracture of distal pole of navicular [scaphoid] bone of right wrist, initial encounter for closed fracture

V00.131A Fall from skateboard, initial encounter

Y92.480 Sidewalk as the place of occurrence of the external cause

Y93.51 Activity, roller skating (inline) and skateboarding

Y99.8 Other external cause status

Explanation: This fracture would be coded with a seventh character A for initial encounter because the patient received x-rays to identify the site of the fracture and treatment was rendered; this would be considered active treatment.

7th character "D" subsequent encounter is used for encounters after the patient has completed active treatment of the condition and is receiving routine care for the condition during the healing or recovery phase.

Patient admitted after fall from a skateboard onto the sidewalk resulted in casting of the right arm. X-rays are taken to evaluate how well the nondisplaced fracture to the distal pole of the right scaphoid bone is healing. The physician feels the fracture is healing appropriately; no adjustments to the cast are made.

S62.014D Nondisplaced fracture of distal pole of navicular [scaphoid] bone of right wrist, subsequent encounter for fracture with routine healing

V00.131D Fall from skateboard, subsequent encounter

Explanation: This fracture would be coded with a seventh character D for subsequent encounter, whether the same physician who provided the initial cast application or a different physician is now seeing the patient. Although the patient received x-rays, the intent of the x-rays was to assess how the fracture was healing. There was no active treatment rendered and the visit is therefore considered a subsequent encounter.

The aftercare Z codes should not be used for aftercare for conditions such as injuries or poisonings, where 7th characters are provided to identify subsequent care. For example, for aftercare of an injury, assign the acute injury code with the 7th character "D" (subsequent encounter).

7th character "S", sequela, is for use for complications or conditions that arise as a direct result of a condition, such as scar formation after a burn. The scars are sequelae of the burn. When using 7th character "S", it is

necessary to use both the injury code that precipitated the sequela and the code for the sequela itself. The "S" is added only to the injury code, not the sequela code. The 7th character "S" identifies the injury responsible for the sequela. The specific type of sequela (e.g. scar) is sequenced first, followed by the injury code.

See Section I.B.10 Sequelae, (Late Effects)

Patient with a history of a nondisplaced fracture to the distal pole of the right scaphoid bone due to a fall from a skateboard is admitted for evaluation of arthritis to the right wrist that has developed as a consequence of the traumatic fracture.

M12.531 Traumatic arthropathy, right wrist

S62.014S Nondisplaced fracture of distal pole of navicular [scaphoid] bone of right wrist, sequela

V00.131S Fall from skateboard, sequela

Explanation: The code identifying the specific sequela condition (traumatic arthritis) should be coded first followed by the injury that instigated the development of the sequela (fracture). The scaphoid fracture injury code is given a 7th character S for sequela to represent its role as the inciting injury. The fracture has healed and is not being managed or treated on this admit and therefore is not applicable as a first listed or principal diagnosis. However, it is directly related to the development of the arthritis and should be appended as a secondary code to signify this cause and effect relationship.

b. Coding of injuries

When coding injuries, assign separate codes for each injury unless a combination code is provided, in which case the combination code is assigned. Codes from category T07, Unspecified multiple injuries should not be assigned in the inpatient setting unless information for a more specific code is not available. Traumatic injury codes (S00–T14.9) are not to be used for normal, healing surgical wounds or to identify complications of surgical wounds.

The code for the most serious injury, as determined by the provider and the focus of treatment, is sequenced first.

1) Superficial injuries

Superficial injuries such as abrasions or contusions are not coded when associated with more severe injuries of the same site.

2) Primary injury with damage to nerves/blood vessels

When a primary injury results in minor damage to peripheral nerves or blood vessels, the primary injury is sequenced first with additional code(s) for injuries to nerves and spinal cord (such as category S04), and/or injury to blood vessels (such as category S15). When the primary injury is to the blood vessels or nerves, that injury should be sequenced first.

3) Iatrogenic injuries

Injury codes from Chapter 19 should not be assigned for injuries that occur during, or as a result of, a medical intervention. Assign the appropriate complication code(s).

c. Coding of traumatic fractures

The principles of multiple coding of injuries should be followed in coding fractures. Fractures of specified sites are coded individually by site in accordance with both the provisions within categories S02, S12, S22, S32, S42, S49, S52, S59, S62, S72, S79, S82, S89, S92 and the level of detail furnished by medical record content.

A fracture not indicated as open or closed should be coded to closed. A fracture not indicated whether displaced or not displaced should be coded to displaced.

More specific guidelines are as follows:

1) Initial vs. subsequent encounter for fractures

Traumatic fractures are coded using the appropriate 7th character for initial encounter (A, B, C) for each encounter where the patient is receiving active treatment for the fracture. The appropriate 7th character for initial encounter should also be assigned for a patient who delayed seeking treatment for the fracture or nonunion.

Fractures are coded using the appropriate 7th character for subsequent care for encounters after the patient has completed active treatment of the fracture and is receiving routine care for the fracture during the healing or recovery phase.

Care for complications of surgical treatment for fracture repairs during the healing or recovery phase should be coded with the appropriate complication codes.

Care of complications of fractures, such as malunion and nonunion, should be reported with the appropriate 7th character for subsequent care with nonunion (K, M, N,) or subsequent care with malunion (P, Q, R).

Malunion/nonunion: The appropriate 7th character for initial encounter should also be assigned for a patient who delayed seeking treatment for the fracture or nonunion.

Female patient fell during a forest hiking excursion almost six months ago and until recently did not feel she needed to seek medical attention for her left ankle pain; x-rays show nonunion of lateral malleolus and surgery has been scheduled

S82.62XA Displaced fracture of lateral malleolus of left fibula, initial encounter for closed fracture

W01.0XXA Fall on same level from slipping, tripping and stumbling without subsequent striking against object, initial encounter

Y92.821 Forest as place of occurrence of the external cause

Y93.01 Activity, walking, marching and hiking

Y99.8 Other external cause status

Explanation: A seventh character of A is used for the lateral malleolus nonunion fracture to signify that the fracture is receiving active treatment. The delayed care for the fracture has resulted in a nonunion, but capturing the nonunion in the seventh character is trumped by the provision of active care.

The open fracture designations in the assignment of the 7th character for fractures of the forearm, femur and lower leg, including ankle are based on the Gustilo open fracture classification. When the Gustilo classification type is not specified for an open fracture, the 7th character for open fracture type I or II should be assigned (B, E, H, M, Q).

A 17-year-old arrives at the trauma center with open, displaced right forearm fracture with extensive soft tissue damage. He fell while being tackled playing football for his high school team. On-call orthopaedic specialist documents segmental type IIIA fracture of radial shaft with no need for plastic consult.

S52.361C Displaced segmental fracture of shaft of radius, right arm, initial encounter for open fracture type IIIA, IIIB, or IIIC

W03.XXXA Other fall on same level due to collision with another person, initial encounter

Y92.321 Football field as the place of occurrence of the external cause

Y93.61 Activity, American tackle football

Explanation: The seventh character for forearm fractures capture the type of encounter and whether the fracture is open or closed; open fractures are broken down further by the type of fracture based on the Gustilo classification. The Gustilo classification describes the severity of open fracture and soft tissue injury. Type IIIA describes an open fracture with extensive soft tissue injury but adequate soft tissue remaining for wound coverage. A segmental fracture means that the bone is broken in two places, leaving at least one segment unattached to the bone. There is no need to report an additional code for the soft tissue injury as it is captured in the fracture code.

A code from category M80, not a traumatic fracture code, should be used for any patient with known osteoporosis who suffers a fracture, even if the patient had a minor fall or trauma, if that fall or trauma would not usually break a normal, healthy bone.

See Section I.C.13. Osteoporosis.

The aftercare Z codes should not be used for aftercare for traumatic fractures. For aftercare of a traumatic fracture, assign the acute fracture code with the appropriate 7th character.

2) Multiple fractures sequencing

Multiple fractures are sequenced in accordance with the severity of the fracture.

3) Physal fractures

For physal fractures, assign only the code identifying the type of physal fracture. Do not assign a separate code to identify the specific bone that is fractured.

d. Coding of burns and corrosions

The ICD-10-CM makes a distinction between burns and corrosions. The burn codes are for thermal burns, except sunburns, that come from a heat source, such as a fire or hot appliance. The burn codes are also for burns resulting from electricity and radiation. Corrosions are burns due to chemicals. The guidelines are the same for burns and corrosions.

Current burns (T20-T25) are classified by depth, extent and by agent (X code). Burns are classified by depth as first degree (erythema), second degree (blistering), and third degree (full-thickness involvement). Burns of the eye and internal organs (T26-T28) are classified by site, but not by degree.

1) Sequencing of burn and related condition codes

Sequence first the code that reflects the highest degree of burn when more than one burn is present.

- When the reason for the admission or encounter is for treatment of external multiple burns, sequence first the code that reflects the burn of the highest degree.
- When a patient has both internal and external burns, the circumstances of admission govern the selection of the principal diagnosis or first-listed diagnosis.
- When a patient is admitted for burn injuries and other related conditions such as smoke inhalation and/or respiratory failure, the circumstances of admission govern the selection of the principal or first-listed diagnosis.

Patient admitted with minor first-degree burns to multiple sites of her right and left hands as well as severe smoke inhalation. While she was sleeping at home, a candle on her dresser lit the bedroom curtains on fire.

T59.811A Toxic effect of smoke, accidental (unintentional), initial encounter

J70.5 Respiratory conditions due to smoke inhalation

T23.191A Burn of first degree of multiple sites of right wrist and hand, initial encounter

T23.192A Burn of first degree of multiple sites of left wrist and hand, initial encounter

X08.8XXA Exposure to other specified smoke, fire and flames, initial encounter

Y92.003 Bedroom of unspecified non-institutional (private) residence as the place of occurrence of the external cause

Y93.84 Activity, sleeping

Explanation: Based on the documentation, the inhalation injury is more severe than the first-degree burns and is sequenced first. The burns to the hands are appended as secondary diagnoses.

2) Burns of the same anatomic site

Classify burns of the same anatomic site and on the same side but of different degrees to the subcategory identifying the highest degree recorded in the diagnosis (e.g., for second and third degree burns of right thigh, assign only code T24.311-).

3) Non-healing burns

Non-healing burns are coded as acute burns.

Necrosis of burned skin should be coded as a non-healed burn.

4) Infected burn

For any documented infected burn site, use an additional code for the infection.

5) Assign separate codes for each burn site

When coding burns, assign separate codes for each burn site. Category T30, Burn and corrosion, body region unspecified is extremely vague and should rarely be used.

Codes for burns of "multiple sites" should only be assigned when the medical record documentation does not specify the individual sites.

Patient is admitted with third-degree burns of the scalp as well as second-degree burns to the back of the right hand

T20.35XA Burn of third degree of scalp [any part], initial encounter

T23.261A Burn of second degree of back of right hand, initial encounter

Explanation: Two codes may be reported as the hand and face represent distinct burn sites.

6) Burns and corrosions classified according to extent of body surface involved

Assign codes from category T31, Burns classified according to extent of body surface involved, or T32, Corrosions classified according to extent of body surface involved, when the site of the burn is not specified or when there is a need for additional data. It is advisable to use category T31 as additional coding when needed to provide data for evaluating burn mortality, such as that needed by burn units. It is also advisable to use category T31 as an additional code for reporting purposes when there is mention of a third-degree burn involving 20 percent or more of the body surface.

Categories T31 and T32 are based on the classic "rule of nines" in estimating body surface involved: head and neck are assigned nine percent, each arm nine percent, each leg 18 percent, the anterior trunk 18 percent, posterior trunk 18 percent, and genitalia one percent. Providers may change these percentage assignments where necessary to accommodate infants and children who have proportionately larger heads than adults, and patients who have large buttocks, thighs, or abdomen that involve burns.

Patient seen in burn unit for dressing change after he accidentally spilled acetic acid on himself two days ago. The second-degree burns to his right thigh, covering about 3 percent of his body surface, are healing appropriately.

T54.2X1D Toxic effect of corrosive acids and acid-like substances, accidental (unintentional), subsequent encounter

T24.611D Corrosion of second degree of right thigh, subsequent encounter

T32.0 Corrosions involving less than 10% of body surface

Explanation: Code T32.0 provides additional information as to how much of the patient's body was affected by the corrosive substance.

7) Encounters for treatment of sequela of burns

Encounters for the treatment of the late effects of burns or corrosions (i.e., scars or joint contractures) should be coded with a burn or corrosion code with the 7th character "S" for sequela.

8) Sequelae with a late effect code and current burn

When appropriate, both a code for a current burn or corrosion with 7th character "A" or "D" and a burn or corrosion code with 7th character "S" may be assigned on the same record (when both a current burn and sequelae of an old burn exist). Burns and corrosions do not heal at the same rate and a current healing wound may still exist with sequela of a healed burn or corrosion.

See Section I.B.10 Sequela (Late Effects)

Female patient seen in ED for second-degree burn to the left ear; she also has significant scarring on her left elbow from a third-degree burn from childhood

T20.212A Burn of second degree of left ear [any part, except ear drum], initial encounter

L90.5 Scar conditions and fibrosis of skin

T22.322S Burn of third degree of left elbow, sequela

Explanation: The patient is being seen for management of a current second-degree burn, which is reflected in the code by appending the seventh character of A, indicating active treatment or management of this burn. The elbow scarring is a sequela of a previous third-degree burn. The sequela condition precedes the original burn injury, which is appended with a seventh character of S.

9) Use of an external cause code with burns and corrosions

An external cause code should be used with burns and corrosions to identify the source and intent of the burn, as well as the place where it occurred.

e. Adverse effects, poisoning, underdosing and toxic effects

Codes in categories T36-T65 are combination codes that include the substance that was taken as well as the intent. No additional external cause code is required for poisonings, toxic effects, adverse effects and underdosing codes.

1) Do not code directly from the Table of Drugs

Do not code directly from the Table of Drugs and Chemicals. Always refer back to the Tabular List.

2) Use as many codes as necessary to describe

Use as many codes as necessary to describe completely all drugs, medicinal or biological substances.

3) If the same code would describe the causative agent

If the same code would describe the causative agent for more than one adverse reaction, poisoning, toxic effect or underdosing, assign the code only once.

4) If two or more drugs, medicinal or biological substances

If two or more drugs, medicinal or biological substances are taken, code each individually unless a combination code is listed in the Table of Drugs and Chemicals.

If multiple unspecified drugs, medicinal or biological substances were taken, assign the appropriate code from subcategory T50.91, Poisoning by, adverse effect of and underdosing of multiple unspecified drugs, medicaments and biological substances.

5) The occurrence of drug toxicity is classified in ICD-10-CM as follows:

(a) Adverse effect

When coding an adverse effect of a drug that has been correctly prescribed and properly administered, assign the appropriate code for the nature of the adverse effect followed by the appropriate code for the adverse effect of the drug (T36-T50). The code for the drug should have a 5th or 6th character "5" (for example T36.0X5-). Examples of the nature of an adverse effect are tachycardia, delirium, gastrointestinal hemorrhaging, vomiting, hypokalemia, hepatitis, renal failure, or respiratory failure.

Patient admitted for stomach pain and jaundice, indicated by physician as possible side-effects of Inderal, recently started for hypertension. Inderal was discontinued and the patient switched to Atenolol instead.

R10.9 Unspecified abdominal pain

R17 Unspecified jaundice

T44.7X5A Adverse effect of beta-adrenoreceptor antagonists, initial encounter

I10 Essential (primary) hypertension

Explanation: The side-effects caused by the drug are listed first, followed by the code for the adverse effect of the drug to capture the specific drug that was used.

(b) Poisoning

When coding a poisoning or reaction to the improper use of a medication (e.g., overdose, wrong substance given or taken in error, wrong route of administration), first assign the appropriate code from categories T36-T50. The poisoning codes have an associated intent as their 5th or 6th character (accidental, intentional self-harm, assault and undetermined). If the intent of the poisoning is unknown or unspecified, code the intent as accidental intent. The undetermined intent is only for use if the documentation in the record specifies that the intent cannot be determined. Use additional code(s) for all manifestations of poisonings.

A 55-year-old female status post recent left knee replacement is admitted due to confusion, dizziness, and nausea. Her spouse brought in her prescribed Xanax, Ambien, and Percocet bottles but has no idea how many she took. It is suspected that her symptoms are due to an overdose of these medications.

T42.4X1A Poisoning by benzodiazepines, accidental (unintentional), initial encounter

T42.6X1A Poisoning by other antiepileptic and sedative-hypnotic drugs, accidental (unintentional), initial encounter

T40.2X1A Poisoning by other opioids, accidental (unintentional), initial encounter

R41.0 Disorientation, unspecified

R42 Dizziness and giddiness

R11.0 Nausea

Explanation: It was not documented whether the overdose of the drugs was accidental or intentional; therefore the correct reporting of the poisoning codes is accidental intent. The poisoning codes are sequenced first, followed by manifestations of the poisoning.

If there is also a diagnosis of abuse or dependence of the substance, the abuse or dependence is assigned as an additional code.

Examples of poisoning include:

- (i) Error was made in drug prescription
Errors made in drug prescription or in the administration of the drug by provider, nurse, patient, or other person.
- (ii) Overdose of a drug intentionally taken
If an overdose of a drug was intentionally taken or administered and resulted in drug toxicity, it would be coded as a poisoning.
- (iii) Nonprescribed drug taken with correctly prescribed and properly administered drug
If a nonprescribed drug or medicinal agent was taken in combination with a correctly prescribed and properly administered drug, any drug toxicity or other reaction resulting from the interaction of the two drugs would be classified as a poisoning.
- (iv) Interaction of drug(s) and alcohol
When a reaction results from the interaction of a drug(s) and alcohol, this would be classified as poisoning.
See Section I.C.4. if poisoning is the result of insulin pump malfunctions.

(c) Underdosing

Underdosing refers to taking less of a medication than is prescribed by a provider or a manufacturer's instruction. Discontinuing the use of a prescribed medication on the patient's own initiative (not directed by the patient's provider) is also classified as an underdosing. For underdosing, assign the code from categories T36-T50 (fifth or sixth character "6").

Codes for underdosing should never be assigned as principal or first-listed codes. If a patient has a relapse or exacerbation of the medical condition for which the drug is prescribed because of the reduction in dose, then the medical condition itself should be coded.

Noncompliance (Z91.12-, Z91.13- and Z91.14-) or complication of care (Y63.6-Y63.9) codes are to be used with an underdosing code to indicate intent, if known.

Patient admitted for atrial fibrillation with history of chronic atrial fibrillation for which she is prescribed amiodarone. Financial concerns have left the patient unable to pay for her prescriptions and she has been skipping her amiodarone dose every other day to offset the cost.

I48.20 Chronic atrial fibrillation, unspecified

T46.2X6A Underdosing of other antidysrhythmic drugs, initial encounter

Z91.120 Patient's intentional underdosing of medication regimen due to financial hardship

Explanation: By skipping her amiodarone pill every other day, the patient's atrial fibrillation returned. The condition for which the drug was being taken is reported first, followed by an underdosing code to show that the patient was not adhering to her prescription regimen. The Z code helps elaborate on the patient's social and/or economic circumstances that led to the patient taking less than what she was prescribed.

(d) Toxic effects

When a harmful substance is ingested or comes in contact with a person, this is classified as a toxic effect. The toxic effect codes are in categories T51-T65.

Toxic effect codes have an associated intent: accidental, intentional self-harm, assault and undetermined.

f. Adult and child abuse, neglect and other maltreatment

Sequence first the appropriate code from categories T74.- (Adult and child abuse, neglect and other maltreatment, confirmed) or T76.- (Adult and child abuse, neglect and other maltreatment, suspected) for abuse, neglect and other maltreatment, followed by any accompanying mental health or injury code(s).

If the documentation in the medical record states abuse or neglect it is coded as confirmed (T74.-). It is coded as suspected if it is documented as suspected (T76.-).

For cases of confirmed abuse or neglect an external cause code from the assault section (X92-Y09) should be added to identify the cause of any physical injuries. A perpetrator code (Y07) should be added when the perpetrator of the abuse is known. For suspected cases of abuse or neglect, do not report external cause or perpetrator code.

If a suspected case of abuse, neglect or mistreatment is ruled out during an encounter code Z04.71, Encounter for examination and observation following alleged physical adult abuse, ruled out, or code Z04.72, Encounter for examination and observation following alleged child physical abuse, ruled out, should be used, not a code from T76.

If a suspected case of alleged rape or sexual abuse is ruled out during an encounter code Z04.41, Encounter for examination and observation following alleged adult rape or code Z04.42, Encounter for examination and observation following alleged child rape, should be used, not a code from T76.

If a suspected case of forced sexual exploitation or forced labor exploitation is ruled out during an encounter, code Z04.81, Encounter for examination and observation of victim following forced sexual exploitation, or code Z04.82, Encounter for examination and observation of victim following forced labor exploitation, should be used, not a code from T76.

See Section I.C.15. Abuse in a pregnant patient.

g. Complications of care

1) General guidelines for complications of care

(a) Documentation of complications of care

See Section I.B.16. for information on documentation of complications of care.

2) Pain due to medical devices

Pain associated with devices, implants or grafts left in a surgical site (for example painful hip prosthesis) is assigned to the appropriate code(s) found in Chapter 19, Injury, poisoning, and certain other consequences of external causes. Specific codes for pain due to medical devices are found in the T code section of the ICD-10-CM. Use additional code(s) from category G89 to identify acute or chronic pain due to presence of the device, implant or graft (G89.18 or G89.28).

Chronic left breast pain secondary to breast implant

T85.848A Pain due to other internal prosthetic devices, implants and grafts, initial encounter

N64.4 Mastodynia

G89.28 Other chronic postprocedural pain

Explanation: As the pain is a complication related to the breast implant, the complication code is sequenced first. The T code does not describe the site or type of pain, so additional codes may be appended to indicate that the patient is experiencing chronic pain in the breast.

3) Transplant complications

(a) Transplant complications other than kidney

Codes under category T86, Complications of transplanted organs and tissues, are for use for both complications and rejection of transplanted organs. A transplant complication code is only assigned if the complication affects the function of the transplanted organ. Two codes are required to fully describe a transplant complication: the appropriate code from category T86 and a secondary code that identifies the complication.

Pre-existing conditions or conditions that develop after the transplant are not coded as complications unless they affect the function of the transplanted organs.

See I.C.21. for transplant organ removal status

See I.C.2. for malignant neoplasm associated with transplanted organ.

(b) Kidney transplant complications

Patients who have undergone kidney transplant may still have some form of chronic kidney disease (CKD) because the kidney transplant may not fully restore kidney function. Code T86.1- should be assigned for documented complications of a kidney transplant, such as transplant failure or rejection or other transplant complication. Code T86.1- should not be assigned for post kidney transplant patients who have chronic kidney (CKD) unless a transplant complication such as transplant failure or rejection is documented. If the documentation is unclear as to whether the patient has a complication of the transplant, query the provider.

Conditions that affect the function of the transplanted kidney, other than CKD, should be assigned a code from subcategory T86.1, Complications of transplanted organ, Kidney, and a secondary code that identifies the complication.

For patients with CKD following a kidney transplant, but who do not have a complication such as failure or rejection, *see section I.C.14. Chronic kidney disease and kidney transplant status.*

Patient with chronic kidney disease stage 2; history of successful kidney transplant with no complications identified

N18.2 Chronic kidney disease, stage 2 (mild)

Z94.0 Kidney transplant status

Explanation: This patient's stage 2 CKD is not indicated as being due to the transplanted kidney but instead is just the residual disease the patient had prior to the transplant.

4) Complication codes that include the external cause

As with certain other T codes, some of the complications of care codes have the external cause included in the code. The code includes the nature of the complication as well as the type of procedure that caused the complication. No external cause code indicating the type of procedure is necessary for these codes.

5) Complications of care codes within the body system chapters

Intraoperative and postprocedural complication codes are found within the body system chapters with codes specific to the organs and structures of that body system. These codes should be sequenced first, followed by a code(s) for the specific complication, if applicable.

Complication codes from the body system chapters should be assigned for intraoperative and postprocedural complications (e.g., the appropriate complication code from chapter 9 would be assigned for a vascular intraoperative or postprocedural complication) unless the complication is specifically indexed to a T code in chapter 19.

During a spinal fusion procedure, the surgeon inadvertently punctured the dura. The midline durotomy was repaired, and the fusion procedure was completed.

G97.41 Accidental puncture or laceration of dura during a procedure

Explanation: The accidental durotomy is not coded to an injury code in chapter 19 but instead is categorized to the nervous system chapter.

Muscle/Tendon Table

ICD-10-CM categorizes certain muscles and tendons in the upper and lower extremities by their action (e.g., extension, flexion), their anatomical location (e.g., posterior, anterior), and/or whether they are intrinsic or extrinsic to a certain anatomical area. The Muscle/Tendon Table is provided at the beginning of chapters 13 and 19 as a resource to help users when code selection depends on one or more of these characteristics. Please note that this table is not all-inclusive, and proper code assignment should be based on the provider's documentation.

Chapter 19. Injury, Poisoning and Certain Other Consequences of External Causes (S00-T88)

NOTE

Use secondary code(s) from Chapter 20, External causes of morbidity, to indicate cause of injury. Codes within the T section that include the external cause do not require an additional external cause code.

Use additional code to identify any retained foreign body, if applicable (Z18.-)

EXCLUDES 1

birth trauma (P10-P15)
obstetric trauma (O70-O71)

NOTE

The chapter uses the S-section for coding different types of injuries related to single body regions and the T-section to cover injuries to unspecified body regions as well as poisoning and certain other consequences of external causes.

AHA: 2016, 20.3.7; 2015, 40.35-38; 2015, 30.37-39.40; 2015, 20.6; 2015, 10.3.21

TIP: The specific site of an injury can be determined from the radiology report when authenticated by a radiologist and available at the time of code assignment.

This chapter contains the following blocks:

S00-S09	Injuries to the head
S10-S19	Injuries to the neck
S20-S29	Injuries to the thorax
S30-S39	Injuries to the abdomen, lower back, lumbar spine, pelvis and external genitals
S40-S49	Injuries to the shoulder and upper arm
S50-S59	Injuries to the elbow and forearm
S60-S69	Injuries to the wrist, hand and fingers
S70-S79	Injuries to the hip and thigh
S80-S89	Injuries to the knee and lower leg
S90-S99	Injuries to the ankle and foot
T07	Injuries involving multiple body regions
T14	Injury of unspecified body region
T15-T19	Effects of foreign body entering through natural orifice
T20-T25	Burns and corrosions of external body surface, specified by site
T26-T28	Burns and corrosions confined to eye and internal organs
T30-T32	Burns and corrosions of multiple and unspecified body regions
T33-T34	Frostbite
T36-T50	Poisoning by, adverse effect of and underdosing of drugs, medicaments and biological substances
T51-T65	Toxic effects of substances chiefly nonmedicinal as to source
T66-T78	Other and unspecified effects of external causes
T79	Certain early complications of trauma
T80-T88	Complications of surgical and medical care, not elsewhere classified

Injuries to the head (S00-S09)

INCLUDES

injuries of ear
injuries of eye
injuries of face [any part]
injuries of gum
injuries of jaw
injuries of oral cavity
injuries of palate
injuries of periocular area
injuries of scalp

NOTE

Code to highest level of thoracic spinal cord injury.

Injuries to the spinal cord (S24.0 and S24.1) refer to the cord level and not bone level injury, and can affect nerve roots at and below the level given.

Code also any associated:

fracture of thoracic vertebra (S22.0-)

open wound of thorax (S21.-)

transient paralysis (R29.5)

EXCLUDES 2 injury of brachial plexus (S14.3)

The appropriate 7th character is to be added to each code from category S24.

✓ 4th S42 Fracture of shoulder and upper arm**NOTE**

A fracture not indicated as displaced or nondisplaced should be coded to displaced

A fracture not indicated as open or closed should be coded to closed

EXCLUDES 1 traumatic amputation of shoulder and upper arm (S48.-)

AHA: 2018,2Q,12; 2015,3Q,37 39

DEF: Diaphysis: Central shaft of a long bone.

DEF: Epiphysis: Proximal and distal rounded ends of a long bone, communicates with the joint.

DEF: Metaphysis: Section of a long bone located between the epiphysis and diaphysis at the proximal and distal ends.

DEF: Physis (growth plate): Narrow zone of cartilaginous tissue between the epiphysis and metaphysis at each end of a long bone. In childhood, proliferation of cells in this zone lengthens the bone. As the bone matures, this area thins, ossification eventually fusing into solid bone and growth stops. **Synonyms:** Epiphyseal plate.

The appropriate 7th character is to be added to all codes from category S42 (unless otherwise indicated).

✓4th S52 Fracture of forearm

NOTE

A fracture not indicated as displaced or nondisplaced should be coded to displaced.

A fracture not indicated as open or closed should be coded to closed.

The open fracture designations are based on the Gustilo open fracture classification.

EXCLUDES 1 traumatic amputation of forearm (S58.-)

EXCLUDES 2 fracture at wrist and hand level (S62.-)

AHA: 2018,2Q,12; 2016,1Q,33; 2015,3Q,37-39

DEF: Diaphysis: Central shaft of a long bone.

DEF: Epiphysis: Proximal and distal rounded ends of a long bone, communicates with the joint.

DEF: Metaphysis: Section of a long bone located between the epiphysis and diaphysis at the proximal and distal ends.

DEF: Physis (growth plate): Narrow zone of cartilaginous tissue between the epiphysis and metaphysis at each end of a long bone. In childhood, proliferation of cells in this zone lengthens the bone. As the bone matures, this area thins, ossification eventually fusing into solid bone and growth stops. **Synonyms:** Epiphyseal plate.

The appropriate 7th character is to be added to all codes from category S52 [unless otherwise indicated].

NOTE

A fracture not indicated as displaced or nondisplaced should be coded to displaced

A fracture not indicated as open or closed should be coded to closed

EXCLUDES 1 traumatic amputation of wrist and hand (S68.-)

EXCLUDES 2 fracture of distal parts of ulna and radius (S52.-)

AHA: 2018,2Q,12; 2015,3Q,37-39

The appropriate 7th character is to be added to each code from category S62.

- A initial encounter for closed fracture
- B initial encounter for open fracture
- D subsequent encounter for fracture with routine healing
- G subsequent encounter for fracture with delayed healing
- K subsequent encounter for fracture with nonunion

DEF: Diaphysis: Central shaft of a long bone.

DEF: Epiphysis: Proximal and distal rounded ends of a long bone communicates with the joint.

DEF: Metaphysis: Section of a long bone located between the epiphysis and diaphysis at the proximal and distal ends.

DEF: Physis (growth plate): Narrow zone of cartilaginous tissue between the epiphysis and metaphysis at each end of a long bone. In childhood, proliferation of cells in this zone lengthens the bone. As the bone matures, this area thins, ossification eventually fusing into solid bone and growth stops. **Synonyms:** Epiphyseal plate.

✓^{4th} S82 Fracture of lower leg, including ankle

NOTE

A fracture not indicated as displaced or nondisplaced should be coded to displaced

A fracture not indicated as open or closed should be coded to closed

The open fracture designations are based on the Gustilo open fracture classification.

INCLUDES

fracture of malleolus

EXCLUDES 1

traumatic amputation of lower leg (S88.-)

EXCLUDES 2

fracture of foot, except ankle (S92.-)

periprosthetic fracture of prosthetic implant of knee (M97.0-)

AHA: 2018,2Q,12; 2016,1Q,33; 2015,3Q,37-39

DEF: Diaphysis: Central shaft of a long bone.

DEF: Epiphysis: Proximal and distal rounded ends of a long bone, communicates with the joint.

DEF: Metaphysis: Section of a long bone located between the epiphysis and diaphysis at the proximal and distal ends.

DEF: Physis (growth plate): Narrow zone of cartilaginous tissue between the epiphysis and metaphysis at each end of a long bone. In childhood, proliferation of cells in this zone lengthens the bone. As the bone matures, this area thins, ossification eventually fusing into solid bone and growth stops. **Synonyms:** Epiphyseal plate.

The appropriate 7th character is to be added to all codes from category S82 [unless otherwise indicated].

Poisoning by, adverse effects of and underdosing of drugs, medicaments and biological substances (T36-T50)

INCLUDES adverse effect of correct substance properly administered
poisoning by overdose of substance
poisoning by wrong substance given or taken in error
underdosing by (inadvertently) (deliberately) taking less substance than prescribed or instructed

Code first, for adverse effects, the nature of the adverse effect, such as:

adverse effect NOS (T88.7)
aspirin gastritis (K29.-)
blood disorders (D56-D76)
contact dermatitis (L23-L25)
dermatitis due to substances taken internally (L27.-)
nephropathy (N14.0-N14.2)

NOTE The drug giving rise to the adverse effect should be identified by use of codes from categories T36-T50 with fifth or sixth character 5.

Use additional code(s) to specify:

manifestations of poisoning
underdosing or failure in dosage during medical and surgical care (Y63.6, Y63.8-Y63.9)
underdosing of medication regimen (Z91.12-, Z91.13-)

EXCLUDES 1 toxic reaction to local anesthesia in pregnancy (O29.3-)

Toxic effects of substances chiefly nonmedicinal as to source (T51-T65)

NOTE When no intent is indicated code to accidental. Undetermined intent is only for use when there is specific documentation in the record that the intent of the toxic effect cannot be determined.

Use additional code(s) for all associated manifestations of toxic effect, such as: personal history of foreign body fully removed (Z87.821) respiratory conditions due to external agents (J60-J70) to identify any retained foreign body, if applicable (Z18.-)

EXCLUDES 1 contact with and (suspected) exposure to toxic substances (Z77.-)

Chapter 20. External Causes of Morbidity (V00–Y99)

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

The external causes of morbidity codes should never be sequenced as the first-listed or principal diagnosis.

External cause codes are intended to provide data for injury research and evaluation of injury prevention strategies. These codes capture how the injury or health condition happened (cause), the intent (unintentional or accidental; or intentional, such as suicide or assault), the place where the event occurred the activity of the patient at the time of the event, and the person's status (e.g., civilian, military).

There is no national requirement for mandatory ICD-10-CM external cause code reporting. Unless a provider is subject to a state-based external cause code reporting mandate or these codes are required by a particular payer, reporting of ICD-10-CM codes in Chapter 20, External Causes of Morbidity, is not required. In the absence of a mandatory reporting requirement, providers are encouraged to voluntarily report external cause codes, as they provide valuable data for injury research and evaluation of injury prevention strategies.

a. General external cause coding guidelines

1) Used with any code in the range of A00.0–T88.9, Z00–Z99

An external cause code may be used with any code in the range of A00.0–T88.9, Z00–Z99, classification that represents a health condition due to an external cause. Though they are most applicable to injuries, they are also valid for use with such things as infections or diseases due to an external source, and other health conditions, such as a heart attack that occurs during strenuous physical activity.

Actinic reticuloid due to tanning bed use

L57.1 Actinic reticuloid

W89.1XXA Exposure to tanning bed, initial encounter

Explanation: An external cause code may be used with any code in the range of A00.0–T88.9, Z00–Z99, classifications that describe health conditions due to an external cause. Code W89.1 Exposure to tanning bed requires a seventh character of A to report this initial encounter, with a placeholder X for the fifth and sixth characters.

2) External cause code used for length of treatment

Assign the external cause code, with the appropriate 7th character (initial encounter, subsequent encounter or sequela) for each encounter for which the injury or condition is being treated.

Most categories in chapter 20 have a 7th character requirement for each applicable code. Most categories in this chapter have three 7th character values: A, initial encounter, D, subsequent encounter and S, sequela. While the patient may be seen by a new or different provider over the course of treatment for an injury or condition, assignment of the 7th character for external cause should match the 7th character of the code assigned for the associated injury or condition for the encounter.

3) Use the full range of external cause codes

Use the full range of external cause codes to completely describe the cause, the intent, the place of occurrence, and if applicable, the activity of the patient at the time of the event, and the patient's status, for all injuries, and other health conditions due to an external cause.

4) Assign as many external cause codes as necessary

Assign as many external cause codes as necessary to fully explain each cause. If only one external code can be recorded, assign the code most related to the principal diagnosis.

5) The selection of the appropriate external cause code

The selection of the appropriate external cause code is guided by the Alphabetic Index of External Causes and by Inclusion and Exclusion notes in the Tabular List.

6) External cause code can never be a principal diagnosis

An external cause code can never be a principal (first-listed) diagnosis.

7) Combination external cause codes

Certain of the external cause codes are combination codes that identify sequential events that result in an injury, such as a fall which results in striking against an object. The injury may be due to either event or both.

The combination external cause code used should correspond to the sequence of events regardless of which caused the most serious injury.

Toddler tripped and fell while walking and struck his head on an end table, sustaining a scalp contusion

S00.03XA Contusion of scalp, initial encounter

W01.190A Fall on same level from slipping, tripping and stumbling with subsequent striking against furniture, initial encounter

Explanation: Combination external cause codes identify sequential events that result in an injury, such as a fall resulting in striking against an object. The injury may be due to either or both events.

8) No external cause code needed in certain circumstances

No external cause code from Chapter 20 is needed if the external cause and intent are included in a code from another chapter (e.g. T36.0X1-Poisoning by penicillins, accidental (unintentional)).

b. Place of occurrence guideline

Codes from category Y92, Place of occurrence of the external cause, are secondary codes for use after other external cause codes to identify the location of the patient at the time of injury or other condition.

Generally, a place of occurrence code is assigned only once, at the initial encounter for treatment. However, in the rare instance that a new injury occurs during hospitalization, an additional place of occurrence code may be assigned. No 7th characters are used for Y92.

Do not use place of occurrence code Y92.9 if the place is not stated or is not applicable.

A farmer was working in his barn and sustained a foot contusion when the horse stepped on his left foot

S90.32XA Contusion of left foot, initial encounter

W55.19XA Other contact with horse, initial encounter

Y92.71 Barn as the place of occurrence of the external cause

Explanation: A place-of-occurrence code from category Y92 is assigned at the initial encounter to identify the location of the patient at the time the injury occurred.

c. Activity code

Assign a code from category Y93, Activity code, to describe the activity of the patient at the time the injury or other health condition occurred.

An activity code is used only once, at the initial encounter for treatment. Only one code from Y93 should be recorded on a medical record.

The activity codes are not applicable to poisonings, adverse effects, misadventures or sequela.

Do not assign Y93.9, Unspecified activity, if the activity is not stated.

A code from category Y93 is appropriate for use with external cause and intent codes if identifying the activity provides additional information about the event.

Ranch hand who was grooming a horse sustained a foot contusion when the horse stepped on his left foot

S90.32XA Contusion of left foot, initial encounter

W55.19XA Other contact with horse, initial encounter

Y93.K3 Activity, grooming and shearing an animal

Explanation: One activity code from category Y93 is assigned at the initial encounter only to describe the activity of the patient at the time the injury occurred.

d. Place of occurrence, activity, and status codes used with other external cause code

When applicable, place of occurrence, activity, and external cause status codes are sequenced after the main external cause code(s). Regardless of the number of external cause codes assigned, generally there should be only one place of occurrence code, one activity code, and one external cause status code assigned to an encounter. However, in the rare instance that a new injury occurs during hospitalization, an additional place of occurrence code may be assigned.

e. If the reporting format limits the number of external cause codes

If the reporting format limits the number of external cause codes that can be used in reporting clinical data, report the code for the cause/intent most related to the principal diagnosis. If the format permits capture of additional external cause codes, the cause/intent, including medical misadventures, of the additional events should be reported rather than the codes for place, activity, or external status.

f. Multiple external cause coding guidelines

More than one external cause code is required to fully describe the external cause of an illness or injury. The assignment of external cause codes should be sequenced in the following priority:

If two or more events cause separate injuries, an external cause code should be assigned for each cause. The first-listed external cause code will be selected in the following order:

External codes for child and adult abuse take priority over all other external cause codes.

See Section I.C.19., *Child and Adult abuse guidelines*.

External cause codes for terrorism events take priority over all other external cause codes except child and adult abuse.

External cause codes for cataclysmic events take priority over all other external cause codes except child and adult abuse and terrorism.

External cause codes for transport accidents take priority over all other external cause codes except cataclysmic events, child and adult abuse and terrorism.

Activity and external cause status codes are assigned following all causal (intent) external cause codes.

The first-listed external cause code should correspond to the cause of the most serious diagnosis due to an assault, accident, or self-harm, following the order of hierarchy listed above..

30-year-old man accidentally discharged his hunting rifle, sustaining an open gunshot wound to the right thigh, which caused him to fall down the stairs, resulting in closed displaced comminuted fracture of his left radial shaft

S71.131A	Puncture wound without foreign body, right thigh, initial encounter
W33.02XA	Accidental discharge of hunting rifle, initial encounter
S52.352A	Displaced comminuted fracture of shaft of radius, left arm, initial encounter for closed fracture
W10.9XXA	Fall (on) (from) unspecified stairs and steps, initial encounter

Explanation: If two or more events cause separate injuries, an external cause code should be assigned for each cause.

g. Child and adult abuse guideline

Adult and child abuse, neglect and maltreatment are classified as assault. Any of the assault codes may be used to indicate the external cause of any injury resulting from the confirmed abuse.

For confirmed cases of abuse, neglect and maltreatment, when the perpetrator is known, a code from Y07, Perpetrator of maltreatment and neglect, should accompany any other assault codes.

See Section I.C.19. *Adult and child abuse, neglect and other maltreatment*

h. Unknown or undetermined intent guideline

If the intent (accident, self-harm, assault) of the cause of an injury or other condition is unknown or unspecified, code the intent as accidental intent. All transport accident categories assume accidental intent.

1) Use of undetermined intent

External cause codes for events of undetermined intent are only for use if the documentation in the record specifies that the intent cannot be determined.

i. Sequelae (late effects) of external cause guidelines**1) Sequelae external cause codes**

Sequela are reported using the external cause code with the 7th character "S" for sequela. These codes should be used with any report of a late effect or sequela resulting from a previous injury.

See Section I.B.10 *Sequela (Late Effects)*

2) Sequela external cause code with a related current injury

A sequela external cause code should never be used with a related current nature of injury code.

3) Use of sequela external cause codes for subsequent visits

Use a late effect external cause code for subsequent visits when a late effect of the initial injury is being treated. Do not use a late effect external cause code for subsequent visits for follow-up care (e.g., to assess healing, to receive rehabilitative therapy) of the injury when no late effect of the injury has been documented.

j. Terrorism guidelines**1) Cause of injury identified by the Federal Government (FBI) as terrorism**

When the cause of an injury is identified by the Federal Government (FBI) as terrorism, the first-listed external cause code should be a code from category Y38, Terrorism. The definition of terrorism employed by the FBI is found at the inclusion note at the beginning of category Y38. Use additional code for place of occurrence (Y92.-). More than one Y38 code may be assigned if the injury is the result of more than one mechanism of terrorism.

2) Cause of an injury is suspected to be the result of terrorism

When the cause of an injury is suspected to be the result of terrorism a code from category Y38 should not be assigned. Suspected cases should be classified as assault.

3) Code Y38.9, Terrorism, secondary effects

Assign code Y38.9, Terrorism, secondary effects, for conditions occurring subsequent to the terrorist event. This code should not be assigned for conditions that are due to the initial terrorist act.

It is acceptable to assign code Y38.9 with another code from Y38 if there is an injury due to the initial terrorist event and an injury that is a subsequent result of the terrorist event.

k. External cause status

A code from category Y99, External cause status, should be assigned whenever any other external cause code is assigned for an encounter, including an Activity code, except for the events noted below. Assign a code from category Y99, External cause status, to indicate the work status of the person at the time the event occurred. The status code indicates whether the event occurred during military activity, whether a non-military person was at work, whether an individual including a student or volunteer was involved in a non-work activity at the time of the causal event.

A code from Y99, External cause status, should be assigned, when applicable, with other external cause codes, such as transport accidents and falls. The external cause status codes are not applicable to poisonings, adverse effects, misadventures or late effects.

Do not assign a code from category Y99 if no other external cause codes (cause, activity) are applicable for the encounter.

An external cause status code is used only once, at the initial encounter for treatment. Only one code from Y99 should be recorded on a medical record.

Do not assign code Y99.9, Unspecified external cause status, if the status is not stated.

Chapter 20. External Causes of Morbidity (V00-Y99)**NOTE**

This chapter permits the classification of environmental events and circumstances as the cause of injury, and other adverse effects. Where a code from this section is applicable, it is intended that it shall be used secondary to a code from another chapter of the Classification indicating the nature of the condition. Most often, the condition will be classifiable to Chapter 19, Injury, poisoning and certain other consequences of external causes (S00-T88). Other conditions that may be stated to be due to external causes are classified in Chapters I to XVIII. For these conditions, codes from Chapter 20 should be used to provide additional information as to the cause of the condition.

ACCIDENTS (V00-X58)

AHA: 2018,2Q,7-8

Transport accidents (V00-V99)**NOTE**

This section is structured in 12 groups. Those relating to land transport accidents (V00-V89) reflect the victim's mode of transport and are subdivided to identify the victim's 'counterpart' or the type of event. The vehicle of which the injured person is an occupant is identified in the first two characters since it is seen as the most important factor to identify for prevention purposes. A transport accident is one in which the vehicle involved must be moving or running or in use for transport purposes at the time of the accident.

Use additional code to identify:

- airbag injury (W22.1)
- type of street or road (Y92.4-)
- use of cellular telephone and other electronic equipment at the time of the transport accident (Y93.C-)

EXCLUDES 1

- agricultural vehicles in stationary use or maintenance (W31.-)
- assault by crashing of motor vehicle (Y03.-)
- automobile or motor cycle in stationary use or maintenance — code to type of accident
- crashing of motor vehicle, undetermined intent (Y32)
- intentional self-harm by crashing of motor vehicle (X82)
- transport accidents due to cataclysm (X34-X38)

EXCLUDES 2**NOTE**

Definitions related to transport accidents:

- (a) A transport accident (V00-V99) is any accident involving a device designed primarily for, or used at the time primarily for, conveying persons or good from one place to another.

- (b) A public highway [trafficway] or street is the entire width between property lines (or other boundary lines) of land open to the public as a matter of right or custom for purposes of moving persons or property from one place to another. A roadway is that part of the public highway designed, improved and customarily used for vehicular traffic.
- (c) A traffic accident is any vehicle accident occurring on the public highway [i.e. originating on, terminating on, or involving a vehicle partially on the highway]. A vehicle accident is assumed to have occurred on the public highway unless another place is specified, except in the case of accidents involving only off-road motor vehicles, which are classified as nontraffic accidents unless the contrary is stated.
- (d) A nontraffic accident is any vehicle accident that occurs entirely in any place other than a public highway.
- (e) A pedestrian is any person involved in an accident who was not at the time of the accident riding in or on a motor vehicle, railway train, streetcar or animal-drawn or other vehicle, or on a pedal cycle or animal. This includes, a person changing a tire, working on a parked car, or a person on foot. It also includes the user of a pedestrian conveyance such as a baby stroller, ice-skates, skis, sled, roller skates, a skateboard, nonmotorized or motorized wheelchair, motorized mobility scooter, or nonmotorized scooter.
- (f) A driver is an occupant of a transport vehicle who is operating or intending to operate it.
- (g) A passenger is any occupant of a transport vehicle other than the driver, except a person traveling on the outside of the vehicle.
- (h) A person on the outside of a vehicle is any person being transported by a vehicle but not occupying the space normally reserved for the driver or passengers, or the space intended for the transport of property. This includes a person travelling on the bodywork, bumper, fender, roof, running board or step of a vehicle, as well as, hanging on the outside of the vehicle.
- (i) A pedal cycle is any land transport vehicle operated solely by nonmotorized pedals including a bicycle or tricycle.
- (j) A pedal cyclist is any person riding a pedal cycle or in a sidecar or trailer attached to a pedal cycle.
- (k) A motorcycle is a two-wheeled motor vehicle with one or two riding saddles and sometimes with a third wheel for the support of a sidecar. The sidecar is considered part of the motorcycle. This includes a moped, motor scooter, or motorized bicycle.
- (l) A motorcycle rider is any person riding a motorcycle or in a sidecar or trailer attached to the motorcycle.
- (m) A three-wheeled motor vehicle is a motorized tricycle designed primarily for on-road use. This includes a motor-driven tricycle, a motorized rickshaw, or a three-wheeled motor car.
- (n) A car [automobile] is a four-wheeled motor vehicle designed primarily for carrying up to 7 persons. A trailer being towed by the car is considered part of the car. It does not include a van or minivan — see definition (o).
- (o) A pick-up truck or van is a four or six-wheeled motor vehicle designed for carrying passengers as well as property or cargo weighing less than the local limit for classification as a heavy goods vehicle, and not requiring a special driver's license. This includes a minivan and a sport-utility vehicle (SUV).
- (p) A heavy transport vehicle is a motor vehicle designed primarily for carrying property, meeting local criteria for classification as a heavy goods vehicle in terms of weight and requiring a special driver's license.
- (q) A bus (coach) is a motor vehicle designed or adapted primarily for carrying more than 10 passengers, and requiring a special driver's license.
- (r) A railway train or railway vehicle is any device, with or without freight or passenger cars couple to it, designed for traffic on a railway track. This includes subterranean (subways) or elevated trains.
- (s) A streetcar, is a device designed and used primarily for transporting passengers within a municipality, running on rails, usually subject to normal traffic control signals, and operated principally on a right-of-way that forms part of the roadway. This includes a tram or trolley that runs on rails. A trailer being towed by a streetcar is considered part of the streetcar.
- (t) A special vehicle mainly used on industrial premises is a motor vehicle designed primarily for use within the buildings and premises of industrial or commercial establishments. This includes battery-powered airport passenger vehicles or baggage/mail trucks, forklifts, coal-cars in a coal mine, logging cars and trucks used in mines or quarries.
- (u) A special vehicle mainly used in agriculture is a motor vehicle designed specifically for use in farming and agriculture

(horticulture), to work the land, tend and harvest crops and transport materials on the farm. This includes harvesters, farm machinery and tractor and trailers.

- (v) A special construction vehicle is a motor vehicle designed specifically for use on construction and demolition sites. This includes bulldozers, diggers, earth levellers, dump trucks, backhoes, front-end loaders, pavers, and mechanical shovels.
- (w) A special all-terrain vehicle is a motor vehicle of special design to enable it to negotiate over rough or soft terrain, snow or sand. Examples of special design are high construction, special wheels and tires, tracks, and support on a cushion of air. This includes snow mobiles, All-terrain vehicles (ATV), and dune buggies. It does not include passenger vehicle designated as Sport Utility Vehicles. (SUV)
- (x) A watercraft is any device designed for transporting passengers or goods on water. This includes motor or sailboats, ships, and hovercraft.
- (y) An aircraft is any device for transporting passengers or goods in the air. This includes hot-air balloons, gliders, helicopters and airplanes.
- (z) A military vehicle is any motorized vehicle operating on a public roadway owned by the military and being operated by a member of the military.

Pedestrian injured in transport accident (V00-V09)

[INCLUDES] person changing tire on transport vehicle
person examining engine of vehicle broken down in (on side of) road

[EXCLUDES 1] fall due to non-transport collision with other person (W03)
pedestrian on foot falling (slipping) on ice and snow (W00.-)
struck or bumped by another person (W51)

The appropriate 7th character is to be added to each code from categories V00-V09.

A initial encounter
D subsequent encounter
S sequela

V00 Pedestrian conveyance accident

Use additional place of occurrence and activity external cause codes, if known (Y92.-, Y93.-)

[EXCLUDES 1] collision with another person without fall (W51)
fall due to person on foot colliding with another person on foot (W03)
fall from non-moving wheelchair, nonmotorized scooter and motorized mobility scooter without collision (W05.-)
pedestrian (conveyance) collision with other land transport vehicle (V01-V09)
pedestrian on foot falling (slipping) on ice and snow (W00.-)

V00.0 Pedestrian on foot injured in collision with pedestrian conveyance

[7th] V00.01 Pedestrian on foot injured in collision with roller-skater

[7th] V00.02 Pedestrian on foot injured in collision with skateboarder

[6th] V00.03 Pedestrian on foot injured in collision with standing micro-mobility pedestrian conveyance

[7th] V00.031 Pedestrian on foot injured in collision with rider of standing electric scooter

[7th] V00.038 Pedestrian on foot injured in collision with rider of other standing micro-mobility pedestrian conveyance
Pedestrian on foot injured in collision with rider of hoverboard
Pedestrian on foot injured in collision with rider of segway

[7th] V00.09 Pedestrian on foot injured in collision with other pedestrian conveyance

V00.1 Rolling-type pedestrian conveyance accident

[EXCLUDES 1] accident with baby stroller (V00.82-)
accident with motorized mobility scooter (V00.83-)
accident with wheelchair (powered) (V00.81-)

V00.11 In-line roller-skate accident

[7th] V00.111 Fall from in-line roller-skates

[7th] V00.112 In-line roller-skater colliding with stationary object

V00.118 Other in-line roller-skate accident

V00.12 Non-in-line roller-skate accident

[7th] V00.121 Fall from non-in-line roller-skates

[7th] V00.122 Non-in-line roller-skater colliding with stationary object

V00.128 Other non-in-line roller-skating accident

[EXCLUDES 1] roller-skater collision with other land transport vehicle (V01-V09 with 5th character 1)

V00.13 Skateboard accident

[7th] V00.131 Fall from skateboard

[7th] V00.132 Skateboarder colliding with stationary object

V00.138 Other skateboard accident

[EXCLUDES 1] skateboarder collision with other land transport vehicle (V01-V09 with 5th character 2)

V00.14 Scooter (nonmotorized) accident

[EXCLUDES 1] motor scooter accident (V20-V29)

[7th] V00.141 Fall from scooter (nonmotorized)

[7th] V00.142 Scooter (nonmotorized) colliding with stationary object

V00.148 Other scooter (nonmotorized) accident

[EXCLUDES 1] scooter (nonmotorized) collision with other land transport vehicle (V01-V09 with fifth character 9)

V00.15 Heelies accident

Rolling shoe
Wheeled shoe

Derelict house as the place of occurrence of the external cause
- Y92.9** **Unspecified place or not applicable**

✓ 4^A Y93 Activity codes**NOTE**

Category Y93 is provided for use to indicate the activity of the person seeking healthcare for an injury or health condition, such as a heart attack while shoveling snow, which resulted from, or was contributed to, by the activity. These codes are appropriate for use for both acute injuries, such as those from chapter 19, and conditions that are due to the long-term, cumulative effects of an activity, such as those from chapter 13. They are also appropriate for use with external cause codes for cause and intent if identifying the activity provides additional information on the event. These codes should be used in conjunction with codes for external cause status (Y99) and place of occurrence (Y92).

This section contains the following broad activity categories:

- Y93.0** Activities involving walking and running
- Y93.1** Activities involving water and water craft
- Y93.2** Activities involving ice and snow
- Y93.3** Activities involving climbing, rappelling, and jumping off
- Y93.4** Activities involving dancing and other rhythmic movement
- Y93.5** Activities involving other sports and athletics played individually
- Y93.6** Activities involving other sports and athletics played as a team or group
- Y93.7** Activities involving other specified sports and athletics
- Y93.A** Activities involving other cardiorespiratory exercise
- Y93.B** Activities involving other muscle strengthening exercises
- Y93.C** Activities involving computer technology and electronic devices
- Y93.D** Activities involving arts and handcrafts
- Y93.E** Activities involving personal hygiene and interior property and clothing maintenance
- Y93.F** Activities involving caregiving
- Y93.G** Activities involving food preparation, cooking and grilling
- Y93.H** Activities involving exterior property and land maintenance, building and construction
- Y93.I** Activities involving roller coasters and other types of external motion
- Y93.J** Activities involving playing musical instrument
- Y93.K** Activities involving animal care
- Y93.8** Activities, other specified
- Y93.9** Activity, unspecified

✓ 5^A Y93.0 Activities involving walking and running

EXCLUDES 1 activity, walking an animal (Y93.K1)
activity, walking or running on a treadmill (Y93.A1)

Chapter 21. Factors Influencing Health Status and Contact with Health Services (Z00–Z99)

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

Note: The chapter-specific guidelines provide additional information about the use of Z codes for specified encounters.

a. Use of Z Codes in any healthcare setting

Z codes are for use in any healthcare setting. Z codes may be used as either a first-listed (principal diagnosis code in the inpatient setting) or secondary code, depending on the circumstances of the encounter. Certain Z codes may only be used as first-listed or principal diagnosis.

Patient with middle lobe lung cancer admitted for initiation of chemotherapy

Z51.11 Encounter for antineoplastic chemotherapy

C34.2 Malignant neoplasm of middle lobe, bronchus or lung

Explanation: A Z code can be used as first-listed in this situation based on guidelines in this chapter as well as chapter 2, "Neoplasms."

b. Z Codes indicate a reason for an encounter

Z codes are not procedure codes. A corresponding procedure code must accompany a Z code to describe any procedure performed.

c. Categories of Z Codes

1) Contact/exposure

Category Z20 indicates contact with, and suspected exposure to, communicable diseases. These codes are for patients who are suspected to have been exposed to a disease by close personal contact with an infected individual or are in an area where a disease is epidemic.

Category Z77, Other contact with and (suspected) exposures hazardous to health, indicates contact with and suspected exposures hazardous to health.

Contact/exposure codes may be used as a first-listed code to explain an encounter for testing, or, more commonly, as a secondary code to identify a potential risk.

2) Inoculations and vaccinations

Code Z23 is for encounters for inoculations and vaccinations. It indicates that a patient is being seen to receive a prophylactic inoculation against a disease. Procedure codes are required to identify the actual administration of the injection and the type(s) of immunizations given. Code Z23 may be used as a secondary code if the inoculation is given as a routine part of preventive health care, such as a well-baby visit.

3) Status

Status codes indicate that a patient is either a carrier of a disease or has the sequelae or residual of a past disease or condition. This includes such things as the presence of prosthetic or mechanical devices resulting from past treatment. A status code is informative, because the status may affect the course of treatment and its outcome. A status code is distinct from a history code. The history code indicates that the patient no longer has the condition.

A status code should not be used with a diagnosis code from one of the body system chapters, if the diagnosis code includes the information provided by the status code. For example, code Z94.1, Heart transplant status, should not be used with a code from subcategory T86.2, Complications of heart transplant. The status code does not provide additional information. The complication code indicates that the patient is a heart transplant patient.

For encounters for weaning from a mechanical ventilator, assign a code from subcategory J96.1, Chronic respiratory failure, followed by code Z99.11, Dependence on respirator [ventilator] status.

The status Z codes/categories are:

Z14 Genetic carrier

Genetic carrier status indicates that a person carries a gene, associated with a particular disease, which may be passed to offspring who may develop that disease. The person does not have the disease and is not at risk of developing the disease.

Z15 Genetic susceptibility to disease

Genetic susceptibility indicates that a person has a gene that increases the risk of that person developing the disease.

Codes from category Z15 should not be used as principal or first-listed codes. If the patient has the condition to which he/she is susceptible, and that condition is the reason for the encounter, the code for the current condition should be sequenced first. If the patient is being seen for follow-up after completed treatment for this condition, and the condition no longer exists, a follow-up code should be sequenced first, followed by the appropriate personal history and genetic susceptibility codes. If the purpose of the encounter is genetic counseling associated with procreative management, code Z31.5, Encounter for genetic counseling, should be assigned as the first-listed code, followed by a code from category Z15. Additional codes should be assigned for any applicable family or personal history.

Z16 Resistance to antimicrobial drugs

This code indicates that a patient has a condition that is resistant to antimicrobial drug treatment. Sequence the infection code first.

Penicillin resistant streptococcus pneumoniae meningitis

G00.1 Pneumococcal meningitis

Z16.11 Resistance to penicillins

Explanation: The status Z code is used to describe the presence of a drug-resistant organism that most likely altered how the meningitis was treated.

Z17 Estrogen receptor status

Z18 Retained foreign body fragments

Z19 Hormone sensitivity malignancy status

Z21 Asymptomatic HIV infection status

This code indicates that a patient has tested positive for HIV but has manifested no signs or symptoms of the disease.

Z22 Carrier of infectious disease

Carrier status indicates that a person harbors the specific organisms of a disease without manifest symptoms and is capable of transmitting the infection.

Z28.3 Underimmunization status

Z33.1 Pregnant state, incidental

This code is a secondary code only for use when the pregnancy is in no way complicating the reason for visit. Otherwise, a code from the obstetric chapter is required.

Z66 Do not resuscitate

This code may be used when it is documented by the provider that a patient is on do not resuscitate status at any time during the stay.

Z67 Blood type

Z68 Body mass index (BMI)

BMI codes should only be assigned when there is an associated, reportable diagnosis (such as obesity). Do not assign BMI codes during pregnancy.

See Section I.B.14 for BMI documentation by clinicians other than the patient's provider.

Z74.01 Bed confinement status

Z76.82 Awaiting organ transplant status

Z78 Other specified health status

Code Z78.1, Physical restraint status, may be used when it is documented by the provider that a patient has been put in restraints during the current encounter. Please note that this code should not be reported when it is documented by the provider that a patient is temporarily restrained during a procedure.

- Z79** Long-term (current) drug therapy
Codes from this category indicate a patient's continuous use of a prescribed drug (including such things as aspirin therapy) for the long-term treatment of a condition or for prophylactic use. It is not for use for patients who have addictions to drugs. This subcategory is not for use of medications for detoxification or maintenance programs to prevent withdrawal symptoms (e.g., methadone maintenance for opiate dependence). Assign the appropriate code for the drug **use, abuse, or** dependence instead.
Assign a code from Z79 if the patient is receiving a medication for an extended period as a prophylactic measure (such as for the prevention of deep vein thrombosis) or as treatment of a chronic condition (such as arthritis) or a disease requiring a lengthy course of treatment (such as cancer). Do not assign a code from category Z79 for medication being administered for a brief period of time to treat an acute illness or injury (such as a course of antibiotics to treat acute bronchitis).
- Z88** Allergy status to drugs, medicaments and biological substances
Except: Z88.9, Allergy status to unspecified drugs, medicaments and biological substances status
- Z89** Acquired absence of limb
- Z90** Acquired absence of organs, not elsewhere classified
- Z91.0-** Allergy status, other than to drugs and biological substances
- Z92.82** Status post administration of tPA (rtPA) in a different facility within the last 24 hours prior to admission to a current facility
Assign code Z92.82, Status post administration of tPA (rtPA) in a different facility within the last 24 hours prior to admission to current facility, as a secondary diagnosis when a patient is received by transfer into a facility and documentation indicates they were administered tissue plasminogen activator (tPA) within the last 24 hours prior to admission to the current facility.
This guideline applies even if the patient is still receiving the tPA at the time they are received into the current facility.
The appropriate code for the condition for which the tPA was administered (such as cerebrovascular disease or myocardial infarction) should be assigned first.
Code Z92.82 is only applicable to the receiving facility record and not to the transferring facility record.
- Z93** Artificial opening status
- Z94** Transplanted organ and tissue status
- Z95** Presence of cardiac and vascular implants and grafts
- Z96** Presence of other functional implants
- Z97** Presence of other devices
- Z98** Other postprocedural states
Assign code Z98.85, Transplanted organ removal status, to indicate that a transplanted organ has been previously removed. This code should not be assigned for the encounter in which the transplanted organ is removed. The complication necessitating removal of the transplant organ should be assigned for that encounter.
See section I.C19, for information on the coding of organ transplant complications.
- Z99** Dependence on enabling machines and devices, not elsewhere classified
Note: Categories Z89-Z90 and Z93-Z99 are for use only if there are no complications or malfunctions of the organ or tissue replaced, the amputation site or the equipment on which the patient is dependent.

4) History (of)

There are two types of history Z codes, personal and family. Personal history codes explain a patient's past medical condition that no longer exists and is not receiving any treatment, but that has the potential for recurrence, and therefore may require continued monitoring.

Family history codes are for use when a patient has a family member(s) who has had a particular disease that causes the patient to be at higher risk of also contracting the disease.

Personal history codes may be used in conjunction with follow-up codes and family history codes may be used in conjunction with screening codes to explain the need for a test or procedure. History codes are also acceptable on any medical record regardless of the reason for visit. A history of an illness, even if no longer present, is important information that may alter the type of treatment ordered.

The history Z code categories are:

- Z80** Family history of primary malignant neoplasm
- Z81** Family history of mental and behavioral disorders
- Z82** Family history of certain disabilities and chronic diseases (leading to disablement)
- Z83** Family history of other specific disorders
- Z84** Family history of other conditions
- Z85** Personal history of malignant neoplasm
- Z86** Personal history of certain other diseases
- Z87** Personal history of other diseases and conditions
- Z91.4-** Personal history of psychological trauma, not elsewhere classified
- Z91.5** Personal history of self-harm
- Z91.81** History of falling
- Z91.82** Personal history of military deployment
- Z92** Personal history of medical treatment
Except: Z92.0, Personal history of contraception
Except: Z92.82, Status post administration of tPA (rtPA) in a different facility within the last 24 hours prior to admission to a current facility

Patient has chronic lymphocytic leukemia for which the patient had previous chemotherapy and is now in remission

C91.11 Chronic lymphocytic leukemia of B-cell type in remission

Z92.21 Personal history of antineoplastic chemotherapy

Explanation: The personal history Z code is used to describe a secondary (supplementary) diagnosis to identify that this patient has had chemotherapy in the past.

5) Screening

Screening is the testing for disease or disease precursors in seemingly well individuals so that early detection and treatment can be provided for those who test positive for the disease (e.g., screening mammogram).

The testing of a person to rule out or confirm a suspected diagnosis because the patient has some sign or symptom is a diagnostic examination, not a screening. In these cases, the sign or symptom is used to explain the reason for the test.

A screening code may be a first-listed code if the reason for the visit is specifically the screening exam. It may also be used as an additional code if the screening is done during an office visit for other health problems. A screening code is not necessary if the screening is inherent to a routine examination, such as a pap smear done during a routine pelvic examination.

Should a condition be discovered during the screening then the code for the condition may be assigned as an additional diagnosis.

The Z code indicates that a screening exam is planned. A procedure code is required to confirm that the screening was performed.

The screening Z codes/categories:

- Z11** Encounter for screening for infectious and parasitic diseases
- Z12** Encounter for screening for malignant neoplasms
- Z13** Encounter for screening for other diseases and disorders
Except: Z13.9, Encounter for screening, unspecified
- Z36** Encounter for antenatal screening for mother

6) Observation

There are three observation Z code categories. They are for use in very limited circumstances when a person is being observed for a suspected condition that is ruled out. The observation codes are not for use if an injury or illness or any signs or symptoms related to the suspected condition are present. In such cases the diagnosis/symptom code is used with the corresponding external cause code.

The observation codes are **primarily** to be used as a principal/first-listed diagnosis. **An observation code may be assigned as a secondary diagnosis code when the patient is being observed for a condition that is ruled out and is unrelated to the principal/first-listed diagnosis (e.g., patient presents for treatment following injuries sustained in a motor vehicle accident and is also observed for suspected COVID-19 infection that is subsequently ruled out).** Also, when the principal diagnosis is required to be a code from category Z38, Liveborn infants according to place of birth and type of delivery, **then** a code from category Z05, Encounter for observation and evaluation of newborn for suspected diseases and conditions ruled out, is sequenced after the Z38 code. Additional codes may be used in addition to the observation code, but only if they are unrelated to the suspected condition being observed.

Codes from subcategory Z03.7, Encounter for suspected maternal and fetal conditions ruled out, may either be used as a first-listed or as an additional code assignment depending on the case. They are for use in very limited circumstances on a maternal record when an encounter is for a suspected maternal or fetal condition that is ruled out during that encounter (for example, a maternal or fetal condition may be suspected due to an abnormal test result). These codes should not be used when the condition is confirmed. In those cases, the confirmed condition should be coded. In addition, these codes are not for use if an illness or any signs or symptoms related to the suspected condition or problem are present. In such cases the diagnosis/symptom code is used.

Additional codes may be used in addition to the code from subcategory Z03.7, but only if they are unrelated to the suspected condition being evaluated.

Codes from subcategory Z03.7 may not be used for encounters for antenatal screening of mother. See Section I.C.21. Screening.

For encounters for suspected fetal condition that are inconclusive following testing and evaluation, assign the appropriate code from category O35, O36, O40 or O41.

The observation Z code categories:

- Z03 Encounter for medical observation for suspected diseases and conditions ruled out
- Z04 Encounter for examination and observation for other reasons
Except: Z04.9, Encounter for examination and observation for unspecified reason
- Z05 Encounter for observation and evaluation of newborn for suspected diseases and conditions ruled out

Upon initial examination, a heart murmur was heard in a newborn infant delivered vaginally in the hospital; however, after further observation, any serious cardiac conditions were ruled out.

Z38.00 Single liveborn infant, delivered vaginally

Z05.0 Observation and evaluation of newborn for suspected cardiac condition ruled out

Explanation: Normally an observation code is used as the principal diagnosis except when the patient is a newborn. A code from category Z38 Liveborn infants according to place of birth and type of delivery code would be sequenced first, followed by the encounter for observation and evaluation of newborn for suspected diseases and conditions ruled out.

7) Aftercare

Aftercare visit codes cover situations when the initial treatment of a disease has been performed and the patient requires continued care during the healing or recovery phase, or for the long-term consequences of the disease. The aftercare Z code should not be used if treatment is directed at a current, acute disease. The diagnosis code is to be used in these cases. Exceptions to this rule are codes Z51.0, Encounter for antineoplastic radiation therapy, and codes from subcategory Z51.1, Encounter for antineoplastic chemotherapy and immunotherapy. These codes are to be first listed, followed by the diagnosis code when a patient's encounter is solely to receive radiation therapy, chemotherapy, or immunotherapy for the treatment of a neoplasm. If the reason for the encounter is more than one type of antineoplastic therapy, code Z51.0 and a code from subcategory Z51.1 may be assigned together, in which case one of these codes would be reported as a secondary diagnosis.

The aftercare Z codes should also not be used for aftercare for injuries. For aftercare of an injury, assign the acute injury code with the appropriate 7th character (for subsequent encounter).

The aftercare codes are generally first listed to explain the specific reason for the encounter. An aftercare code may be used as an additional code when some type of aftercare is provided in addition to the reason for admission and no diagnosis code is applicable. An example of this would be the closure of a colostomy during an encounter for treatment of another condition.

Aftercare codes should be used in conjunction with other aftercare codes or diagnosis codes to provide better detail on the specifics of an aftercare encounter visit, unless otherwise directed by the classification. The sequencing of multiple aftercare codes depends on the circumstances of the encounter.

Certain aftercare Z code categories need a secondary diagnosis code to describe the resolving condition or sequelae. For others, the condition is included in the code title.

Additional Z code aftercare category terms include fitting and adjustment, and attention to artificial openings.

Status Z codes may be used with aftercare Z codes to indicate the nature of the aftercare. For example code Z95.1, Presence of aortocoronary bypass graft, may be used with code Z48.812, Encounter for surgical aftercare following surgery on the circulatory system, to indicate the surgery for which the aftercare is being performed. A status code should not be used when the aftercare code indicates the type of status, such as using Z43.0, Encounter for attention to tracheostomy, with Z93.0, Tracheostomy status.

The aftercare Z category/codes:

- Z42 Encounter for plastic and reconstructive surgery following medical procedure or healed injury
- Z43 Encounter for attention to artificial openings
- Z44 Encounter for fitting and adjustment of external prosthetic device
- Z45 Encounter for adjustment and management of implanted device
- Z46 Encounter for fitting and adjustment of other devices
- Z47 Orthopedic aftercare
- Z48 Encounter for other postprocedural aftercare
- Z49 Encounter for care involving renal dialysis
- Z51 Encounter for other aftercare and medical care

8) Follow-up

The follow-up codes are used to explain continuing surveillance following completed treatment of a disease, condition, or injury. They imply that the condition has been fully treated and no longer exists. They should not be confused with aftercare codes, or injury codes with a 7th character for subsequent encounter, that explain ongoing care of a healing condition or its sequelae. Follow-up codes may be used in conjunction with history codes to provide the full picture of the healed condition and its treatment. The follow-up code is sequenced first, followed by the history code.

A follow-up code may be used to explain multiple visits. Should a condition be found to have recurred on the follow-up visit, then the diagnosis code for the condition should be assigned in place of the follow-up code.

The follow-up Z code categories:

- Z08 Encounter for follow-up examination after completed treatment for malignant neoplasm
- Z09 Encounter for follow-up examination after completed treatment for conditions other than malignant neoplasm
- Z39 Encounter for maternal postpartum care and examination

9) Donor

Codes in category Z52, Donors of organs and tissues, are used for living individuals who are donating blood or other body tissue. These codes are only for individuals donating for others, not for self-donations. They are not used to identify cadaveric donations.

10) Counseling

Counseling Z codes are used when a patient or family member receives assistance in the aftermath of an illness or injury, or when support is required in coping with family or social problems.

The counseling Z codes/categories:

- Z30.0- Encounter for general counseling and advice on contraception
- Z31.5 Encounter for procreative genetic counseling
- Z31.6- Encounter for general counseling and advice on procreation
- Z32.2 Encounter for childbirth instruction
- Z32.3 Encounter for childcare instruction
- Z69 Encounter for mental health services for victim and perpetrator of abuse
- Z70 Counseling related to sexual attitude, behavior and orientation
- Z71 Persons encountering health services for other counseling and medical advice, not elsewhere classified

Note: Code Z71.84, Encounter for health counseling related to travel, is to be used for health risk and safety counseling for future travel purposes.

Z76.81 Expectant mother prebirth pediatrician visit

11) Encounters for obstetrical and reproductive services

See Section I.C.15. Pregnancy, Childbirth, and the Puerperium, for further instruction on the use of these codes.

Z codes for pregnancy are for use in those circumstances when none of the problems or complications included in the codes from the Obstetrics chapter exist (a routine prenatal visit or postpartum care). Codes in category Z34, Encounter for supervision of normal pregnancy, are always first listed and are not to be used with any other code from the OB chapter.

Codes in category Z3A, Weeks of gestation, may be assigned to provide additional information about the pregnancy. Category Z3A codes should not be assigned for pregnancies with abortive outcomes (categories O00-O08), elective termination of pregnancy (code Z33.2), nor for postpartum conditions, as category Z3A is not applicable to these conditions. The date of the admission should be used to determine weeks of gestation for inpatient admissions that encompass more than one gestational week.

The outcome of delivery, category Z37, should be included on all maternal delivery records. It is always a secondary code. Codes in category Z37 should not be used on the newborn record.

Z codes for family planning (contraceptive) or procreative management and counseling should be included on an obstetric record either during the pregnancy or the postpartum stage, if applicable.

Z codes/categories for obstetrical and reproductive services:

- Z30 Encounter for contraceptive management
- Z31 Encounter for procreative management
- Z32.2 Encounter for childbirth instruction
- Z32.3 Encounter for childcare instruction
- Z33 Pregnant state
- Z34 Encounter for supervision of normal pregnancy
- Z36 Encounter for antenatal screening of mother
- Z3A Weeks of gestation
- Z37 Outcome of delivery
- Z39 Encounter for maternal postpartum care and examination
- Z76.81 Expectant mother prebirth pediatrician visit

12) Newborns and infants

See Section I.C.16, *Newborn (Perinatal) Guidelines*, for further instruction on the use of these codes.

Newborn Z codes/categories:

- Z76.1 Encounter for health supervision and care of foundling
- Z00.1- Encounter for routine child health examination
- Z38 Liveborn infants according to place of birth and type of delivery

13) Routine and administrative examinations

The Z codes allow for the description of encounters for routine examinations, such as, a general check-up, or, examinations for administrative purposes, such as, a pre-employment physical. The codes are not to be used if the examination is for diagnosis of a suspected condition or for treatment purposes. In such cases the diagnosis code is used. During a routine exam, should a diagnosis or condition be discovered, it should be coded as an additional code. Pre-existing and chronic conditions and history codes may also be included as additional codes as long as the examination is for administrative purposes and not focused on any particular condition.

Some of the codes for routine health examinations distinguish between "with" and "without" abnormal findings. Code assignment depends on the information that is known at the time the encounter is being coded. For example, if no abnormal findings were found during the examination, but the encounter is being coded before test results are back, it is acceptable to assign the code for "without abnormal findings." When assigning a code for "with abnormal findings," additional code(s) should be assigned to identify the specific abnormal finding(s).

Pre-operative examination and pre-procedural laboratory examination Z codes are for use only in those situations when a patient is being cleared for a procedure or surgery and no treatment is given.

The Z codes/categories for routine and administrative examinations:

- Z00 Encounter for general examination without complaint, suspected or reported diagnosis
- Z01 Encounter for other special examination without complaint, suspected or reported diagnosis
- Z02 Encounter for administrative examination
 - Except: Z02.9, Encounter for administrative examinations, unspecified
- Z32.0- Encounter for pregnancy test

14) Miscellaneous Z codes

The miscellaneous Z codes capture a number of other health care encounters that do not fall into one of the other categories. Certain of these codes identify the reason for the encounter; others are for use as additional codes that provide useful information on circumstances that may affect a patient's care and treatment.

Prophylactic organ removal

For encounters specifically for prophylactic removal of an organ (such as prophylactic removal of breasts due to a genetic susceptibility to cancer or a family history of cancer), the principal or first-listed code should be a code from category Z40, Encounter for prophylactic surgery, followed by the appropriate codes to identify the associated risk factor (such as genetic susceptibility or family history).

If the patient has a malignancy of one site and is having prophylactic removal at another site to prevent either a new primary malignancy or metastatic disease, a code for the malignancy should also be assigned in addition to a code from subcategory Z40.0, Encounter for prophylactic surgery for risk factors related to malignant neoplasms. A Z40.0 code should not be assigned if the patient is having organ removal for treatment of a malignancy, such as the removal of the testes for the treatment of prostate cancer.

Female patient with cancer in lower inner quadrant of right breast and positive BRCA 1 noted on testing is admitted for mastectomy of right breast and prophylactic removal of left breast

C50.311 Malignant neoplasm of lower-inner quadrant of right female breast

Z40.01 Encounter for prophylactic removal of breast

Z15.01 Genetic susceptibility to malignant neoplasm of breast

Explanation: Removal of the current neoplastic disease in the right breast was the focus of treatment for this admission and is sequenced first. The removal of the left breast was not required to treat a current disease process but as a means of prevention. The two Z codes are informational; they capture the reason behind the removal of what is currently a healthy left breast.

Miscellaneous Z codes/categories:

- Z28 Immunization not carried out
 - Except: Z28.3, Underimmunization status
- Z29 Encounter for other prophylactic measures
- Z40 Encounter for prophylactic surgery
- Z41 Encounter for procedures for purposes other than remedying health state
 - Except: Z41.9, Encounter for procedure for purposes other than remedying health state, unspecified
- Z53 Persons encountering health services for specific procedures and treatment, not carried out
- Z55 Problems related to education and literacy
- Z56 Problems related to employment and unemployment
- Z57 Occupational exposure to risk factors
- Z58 Problems related to physical environment
- Z59 Problems related to housing and economic circumstances
- Z60 Problems related to social environment
- Z62 Problems related to upbringing
- Z63 Other problems related to primary support group, including family circumstances
- Z64 Problems related to certain psychosocial circumstances
- Z65 Problems related to other psychosocial circumstances
- Z72 Problems related to lifestyle
 - Note:** These codes should be assigned only when the documentation specifies that the patient has an associated problem
- Z73 Problems related to life management difficulty
- Z74 Problems related to care provider dependency
 - Except: Z74.01, Bed confinement status
- Z75 Problems related to medical facilities and other health care
- Z76.0 Encounter for issue of repeat prescription
- Z76.3 Healthy person accompanying sick person
- Z76.4 Other boarder to healthcare facility
- Z76.5 Malingering [conscious simulation]
- Z91.1- Patient's noncompliance with medical treatment and regimen
- Z91.83 Wandering in diseases classified elsewhere
- Z91.84- Oral health risk factors
- Z91.89 Other specified personal risk factors, not elsewhere classified

See Section I.B.14 for Z55-Z65 Persons with potential health hazards related to socioeconomic and psychosocial circumstances, documentation by clinicians other than the patient's provider

15) Nonspecific Z codes

Certain Z codes are so non-specific, or potentially redundant with other codes in the classification, that there can be little justification for their use in the inpatient setting. Their use in the outpatient setting should be limited to those instances when there is no further documentation to permit more precise coding. Otherwise, any sign or symptom or any other reason for visit that is captured in another code should be used.

Nonspecific Z codes/categories:

- Z02.9 Encounter for administrative examinations, unspecified
- Z04.9 Encounter for examination and observation for unspecified reason
- Z13.9 Encounter for screening, unspecified
- Z41.9 Encounter for procedure for purposes other than remedying health state, unspecified
- Z52.9 Donor of unspecified organ or tissue
- Z86.59 Personal history of other mental and behavioral disorders
- Z88.9 Allergy status to unspecified drugs, medicaments and biological substances status
- Z92.0 Personal history of contraception

16) Z codes that may only be principal/first-listed diagnosis

The following Z codes/categories may only be reported as the principal/first-listed diagnosis, except when there are multiple encounters on the same day and the medical records for the encounters are combined:

- Z00 Encounter for general examination without complaint, suspected or reported diagnosis
Except: Z00.6
- Z01 Encounter for other special examination without complaint, suspected or reported diagnosis
- Z02 Encounter for administrative examination

- Z04 Encounter for examination and observation for other reasons
- Z33.2 Encounter for elective termination of pregnancy
- Z31.81 Encounter for male factor infertility in female patient
- Z31.83 Encounter for assisted reproductive fertility procedure cycle
- Z31.84 Encounter for fertility preservation procedure
- Z34 Encounter for supervision of normal pregnancy
- Z39 Encounter for maternal postpartum care and examination
- Z38 Liveborn infants according to place of birth and type of delivery
- Z40 Encounter for prophylactic surgery
- Z42 Encounter for plastic and reconstructive surgery following medical procedure or healed injury
- Z51.0 Encounter for antineoplastic radiation therapy
- Z51.1- Encounter for antineoplastic chemotherapy and immunotherapy
- Z52 Donors of organs and tissues
Except: Z52.9, Donor of unspecified organ or tissue
- Z76.1 Encounter for health supervision and care of foundling
- Z76.2 Encounter for health supervision and care of other healthy infant and child
- Z99.12 Encounter for respirator [ventilator] dependence during power failure

Chapter 21. Factors Influencing Health Status and Contact With Health Services (Z00-Z99)

NOTE

Z codes represent reasons for encounters. A corresponding procedure code must accompany a Z code if a procedure is performed. Categories Z00-Z99 are provided for occasions when circumstances other than a disease, injury or external cause classifiable to categories A00-Y89 are recorded as "diagnoses" or "problems." This can arise in two main ways:

- When a person who may or may not be sick encounters the health services for some specific purpose, such as to receive limited care or service for a current condition, to donate an organ or tissue, to receive prophylactic vaccination (immunization), or to discuss a problem which is in itself not a disease or injury.
- When some circumstance or problem is present which influences the person's health status but is not in itself a current illness or injury.

AHA: 2018,4Q,60-61

This chapter contains the following blocks:

- Z00-Z13 Persons encountering health services for examinations
- Z14-Z15 Genetic carrier and genetic susceptibility to disease
- Z16 Resistance to antimicrobial drugs
- Z17 Estrogen receptor status
- Z18 Retained foreign body fragments
- Z19 Hormone sensitivity malignancy status
- Z20-Z29 Persons with potential health hazards related to communicable diseases
- Z30-Z39 Persons encountering health services in circumstances related to reproduction
- Z40-Z53 Encounters for other specific health care
- Z55-Z65 Persons with potential health hazards related to socioeconomic and psychosocial circumstances
- Z66 Do not resuscitate status
- Z67 Blood type
- Z68 Body mass index (BMI)
- Z69-Z76 Persons encountering health services in other circumstances
- Z77-Z99 Persons with potential health hazards related to family and personal history and certain conditions influencing health status

Persons encountering health services for examinations (Z00-Z13)

NOTE

Nonspecific abnormal findings disclosed at the time of these examinations are classified to categories R70-R94.

EXCLUDES 1 examinations related to pregnancy and reproduction (Z30-Z36, Z39.-)

✓4N Z00 Encounter for general examination without complaint, suspected or reported diagnosis

EXCLUDES 1 encounter for examination for administrative purposes (Z02.-)

EXCLUDES 2 encounter for pre-procedural examinations (Z01.81-) special screening examinations (Z11-Z13)

AHA: 2017,4Q,95

✓5N Z00.0 Encounter for general adult medical examination

Encounter for adult periodic examination (annual) (physical) and any associated laboratory and radiologic examinations

EXCLUDES 1 encounter for examination of sign or symptom — code to sign or symptom
general health check-up of infant or child (Z00.12.-)

Z00.00 Encounter for general adult medical examination without abnormal findings **A**

Encounter for adult health check-up NOS

AHA: 2016,1Q,36

Z00.01 Encounter for general adult medical examination with abnormal findings **A**

Use additional code to identify abnormal findings

AHA: 2016,1Q,35-36

✓5N Z00.1 Encounter for newborn, infant and child health examinations

✓6N Z00.11 Newborn health examination

Health check for child under 29 days old

Use additional code to identify any abnormal findings

EXCLUDES 1 health check for child over 28 days old (Z00.12-)

Z00.110 Health examination for newborn under 8 days old **N**

Health check for newborn under 8 days old

Z00.111 Health examination for newborn 8 to 28 days old **N**

Health check for newborn 8 to 28 days old
Newborn weight check

✓6N

Z00.12 Encounter for routine child health examination

Health check (routine) for child over 28 days old
Immunizations appropriate for age
Routine developmental screening of infant or child
Routine vision and hearing testing

EXCLUDES 1 health check for child under 29 days old (Z00.11-)

health supervision of foundling or other healthy infant or child (Z76.1-Z76.2)
newborn health examination (Z00.11-)

AHA: 2018,4Q,36

Z00.121 Encounter for routine child health examination with abnormal findings **P**

Use additional code to identify abnormal findings

AHA: 2016,1Q,34-35

Z00.129 Encounter for routine child health examination without abnormal findings **P**

Encounter for routine child health examination NOS

AHA: 2016,1Q,34

Z00.2 Encounter for examination for period of rapid growth in childhood **P**

Z00.3 Encounter for examination for adolescent development state **P**

Encounter for puberty development state

Z00.5 Encounter for examination of potential donor of organ and tissue

Z00.6 Encounter for examination for normal comparison and control in clinical research program

Examination of participant or control in clinical research program

✓5N

Z00.7 Encounter for examination for period of delayed growth in childhood

Z00.70 Encounter for examination for period of delayed growth in childhood without abnormal findings **P**

Z00.71 Encounter for examination for period of delayed growth in childhood with abnormal findings **P**

Use additional code to identify abnormal findings

Z00.8 Encounter for other general examination

Encounter for health examination in population surveys

✓4N

Z01 Encounter for other special examination without complaint, suspected or reported diagnosis

INCLUDES routine examination of specific system

NOTE

Codes from category Z01 represent the reason for the encounter. A separate procedure code is required to identify any examinations or procedures performed

EXCLUDES 1

encounter for examination for administrative purposes (Z02.-)
encounter for examination for suspected conditions, proven not to exist (Z03.-)

encounter for laboratory and radiologic examinations as a component of general medical examinations (Z00.0-)
encounter for laboratory, radiologic and imaging examinations for sign(s) and symptom(s) — code to the sign(s) or symptom(s)
screening examinations (Z11-Z13)

✓5N

Z01.0 Encounter for examination of eyes and vision

EXCLUDES 1 examination for driving license (Z02.4)

Z01.00 Encounter for examination of eyes and vision without abnormal findings

Encounter for examination of eyes and vision NOS

Z01.01 Encounter for examination of eyes and vision with abnormal findings

Use additional code to identify abnormal findings

AHA: 2016,4Q,21

- ✓ 6th Z01.02 Encounter for examination of eyes and vision following failed vision screening**
EXCLUDES 1 examination for examination of eyes and vision with abnormal findings (Z01.01)
 examination for examination of eyes and vision without abnormal findings (Z01.00)
 AHA: 2019,4Q,20
- Z01.020 Encounter for examination of eyes and vision following failed vision screening without abnormal findings**
- Z01.021 Encounter for examination of eyes and vision following failed vision screening with abnormal findings**
 Use additional code to identify abnormal findings
- ✓ 6th Z01.1 Encounter for examination of ears and hearing**
- Z01.10 Encounter for examination of ears and hearing without abnormal findings**
 Encounter for examination of ears and hearing NOS
 AHA: 2016,4Q,24
- ✓ 6th Z01.11 Encounter for examination of ears and hearing with abnormal findings**
 AHA: 2016,3Q,17-18
- Z01.110 Encounter for hearing examination following failed hearing screening**
- Z01.118 Encounter for examination of ears and hearing with other abnormal findings**
 Use additional code to identify abnormal findings
- Z01.12 Encounter for hearing conservation and treatment**
- ✓ 6th Z01.2 Encounter for dental examination and cleaning**
- Z01.20 Encounter for dental examination and cleaning without abnormal findings**
 Encounter for dental examination and cleaning NOS
- Z01.21 Encounter for dental examination and cleaning with abnormal findings**
 Use additional code to identify abnormal findings
- ✓ 6th Z01.3 Encounter for examination of blood pressure**
- Z01.30 Encounter for examination of blood pressure without abnormal findings**
 Encounter for examination of blood pressure NOS
- Z01.31 Encounter for examination of blood pressure with abnormal findings**
 Use additional code to identify abnormal findings
- ✓ 6th Z01.4 Encounter for gynecological examination**
EXCLUDES 2 pregnancy examination or test (Z32.0-)
 routine examination for contraceptive maintenance (Z30.4-)
- ✓ 6th Z01.41 Encounter for routine gynecological examination**
 Encounter for general gynecological examination with or without cervical smear
 Encounter for gynecological examination (general) (routine) NOS
 Encounter for pelvic examination (annual) (periodic)
 Use additional code:
 for screening for human papillomavirus, if applicable, (Z11.51)
 for screening vaginal pap smear, if applicable (Z12.72)
 to identify acquired absence of uterus, if applicable (Z90.71-)
EXCLUDES 1 gynecologic examination status-post hysterectomy for malignant condition (Z08)
 screening cervical pap smear not a part of a routine gynecological examination (Z12.4)
- Z01.411 Encounter for gynecological examination (general) (routine) with abnormal findings** ♀
 Use additional code to identify abnormal findings
- Z01.419 Encounter for gynecological examination (general) (routine) without abnormal findings** ♀

- Z01.42 Encounter for cervical smear to confirm findings of recent normal smear following initial abnormal smear** ♀
- ✓ 6th Z01.8 Encounter for other specified special examinations**
- ✓ 6th Z01.81 Encounter for preprocedural examinations**
 Encounter for preoperative examinations
 Encounter for radiological and imaging examinations as part of preprocedural examination
- Z01.810 Encounter for preprocedural cardiovascular examination**
- Z01.811 Encounter for preprocedural respiratory examination**
- Z01.812 Encounter for preprocedural laboratory examination**
 Blood and urine tests prior to treatment or procedure
- Z01.818 Encounter for other preprocedural examination**
 Encounter for preprocedural examination NOS
 Encounter for examinations prior to antineoplastic chemotherapy
- Z01.82 Encounter for allergy testing**
EXCLUDES 1 encounter for antibody response examination (Z01.84)
- Z01.83 Encounter for blood typing**
 Encounter for Rh typing

Chapter 22. Codes for Special Purposes (U00–U85)

This chapter contains the following blocks:

U00–U49 Provisional assignment of new diseases of uncertain etiology or emergency use

Provisional assignment of new diseases of uncertain etiology or emergency use (U00–U49)**✓49 U07 Emergency use of U07**● **U07.0 Vaping-related disorder**

Dabbing related lung damage

Dabbing related lung injury

E-cigarette, or vaping, product use associated lung injury [EVALI]

Electronic cigarette related lung damage

Electronic cigarette related lung injury

Use additional code, to identify manifestations, such as:

abdominal pain (R10.84)

acute respiratory distress syndrome (J80)

diarrhea (R19.7)

drug-induced interstitial lung disorder (J70.4)

lipoid pneumonia (J69.1)

weight loss (R63.4)

DEF: Respiratory illness or injury caused by harmful aerosolized substances and chemicals produced by electronic cigarettes, vapes, e-pipes, and other battery-powered vaping devices. Symptoms may include shortness of breath and fever, while some patients experience severe, sometimes fatal, lung damage.

Synonyms: e-cigarette and vaping product use-associated lung injury, EVALI.

● **U07.1 COVID-19**

MCC

Use additional code to identify pneumonia or other manifestations

EXCLUDES 1 coronavirus infection, unspecified (B34.2)

coronavirus as the cause of diseases classified elsewhere (B97.2-)

pneumonia due to SARS-associated coronavirus (J12.81)

AHA: 2020.2Q.3-13

DEF: First diagnosed in December 2019 in China, coronavirus disease 2019 (COVID-19) is a respiratory infection caused by a newly identified (novel) virus not previously seen in humans, known as severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Symptoms of this lower respiratory illness include fever, dry cough, and tiredness that may progress to include difficulty breathing. Older patients and those with high blood pressure, heart problems, and diabetes are more likely to develop serious symptoms of the illness. **Synonyms:** 2019 novel coronavirus, 2019-nCoV, coronavirus, SARS-CoV-2, Wuhan coronavirus.

TIP: Only a confirmed diagnosis of COVID-19 can be coded to U07.1; a positive COVID-19 test result or documentation by the provider that the disease is confirmed is sufficient.

TIP: Assign for asymptomatic individuals who test positive for COVID-19. Even though asymptomatic, the individual is considered to have the COVID-19 infection due to the positive test result.

TIP: Assign appropriate codes for presenting signs/symptoms associated with COVID-19 (cough, fever, shortness of breath), instead of U07.1, if a definitive diagnosis has not been established.

A09	Infectious gastroenteritis and colitis, unspecified	E46	Unspecified protein-calorie malnutrition
A33	Tetanus neonatorum	E52	Niacin deficiency [pellagra]
A34	Obstetrical tetanus	E54	Ascorbic acid deficiency
A35	Other tetanus	E58	Dietary calcium deficiency
A46	Erysipelas	E59	Dietary selenium deficiency
A55	Chlamydial lymphogranuloma (venereum)	E60	Dietary zinc deficiency
A57	Chancroid	E65	Localized adiposity
A58	Granuloma inguinale	E68	Sequelae of hyperalimentation
A64	Unspecified sexually transmitted disease	F04	Amnesic disorder due to known physiological condition
A65	Nonvenereal syphilis	F05	Delirium due to known physiological condition
A70	Chlamydia psittaci infections	F09	Unspecified mental disorder due to known physiological condition
A78	Q fever	F21	Schizotypal disorder
A86	Unspecified viral encephalitis	F22	Delusional disorders
A89	Unspecified viral infection of central nervous system	F23	Brief psychotic disorder
A90	Dengue fever [classical dengue]	F24	Shared psychotic disorder
A91	Dengue hemorrhagic fever	F28	Other psychotic disorder not due to a substance or known physiological condition
A94	Unspecified arthropod-borne viral fever	F29	Unspecified psychosis not due to a substance or known physiological condition
A99	Unspecified viral hemorrhagic fever	F39	Unspecified mood [affective] disorder
B03	Smallpox	F54	Psychological and behavioral factors associated with disorders or diseases classified elsewhere
B04	Monkeypox	F59	Unspecified behavioral syndromes associated with physiological disturbances and physical factors
B09	Unspecified viral infection characterized by skin and mucous membrane lesions	F66	Other sexual disorders
B20	Human immunodeficiency virus [HIV] disease	F69	Unspecified disorder of adult personality and behavior
B49	Unspecified mycosis	F70	Mild intellectual disabilities
B54	Unspecified malaria	F71	Moderate intellectual disabilities
B59	Pneumocystosis	F72	Severe intellectual disabilities
B64	Unspecified protozoal disease	F73	Profound intellectual disabilities
B72	Dracunculiasis	F78	Other intellectual disabilities
B75	Trichinellosis	F79	Unspecified intellectual disabilities
B79	Trichuriasis	F82	Specific developmental disorder of motor function
B80	Enterobiasis	F88	Other disorders of psychological development
B86	Scabies	F89	Unspecified disorder of psychological development
B89	Unspecified parasitic disease	F99	Mental disorder, not otherwise specified
B91	Sequelae of poliomyelitis	G01	Meningitis in bacterial diseases classified elsewhere
B92	Sequelae of leprosy	G02	Meningitis in other infectious and parasitic diseases classified elsewhere
C01	Malignant neoplasm of base of tongue	G07	Intracranial and intraspinal abscess and granuloma in diseases classified elsewhere
C07	Malignant neoplasm of parotid gland	G08	Intracranial and intraspinal phlebitis and thrombophlebitis
C12	Malignant neoplasm of pyriform sinus	G09	Sequelae of inflammatory diseases of central nervous system
C19	Malignant neoplasm of rectosigmoid junction	G10	Huntington's disease
C20	Malignant neoplasm of rectum	G14	Postpolio syndrome
C23	Malignant neoplasm of gallbladder	G20	Parkinson's disease
C33	Malignant neoplasm of trachea	G26	Extrapyramidal and movement disorders in diseases classified elsewhere
C37	Malignant neoplasm of thymus	G35	Multiple sclerosis
C52	Malignant neoplasm of vagina	G53	Cranial nerve disorders in diseases classified elsewhere
C55	Malignant neoplasm of uterus, part unspecified	G55	Nerve root and plexus compressions in diseases classified elsewhere
C58	Malignant neoplasm of placenta	G59	Mononeuropathy in diseases classified elsewhere
C61	Malignant neoplasm of prostate	G63	Polyneuropathy in diseases classified elsewhere
C73	Malignant neoplasm of thyroid gland	G64	Other disorders of peripheral nervous system
D34	Benign neoplasm of thyroid gland	G92	Toxic encephalopathy
D45	Polycythemia vera	G94	Other disorders of brain in diseases classified elsewhere
D62	Acute posthemorrhagic anemia	H22	Disorders of iris and ciliary body in diseases classified elsewhere
D65	Disseminated intravascular coagulation [defibrination A syndrome]	H28	Cataract in diseases classified elsewhere
D66	Hereditary factor VIII deficiency	H32	Chorioretinal disorders in diseases classified elsewhere
D67	Hereditary factor IX deficiency	H36	Retinal disorders in diseases classified elsewhere
D71	Functional disorders of polymorphonuclear neutrophils	H42	Glaucoma in diseases classified elsewhere
D77	Other disorders of blood and blood-forming organs in diseases classified elsewhere	I00	Rheumatic fever without heart involvement
E02	Subclinical iodine-deficiency hypothyroidism	I10	Essential (primary) hypertension
E15	Nondiabetic hypoglycemic coma	I32	Pericarditis in diseases classified elsewhere
E35	Disorders of endocrine glands in diseases classified elsewhere	I38	Endocarditis, valve unspecified
E40	Kwashiorkor		
E41	Nutritional marasmus		
E42	Marasmic kwashiorkor		
E43	Unspecified severe protein-calorie malnutrition		
E45	Retarded development following protein-calorie malnutrition		

I39	Endocarditis and heart valve disorders in diseases classified elsewhere	N37	Urethral disorders in diseases classified elsewhere
I41	Myocarditis in diseases classified elsewhere	N51	Disorders of male genital organs in diseases classified elsewhere
I43	Cardiomyopathy in diseases classified elsewhere	N62	Hypertrophy of breast
I52	Other heart disorders in diseases classified elsewhere	N72	Inflammatory disease of cervix uteri
I76	Septic arterial embolism	N74	Female pelvic inflammatory disorders in diseases classified elsewhere
I81	Portal vein thrombosis	N86	Erosion and ectropion of cervix uteri
I96	Gangrene, not elsewhere classified	N96	Recurrent pregnancy loss
J00	Acute nasopharyngitis (common cold)	O68	Labor and delivery complicated by abnormality of fetal acid-base balance
J13	Pneumonia due to <i>Streptococcus pneumoniae</i>	O76	Abnormality in fetal heart rate and rhythm complicating labor and delivery
J14	Pneumonia due to <i>Hemophilus influenzae</i>	O80	Encounter for full-term uncomplicated delivery
J17	Pneumonia in diseases classified elsewhere	O82	Encounter for cesarean delivery without indication
J22	Unspecified acute lower respiratory infection	O85	Puerperal sepsis
J36	Peritonsillar abscess	O94	Sequelae of complication of pregnancy, childbirth, and the puerperium
J40	Bronchitis, not specified as acute or chronic	P09	Abnormal findings on neonatal screening
J42	Unspecified chronic bronchitis	P53	Hemorrhagic disease of newborn
J60	Coalworker's pneumoconiosis	P60	Disseminated intravascular coagulation of newborn
J61	Pneumoconiosis due to asbestos and other mineral fibers	P84	Other problems with newborn
J64	Unspecified pneumoconiosis	P90	Convulsions of newborn
J65	Pneumoconiosis associated with tuberculosis	P95	Stillbirth
J80	Acute respiratory distress syndrome	Q02	Microcephaly
J90	Pleural effusion, not elsewhere classified	R05	Cough
J99	Respiratory disorders in diseases classified elsewhere	R12	Heartburn
K23	Disorders of esophagus in diseases classified elsewhere	R17	Unspecified jaundice
K30	Functional dyspepsia	R21	Rash and other nonspecific skin eruption
K36	Other appendicitis	R32	Unspecified urinary incontinence
K37	Unspecified appendicitis	R34	Anuria and oliguria
K67	Disorders of peritoneum in infectious diseases classified elsewhere	R37	Sexual dysfunction, unspecified
K77	Liver disorders in diseases classified elsewhere	R42	Dizziness and giddiness
K87	Disorders of gallbladder, biliary tract and pancreas in diseases classified elsewhere	R52	Pain, unspecified
L00	Staphylococcal scalded skin syndrome	R54	Age-related physical debility
L14	Bullous disorders in diseases classified elsewhere	R55	Syncope and collapse
L22	Diaper dermatitis	R58	Hemorrhage, not elsewhere classified
L26	Exfoliative dermatitis	R61	Generalized hyperhidrosis
L42	Pityriasis rosea	R64	Cachexia
L45	Papulosquamous disorders in diseases classified elsewhere	R69	Illness, unspecified
L52	Erythema nodosum	R75	Inconclusive laboratory evidence of human immunodeficiency virus [HIV]
L54	Erythema in diseases classified elsewhere	R81	Glycosuria
L62	Nail disorders in diseases classified elsewhere	R99	Ill-defined and unknown cause of mortality
L80	Vitiligo	Y09	Assault by unspecified means
L83	Acanthosis nigricans	Y66	Nonadministration of surgical and medical care
L84	Corns and callosities	Y69	Unspecified misadventure during surgical and medical care
L86	Keratoderma in diseases classified elsewhere	Y95	Nosocomial condition
L88	Pyoderma gangrenosum	Z08	Encounter for follow-up examination after completed treatment for malignant neoplasm
L99	Other disorders of skin and subcutaneous tissue in diseases classified elsewhere	Z09	Encounter for follow-up examination after completed treatment for conditions other than malignant neoplasm
N08	Glomerular disorders in diseases classified elsewhere	Z21	Asymptomatic human immunodeficiency virus [HIV] infection status
N10	Acute tubulo-interstitial nephritis	Z23	Encounter for immunization
N12	Tubulo-interstitial nephritis, not specified as acute or chronic	Z66	Do not resuscitate
N16	Renal tubulo-interstitial disorders in diseases classified elsewhere		
N19	Unspecified kidney failure		
N22	Calculus of urinary tract in diseases classified elsewhere		
N23	Unspecified renal colic		
N29	Other disorders of kidney and ureter in diseases classified elsewhere		
N33	Bladder disorders in diseases classified elsewhere		

Appendix B: Pharmacology List 2021

This section enables the coder to quickly review drugs, drug actions, and indications that are often associated with overlooked or undocumented diagnoses. The coder should review the patient's medication record and know what condition the physician is treating with the prescribed medication based on documentation in the medical record. When documentation is lacking, the coder can reference this section to locate the drug, determine the drug action, confirm drug indications, and when necessary query the physician. When applicable, some of the drugs provided in this resource have also been mapped to their appropriate Z code for long-term drug use.

Drug	Z Code	Drug Action/Classification	Indications
Abilify [aripiprazole]		Antipsychotic	Depression, bipolar disorder, schizophrenia, autism symptoms
Acarbose [acarbose]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Accupril [quinapril hydrochloride]		ACE inhibitor	Congestive heart failure; hypertension
Acetaminophen with codeine [acetaminophen/codeine phosphate]	Z79.891	Analgesic, narcotic	Pain, moderate to severe
Actemra [tocilizumab]		Antirheumatic	Rheumatoid arthritis
Actimmune [interferon gamma-1b]	Z79.899	Antineoplastic interferons; antiviral interferons	Chronic granulomatous disease; malignant osteopetrosis
Activella [estradiol/norethindrone acetate]	Z79.890	Estrogen therapy	Menopause symptoms; vaginal and vulvar atrophy; osteoporosis prevention
Actonel [risedronate sodium]	Z79.83	Bisphosphonate	Decrease in bone loss in multiple myeloma patients; Paget's disease; hyperparathyroidism; osteoporosis
Actoplus Met [metformin hydrochloride/pioglitazone hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Actos [pioglitazone hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Aczone [dapsone]		Acne agent, topical	Acne vulgaris
Adalat CC [nifedipine]		Calcium channel blocker	Vasospastic angina; chronic stable angina; hypertension
Adderall XR [amphetamine aspartate and sulfate/dextroamphetamine saccharate and sulfate]		CNS stimulant	Attention deficit hyperactivity disorder (ADHD)
Admelog [insulin lispro]	Z79.4	Insulin	Diabetes mellitus
Advair [fluticasone propionate/salmeterol xinafoate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Prophylaxis and treatment of asthma and COPD
Advil [ibuprofen]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain or fever relief
Afrezza [human insulin recombinant]	Z79.4	Insulin – inhaled	Diabetes mellitus
Aggrastat [tirofiban hydrochloride]	Z79.02	Antiplatelet	Unstable angina; heart attacks
Aggrenox [aspirin/dipyridamole]	Z79.02	Antiplatelet	Lessening of the chance of heart attack or stroke
Aimovig [erenumab-aooe]		Antimigraine	Migraine headache
AirDuo RespiClick [fluticasone propionate/salmeterol xinafoate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Asthma
Aklief [trifarotene]		Acne agent, topical	Acne vulgaris
Aldactone [spironolactone]		Cardiovascular agent; antihypertensive agent; diuretic; electrolytic and renal agent	Severe heart failure; ascites associated with cirrhosis; hypokalemia
Aleve [naproxen sodium]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Reduction of temporary aches and pains
Allegra allergy [fexofenadine hydrochloride]		Antihistamine	Seasonal allergic rhinitis
Allopurinol [allopurinol]		Antigout	Gouty arthritis, renal calculus, hyperuricemia, hyperuricemia secondary to leukemia, hyperuricemia secondary to lymphoma
Alora [estradiol]	Z79.890	Estrogen therapy	Menopause symptoms
Alphagan P [brimonidine tartrate]		Antiglaucoma agent (ophthalmic); antihypertensive, ocular	Open angle glaucoma or another condition in which pressure in the eye is too high (ocular hypertension)
Alprazolam [alprazolam]		Antianxiety; sedative/hypnotic	
Altabax [retapamulin]	Z79.2	Antibiotic, topical	Skin infections
Altace [ramipril]		ACE inhibitor	Congestive heart failure; hypertension
Altavera [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Alvesco [ciclesonide]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Prophylaxis and treatment of asthma

Appendix B: Pharmacology List 2021

ICD-10-CM 2021

Drug	Z Code	Drug Action/Classification	Indications
Alyacen [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Amaryl [glimepiride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Ambien [zolpidem tartrate]		CNS depressant; anxiolytic/sedative/hypnotic	Insomnia
Amikacin [amikacin sulfate]	Z79.2	Antibiotic	Gram-negative bacterial infections such as Pseudomonas, Escherichia coli (E. coli), Proteus, Klebsiella-Enterobacter-Serratia
Amitriptyline HCl [amitriptyline hydrochloride]		Antidepressant	Depression
Amoxicillin [amoxicillin]	Z79.2	Antibiotic	Treatment of infections with a broad spectrum of bactericidal activity against many gram-positive and gram-negative micro-organisms; otitis media, gonorrhea, skin, respiratory, gastrointestinal, and genitourinary infections
Ampicillin [ampicillin sodium]	Z79.2	Antibiotic	Bacterial infections
Ampyra [dalfampridine]		Potassium channel blocker	Improvement in walking in patients with multiple sclerosis
Amrix [cyclobenzaprine hydrochloride]		Muscle relaxant	Adjunct to rest and physical therapy for muscle spasms
Anaprox DS [naproxen sodium]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain, inflammation or fever relief
Anastrozole [anastrozole]	Z79.811	Aromatase inhibitor	Postmenopausal breast cancer
Ancef [cefazolin sodium]	Z79.2	Antibiotic	Respiratory tract infections due to Streptococcus pneumoniae, Klebsiella species, Haemophilus influenzae (H. influenzae), Staphylococcus aureus, and group A beta-hemolytic streptococci; urinary tract infections due to E. coli, Proteus mirabilis, Klebsiella species and some strains of Enterobacter and enterococci; skin and skin structure infections, biliary tract infections, bone and joint infections, genital infections, septicemia, and endocarditis
Androderm [testosterone]	Z79.890	Testosterone therapy – topical	Primary hypogonadism, hypogonadotropic hypogonadism
AndroGel [testosterone]	Z79.890	Testosterone therapy – topical	Primary hypogonadism, hypogonadotropic hypogonadism
Angeliq [drospirenone/estradiol]	Z79.890	Estrogen therapy	Menopause symptoms
Angiomax [bivalirudin]	Z79.01	Anticoagulant	Prevention of blood clots
Antabuse [disulfiram]		Alcohol treatment	Alcoholism
Antineoplastic/chemotherapy	Z79.899	Antineoplastic	Cancer
Apidra [insulin glulisine recombinant]	Z79.4	Insulin	Diabetes mellitus
Aranella [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy; acne
Aranesp [darbepoetin alfa]		Erythropoiesis-stimulating agent (ESA)	Treatment of lower than normal blood cells (anemia) from disorders such as CKD and neoplasms
Argatroban [argatroban]	Z79.01	Anticoagulant	Prophylaxis and treatment of venous thrombosis in thrombocytopenia patients
Aricept [donepezil hydrochloride]		Acetylcholinesterase/cholinesterase inhibitors	Symptoms of mild to moderate Alzheimer's disease; can improve thinking ability in some patients
Arimidex [anastrozole]	Z79.811	Aromatase inhibitor	Postmenopausal breast cancer
Aristospan [triamcinolone hexacetonide]	Z79.52	Corticosteroid	Severe inflammation
Arixtra [fondaparinux sodium]	Z79.01	Anticoagulant	Venous thrombosis and pulmonary embolism
Arnuity Ellipta [fluticasone furoate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Prophylaxis and treatment of asthma
Aromasin [exemestane]	Z79.811	Aromatase inhibitor	Postmenopausal breast cancer
Arthrotec [diclofenac sodium/misoprostol]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)-prostaglandin combo	Treatment of patients with arthritis who may develop stomach ulcers from taking nonsteroidal anti-inflammatory drugs (NSAIDs) alone; used to help relieve some symptoms of arthritis, such as inflammation, swelling, stiffness, and joint pain
Asacol HD [mesalamine]		Anti-inflammatory	Ulcerative colitis
Ashlyn [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Asmanex [mometasone furoate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Prophylaxis and treatment of asthma
Astagraf XL [tacrolimus]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Atelvia [risedronate sodium]	Z79.83	Bisphosphonate	Prevention of thinning of the bones (osteoporosis)

Drug	Z Code	Drug Action/Classification	Indications
Atenolol [atenolol]		Beta blocker	Angina pectoris; hypertension; acute myocardial infarction
Ativan [lorazepam]		Antianxiety; sedative/hypnotic	Anxiety disorder associated with depressive symptoms; controls tension, agitation, irritability, and insomnia
Atripla [efavirenz/emtricitabine/tenofovir disoproxil fumarate]	Z79.899	Antiviral	HIV
Atrovent HFA [ipratropium bromide]		Antiasthmatic/bronchodilator	Chronic bronchitis, emphysema; bronchial asthma
Augmentin [amoxicillin/clavulanate potassium]	Z79.2	Antibiotic	Middle ear, lower respiratory, sinus, skin and skin structures, and urinary tract infections
Avandia [rosiglitazone maleate]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Avapro [irbesartan]		Antihypertensive	Hypertension
Avelox [moxifloxacin hydrochloride]	Z79.2	Antibiotic	Bacterial infections, specifically pneumonia; skin; intra-abdominal; plague; acute sinusitis; acute chronic bronchitis
Aviane-28 [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Avonex [interferon beta-1a]	Z79.899	Antiviral	Treatment of relapsing multiple sclerosis
Axid AR [nizatidine]		Histamine H2-receptor antagonist	Acid/peptic disorder; gastroesophageal reflux; duodenal, gastric, and peptic ulcers
Ayvakit [avapritinib]		Multikinase inhibitor	Unresectable or metastatic gastrointestinal stromal tumor (GIST)
Azactam [aztreonam]	Z79.2	Antibiotic	Severe bacterial infections
Azithromycin [azithromycin]	Z79.2	Antibiotic	Bacterial infections
Bactrim [sulfamethoxazole/trimethoprim]	Z79.2	Antibiotic	Treatment of urinary tract infections, acute otitis media, acute exacerbation of chronic bronchitis, shigellosis, and pneumocystis carinii
Balziva-28 [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Basaglar [insulin glargine]	Z79.4	Insulin	Diabetes mellitus
Bayer [acetylsalicylic acid]	Z79.82	Aspirin	Prophylaxis and treatment of heart attacks, angina or strokes; reduction of fever, pain and inflammation
Beconase AQ [beclomethasone dipropionate monohydrate]	Z79.899	Corticosteroid – intranasal	Perennial and seasonal allergies; vasomotor rhinitis
Bekyree [desogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Betaseron [interferon beta-1b]	Z79.899	Antiviral	Treatment of relapsing multiple sclerosis
Betoptic [betaxolol hydrochloride]		Beta blocker; ophthalmic glaucoma agent	Lowering of intraocular pressure; also used for treatment of ocular hypertension and chronic open-angle glaucoma
Bevyxxa	Z79.01	Anticoagulant	Prophylaxis of venous thromboembolism
Beyaz [drospirenone/ethinyl estradiol/levomefolate calcium]	Z79.3	Contraceptive	Prevention of pregnancy; acne
Biaxin XL [clarithromycin]	Z79.2	Antibiotic	Acid/peptic disorder or ulcer, acute exacerbation chronic bronchitis, human immunodeficiency virus, lower and upper respiratory tract infection, sinus infection, prophylaxis mycobacterium avium complex, pharyngitis, pneumonia, tonsillitis
Bijuva [estradiol/progesterone]	Z79.890	Estrogen/progesterone therapy	Menopausal symptoms
Biltricide [praziquantel]		Antiparasitic	Infections from Schistosoma species and liver flukes
Binosto [alendronate sodium]	Z79.83	Bisphosphonate	Prevention of thinning of the bones (osteoporosis)
Boniva [ibandronate sodium]	Z79.83	Bisphosphonate	Prevention of thinning of the bones (osteoporosis)
Breo Ellipta [fluticasone furoate/vilanterol trifenate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Maintenance treatment of asthma and COPD
Brevicon 28-day [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy; acne
Briellyn [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Brilinta [ticagrelor]	Z79.02	Antiplatelet	Unstable angina; heart attacks; prevention of blood clots
Brisdelle [paroxetine]		Selective serotonin reuptake inhibitor (SSRI)	Vasomotor symptoms related to menopause
Buprenex [buprenorphine hydrochloride]	Z79.891	Analgesic, narcotic	Moderate to severe pain

Appendix B: Pharmacology List 2021

ICD-10-CM 2021

Drug	Z Code	Drug Action/Classification	Indications
Buprenorphine HCl and Naloxone HCl [buprenorphine hydrochloride/naloxone hydrochloride]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Buspirone HCl [buspirone hydrochloride]		Antianxiety	Generalized anxiety disorder
Butorphanol tartrate [butorphanol tartrate]	Z79.891	Analgesic, narcotic	Moderate to severe postsurgical pain
Butrans [buprenorphine]	Z79.891	Analgesic, narcotic	Chronic pain
Byetta [exenatide]	Z79.899	Antidiabetic – noninsulin injectable	Diabetes mellitus
Calan [verapamil hydrochloride]		Calcium channel blocker	Angina pectoris at rest and chronic stable, arrhythmia, atrial fibrillation, atrial flutter, paroxysmal supraventricular tachycardia, ventricular arrhythmia, Hypertension
Caldolor [ibuprofen]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain or fever relief
Cambia [diclofenac potassium]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Migraine headaches
Camila [norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy; menstrual disorders
Caplyta [lumateperone]		Antipsychotic	Schizophrenia
Cardizem CD [diltiazem hydrochloride]		Calcium channel blocker	Chronic stable angina, atrial fibrillation, atrial flutter, hypertension, paroxysmal supraventricular tachycardia
Cardura [doxazosin mesylate]		Antihypertensive	Benign prostatic hyperplasia; hypertension
Catapres [clonidine hydrochloride]		Antihypertensive	Hypertension
Cefprozil [cefprozil]	Z79.2	Antibiotic	Acute exacerbation and chronic bronchitis, lower respiratory tract infection, upper respiratory tract infection, pharyngitis, tonsillitis
Ceftriaxone [ceftriaxone sodium]	Z79.2	Antibiotic	Bacterial infections
Celebrex [celecoxib]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Relief of some symptoms caused by arthritis, such as inflammation, swelling, stiffness, and joint pain
Celestone Soluspan [betamethasone acetate/betamethasone sodium phosphate]	Z79.52	Corticosteroid; antiasthmatic	Asthma; severe inflammation
Celexa [citalopram hydrobromide]		Antidepressant	Depression
Cellcept [mycophenolate mofetil]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Centany [mupirocin]	Z79.2	Antibiotic	Skin infections
Cephalexin [cephalexin]	Z79.2	Antibiotic	Bacterial infections
Chantix [varenicline tartrate]		Smoking cessation aid	Nicotine addiction, smoking
Cimduo [lamivudine/tenofovir disoproxil fumarate]	Z79.899	Antiviral	HIV
Cipro [ciprofloxacin hydrochloride]	Z79.2	Antibiotic	Cystitis, infectious diarrhea, gonorrhea, bone and joint infection, gastrointestinal tract infection, lower and upper respiratory tract infection, sinus infection, urinary tract infection, nosocomial pneumonia, chronic prostatitis
Ciprofloxacin [ciprofloxacin]	Z79.2	Antibiotic	Bacterial infections
Clarithromycin [clarithromycin]	Z79.2	Antibiotic	Skin and respiratory bacterial infections
Claritin [loratadine]		Antihistamine	Seasonal allergic rhinitis; chronic idiopathic urticaria
Cleocin [clindamycin phosphate]	Z79.2	Antibiotic	Bacterial infections
Climara [estradiol]	Z79.890	Estrogen therapy	Osteoporosis prevention and to treat menopausal symptoms; vaginal and vulvar atrophy; hypoestrogenism; ovarian failure
Clindamycin [clindamycin phosphate]	Z79.2	Antibiotic	Bacterial infections
Clonazepam [clonazepam]		Anticonvulsant	Absence, akinetic and myoclonic epilepsy, Lennox-Gastaut syndrome
Clonidine HCl [clonidine hydrochloride]		Antihypertensive	Hypertension
Clopidogrel bisulfate [clopidogrel bisulfate]	Z79.02	Antiplatelet	Unstable angina; heart attacks; prevention of blood clots
Codeine [codeine sulfate]	Z79.891	Analgesic, narcotic	Mild to moderate pain
Cogentin [benztropine mesylate]		Antiparkinsonism	Parkinson's disease
Colace [docusate sodium]		Gastrointestinal agent; laxative, stool softener	Constipation

Drug	Z Code	Drug Action/Classification	Indications
Colocort [hydrocortisone]	Z79.52	Corticosteroid	Inflammation of the colon
CombiPatch [ethinyl estradiol/norethindrone acetate]	Z79.890	Estrogen therapy	Menopause symptoms; vaginal and vulvar atrophy; osteoporosis prevention
Combivent respimat [ipratropium bromide/albuterol sulfate]		Antiasthmatic/bronchodilator	Chronic bronchitis, emphysema; bronchial asthma
Compro [prochlorperazine]		Antiemetic; antipsychotic	Nausea, vomiting, and manic phase of bipolar syndrome or schizophrenia
Conjupri [levamlodipine maleate]		Antihypertensive	Hypertension
Copaxone [glatiramer acetate]		Immunostimulant	Treatment of relapsing multiple sclerosis
Coreg [carvedilol]		Beta blocker	Hypertension; chronic heart failure; left ventricular dysfunction following myocardial infarction
Coreg CR [carvedilol phosphate]		Beta blocker	Hypertension; chronic heart failure; left ventricular dysfunction following myocardial infarction
Cortef [hydrocortisone]	Z79.52	Corticosteroid	Severe inflammation
Cortenema [hydrocortisone]	Z79.52	Corticosteroid	Inflammation of the colon
Cortifoam [hydrocortisone acetate]	Z79.52	Corticosteroid	Colon and rectum inflammation
Cortisone acetate [cortisone acetate]	Z79.52	Corticosteroid	Inflammation
Cortisporin [hydrocortisone acetate/neomycin sulfate/polymyxin B sulfate]		Topical anti-infective, topical steroid	Dermatosis
Cosentyx [secukinumab]	Z79.899	Immunosuppressant	Plaque psoriasis; psoriatic arthritis; ankylosing spondylitis
Coumadin [warfarin sodium]	Z79.01	Anticoagulant	Prophylaxis and treatment of venous thrombosis, treatment of atrial fibrillation with embolization (pulmonary embolism), arrhythmias, myocardial infarction, and stroke prevention
Cozaar [losartan potassium]		Antihypertensive	Hypertension
Crestor [rosuvastatin calcium]		HMG-CoA reductase inhibitor (statin)	Hypercholesterolemia; hyperlipidemia; hyperproteinemia
Crixivan [indinavir sulfate]	Z79.899	Antiviral	HIV, asymptomatic HIV
Cryselle [ethinyl estradiol/norgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Cubicin [daptomycin]	Z79.2	Antibiotic	Bacterial skin infections; Staphylococcus aureus bloodstream infections
Cyclafem [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Cyclessa [desogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Cyclosporine [cyclosporine]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Cyltezo [adalimumab-abdm]	Z79.899	Antirheumatic	Rheumatoid arthritis; juvenile idiopathic arthritis; psoriatic arthritis; Crohn's disease; ulcerative colitis; plaque psoriasis
Cymbalta [duloxetine hydrochloride]		Antidepressant, serotonin and norepinephrine reuptake inhibitor (SNRI)	Major depressive disorder; general anxiety disorder; fibromyalgia; diabetic peripheral neuropathy; chronic musculoskeletal pain
Cytomel [liothyronine sodium]		Thyroid hormone	Hypothyroidism or prevention of euthyroid goiters
Daptomycin [daptomycin]	Z79.2	Antibiotic	Skin and underlying tissue bacterial infections
Dasetta [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Daypro [oxaprozin]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Osteoarthritis and rheumatoid arthritis
Daysee [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Delestrogen [estradiol valerate]	Z79.890	Estrogen therapy	Menopause symptoms
Demerol [meperidine hydrochloride]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Depakote [divalproex sodium]		Anticonvulsant	Bipolar affective disorder; complex absence, complex partial and mixed pattern epilepsy; migraine headache
Depo-Medrol [methylprednisolone acetate]	Z79.52	Corticosteroid	Arthritis; joint disorders
Depo-Provera [medroxyprogesterone acetate]	Z79.3, Z79.890	Antineoplastic; contraceptive; progestin	Amenorrhea; carcinoma, endometrium, adjunct; carcinoma, renal; Prevention of pregnancy; hemorrhage
Depo-SubQ Provera [medroxyprogesterone acetate]	Z79.3	Contraceptive	Prevention of pregnancy; menstrual disorder pain

Drug	Z Code	Drug Action/Classification	Indications
Descovy [emtricitabine/tenofovir alafenamide]	Z79.899	Antiretroviral	HIV
Desogestrel; Ethinyl [desogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Detrol [tolterodine tartrate]		Muscarinic receptor antagonist	Overactive bladders in patients with urinary frequency, urgency, or urge incontinence
Dexamethasone Intensol [dexamethasone]	Z79.52	Corticosteroid	Arthritis; allergic disorders; breathing disorders; lupus
Dexilant [dexlansoprazole]		Proton pump inhibitor	Healing of erosive esophagitis; relieve of heartburn; treatment of non-erosive gastroesophageal reflux disease
DiaBeta [glyburide]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Diclegis [doxylamine succinate/pyridoxine hydrochloride]		Antiemetic	Nausea/vomiting in pregnancy
Difcid [fidaxomicin]	Z79.2	Antibiotic	Clostridium difficile
Diflucan [fluconazole]		Antifungal	Oropharyngeal and esophageal candidiasis and cryptococcal meningitis in AIDS patients
Digoxin [digoxin]		Cardiotonic glycoside	Heart failure, atrial flutter, atrial fibrillation, and supraventricular tachycardia
Dilantin [phenytoin sodium]		Anticonvulsant	Grand mal and psychomotor seizures
Dilaudid [hydromorphone hydrochloride]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Diovan [valsartan]		Antihypertensive	Hypertension
Diskets [methadone hydrochloride]		Opioid agonist	Treatment of opioid addiction
Divigel [estradiol]	Z79.890	Estrogen therapy – topical	Menopause symptoms
Dolophine HCl [methadone hydrochloride]	Z79.891	Analgesic, narcotic; opioid agonist	Pain; treatment of opioid addiction
Doxycycline [doxycycline]	Z79.2	Antibiotic	Bacterial infections; acne
Duavee [bazedoxifene acetate/conjugated estrogens]	Z79.890	Estrogen therapy	Menopause symptoms; osteoporosis prevention
Duetact [glimepiride/pioglitazone hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Duexis [famotidine/ibuprofen]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Symptomatic treatment of osteoarthritis and rheumatoid arthritis; reduce risk of ulcers
Dulera [formoterol fumarate/mometasone furoate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Prophylaxis and treatment of asthma
Duragesic [fentanyl]	Z79.891	Analgesic, narcotic	Chronic pain
Duramorph PF [morphine sulfate]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Durlaza [aspirin]	Z79.82	Aspirin	Prevention of heart attack, stroke, angina
Dynacin [minocycline hydrochloride]	Z79.2	Antibiotic	Severe acne treatment
E.E.S. [erythromycin ethylsuccinate]	Z79.2	Antibiotic	Bacterial infections
Effexor XR [venlafaxine hydrochloride]		Antidepressant, serotonin and norepinephrine reuptake inhibitors (SNRIs)	Major depressive disorder; social anxiety disorder; panic disorder
Effient [prasugrel hydrochloride]	Z79.02	Antiplatelet	Lessening of the chance of heart attack or stroke
Elestrin [estradiol]	Z79.890	Estrogen therapy	Menopause symptoms
Eligard [leuprolide acetate]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Palliative treatment of prostate cancer symptoms
Elinest [norgestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Eliquis [apixaban]	Z79.01	Anticoagulant	Venous thrombosis
Emoquette [ethinyl estradiol/desogestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Emtriva [emtricitabine]	Z79.899	Antiretroviral	HIV
Enbrel [etanercept]	Z79.899	Antirheumatic	Rheumatoid arthritis; polyarticular juvenile idiopathic arthritis; psoriatic arthritis; ankylosing spondylitis, plaque psoriasis
Enpresse-28 [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy

Drug	Z Code	Drug Action/Classification	Indications
Enskyce [desogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Entocort EC [budesonide]	Z79.52	Corticosteroid	Crohn's disease; ulcerative colitis
Entresto [sacubitril/valsartan]		Angiotensin II receptor blocker; neprilysin inhibitor	Chronic heart failure
Entyvio [vedolizumab]	Z79.899	Immunosuppressant	Ulcerative colitis; Crohn's disease
Envarsus XR [tacrolimus]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Epinephrine [epinephrine]		Bronchodilator, cardiotonic	Most commonly, relief of distress due to bronchospasm and restoration of cardiac rhythm in cardiac arrest
Epivir, Epivir-HBV [lamivudine]	Z79.899	Antiretroviral	HIV, hepatitis B (HBV), asymptomatic HIV
Erelzi [etanercept-szxs]	Z79.899	Antirheumatic	Rheumatoid arthritis; polyarticular juvenile idiopathic arthritis; psoriatic arthritis; ankylosing spondylitis, plaque psoriasis
Errin [norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Ertapenem [ertapenem sodium]	Z79.2	Antibiotic	Stomach, urinary tract, pelvis, skin and lung infections
ERYC [erythromycin]	Z79.2	Antibiotic	Respiratory tract infections
Erygel [erythromycin]	Z79.2	Antibiotic, topical	Bacterial skin infections
EryPed [erythromycin ethylsuccinate]	Z79.2	Antibiotic	Bacterial infections; rheumatic fever attacks
Ery-Tab [erythromycin]	Z79.2	Antibiotic	Bacterial infections
Erythrocin [erythromycin lactobionate]	Z79.2	Antibiotic	Bacterial infections
Erythromycin [erythromycin]	Z79.2	Antibiotic	Respiratory tract infections
Estartella [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy
Estrace [estradiol]	Z79.890	Estrogen therapy	Vaginal cream for treatment of vaginal and vulvar atrophy
EstroGel [estradiol]	Z79.890	Estrogen therapy – topical	Menopause symptoms
Estrostep Fe [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Evista [raloxifene hydrochloride]	Z79.810	Selective estrogen receptor modulator (SERM)	Prevention of thinning of the bones (osteoporosis) only in postmenopausal women
Exemestane [exemestane]	Z79.811	Aromatase inhibitor	Postmenopausal breast cancer
Factive [gemifloxacin mesylate]	Z79.2	Antibiotic	Bacterial lung infections
Falmina [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Fareston [toremifene citrate]	Z79.810	Selective estrogen receptor modulator (SERM)	Treatment of metastatic breast cancer in postmenopausal women
Farxiga [dapagliflozin propanediol]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Faslodex [fulvestrant]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Hormone-related breast cancer; metastatic breast cancer
Feldene [piroxicam]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Treatment of pain and inflammation due to arthritis
Femara [letrozole]	Z79.811	Aromatase inhibitor	Postmenopausal breast cancer
Femhrt [ethinyl estradiol/norethindrone acetate]	Z79.3, Z79.890	Contraceptive; estrogen therapy	Prevention of pregnancy; menopause symptoms; osteoporosis prevention
Femring [estradiol acetate]	Z79.890	Estrogen therapy	Osteoporosis prevention and to treat menopausal symptoms; hypoestrogenism; ovarian failure
Fentanyl citrate [fentanyl citrate]	Z79.891	Analgesic, narcotic	Postprocedural or chronic pain
Fentora [fentanyl citrate]	Z79.891	Analgesic, narcotic	Breakthrough cancer pain
Fetroja [cefiderocol]	Z79.2	Antibiotic	Complicated urinary tract infections; pyelonephritis
Fiasp [insulin aspart]	Z79.4	Insulin	Diabetes mellitus
Fioricet with codeine [acetaminophen/butalbital/cafeine/codine phosphate]	Z79.891	Analgesic, narcotic	Tension headaches
Firmagon [degarelix]	Z79.890	Hormone therapy	Prostate cancer
Flagyl [metronidazole]	Z79.2	Antibiotic	Bacterial infections
Flavoxate HCl [flavoxate hydrochloride]		Urinary tract spasmolytic	Relief of dysuria, urgency, nocturia, suprapubic pain, frequency, and incontinence associated with cystitis, prostatitis, urethritis, and urethrocystitis/urethrotigonitis

Appendix B: Pharmacology List 2021

ICD-10-CM 2021

Drug	Z Code	Drug Action/Classification	Indications
Flomax [tamsulosin hydrochloride]		Antiadrenergic	Benign prostatic hyperplasia
Flonase allergy relief [fluticasone propionate]	Z79.899	Corticosteroid – intranasal	Perennial and seasonal allergic rhinitis
Flovent HFA [fluticasone propionate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Asthma
Fortaz [ceftazidime]	Z79.2	Antibiotic	Pneumonia and lower respiratory infections
Fosamax [alendronate sodium]	Z79.83	Bisphosphonate	Osteoporosis; Paget's disease
Fosinopril sodium [fosinopril sodium]		ACE inhibitor	Hypertension
Fosrenol [lanthanum carbonate]		Phosphate binder	End-stage renal disease (ESRD)
Fragmin [dalteparin sodium]	Z79.01	Anticoagulant	Prophylaxis and treatment of blood clots
Gengraf [cyclosporine]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Gentamicin sulfate [gentamicin sulfate]	Z79.2	Antibiotic	Severe bacterial infections
Gildagia [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Gildess [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Glimepiride [glimepiride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Glucotrol [glipizide]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Glumetza [metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Glyburide (micronized) [glyburide]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Glynase [glyburide]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Glyset [miglitol]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Harvoni [ledipasvir/sofosbuvir]	Z79.899	Antiviral	Chronic hepatitis C
Heparin sodium [heparin sodium]	Z79.01	Anticoagulant	Prophylaxis and treatment of venous thrombosis, pulmonary embolism; prevention of cerebral thrombosis, and treatment of consumptive coagulopathies
Humalog [insulin lispro recombinant]	Z79.4	Insulin	Diabetes mellitus
Humira [adalimumab]	Z79.899	Antirheumatic	Rheumatoid arthritis; juvenile idiopathic arthritis; psoriatic arthritis; Crohn's disease; ulcerative colitis; plaque psoriasis; hidradenitis suppurativa; uveitis
Humulin R [insulin recombinant]	Z79.4	Insulin	Diabetes mellitus
Hydrochlorothiazide [hydrochlorothiazide]		Diuretic; antihypertensive	Management of hypertension and in adjunctive therapy for edema associated with congestive heart failure; hepatic cirrhosis; corticosteroid, and estrogen therapy
Hydrocodone [acetaminophen/hydrocodone bitartrate]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Hydrocodone bitartrate and acetaminophen [acetaminophen/hydrocodone bitartrate]	Z79.891	Analgesic, narcotic	Pain, moderate to severe
Hydrocortisone [hydrocortisone]	Z79.52	Corticosteroid	Addison's disease; arthritis; immune disorders; allergies; breathing problems
Hydromorphone HCl [hydromorphone hydrochloride]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Hyrimoz [adalimumab-adaz]	Z79.899	Antirheumatic	Rheumatoid arthritis; juvenile idiopathic arthritis; psoriatic arthritis; Crohn's disease; ulcerative colitis; plaque psoriasis
Hyzaar [hydrochlorothiazide/ losartan potassium]		Antihypertensive	Hypertension
Ibsrela [tenapanor hydrochloride]		NHE-3 inhibitor	Irritable bowel syndrome with constipation (IBS-C)
Ibuprofen [ibuprofen]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain or fever relief
Imitrex [sumatriptan succinate]		Antimigraine	Migraine headache
Imuran [azathioprine]	Z79.899	Immunosuppressant	Rheumatoid arthritis
Inderal [propranolol hydrochloride]		Beta blocker	Angina pectoris; hypertension; cardiac arrhythmias
Indocin [indomethacin]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Treatment of pain and inflammation

Drug	Z Code	Drug Action/Classification	Indications
Integrilin [eptifibatide]	Z79.02	Antiplatelet	Unstable angina; heart attacks; prevention of blood clots
Intron A [interferon alfa 2-b]	Z79.899	Antineoplastic interferons; antiviral interferons	Cancer; hepatitis
Introvalle [levonorgestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Invanz [ertapenem sodium]	Z79.2	Antibiotic	Stomach, urinary tract, pelvis, skin and lung infections
Invokamet [canagliflozin/metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Invokana [canagliflozin]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Isoniazid [isoniazid]	Z79.2	Antibiotic	Tuberculosis
Isopto carpine [pilocarpine hydrochloride]		Cholinergic parasympathomimetic agent	Reduction of intraocular pressure in open-angle glaucoma or ocular hypertension; management of acute angle-closure glaucoma
Isordil [isosorbide dinitrate]		Smooth muscle relaxant	Acute anginal attacks
Isturisa [osilodrostat]		Cortisol synthesis inhibitor	Cushing's disease in adults
Isuprel [isoproterenol hydrochloride]		Adrenergic agent	Bronchodilator for asthma, chronic pulmonary emphysema, bronchitis, and other conditions accompanied by bronchospasm; can be used in cardiogenic shock cases
Jantoven [warfarin sodium]	Z79.01	Anticoagulant	Prophylaxis and treatment of venous thrombosis, pulmonary embolism; prevention of cerebral thrombosis, and treatment of consumptive coagulopathies
Janumet [metformin hydrochloride/sitagliptin phosphate]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Januvia [sitagliptin phosphate]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Jencycla [norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Jentadueto [linagliptin/metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Junel [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Kadian [morphine sulfate]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Kariva [desogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Katerzia [amlodipine benzoate]		Antihypertensive	Hypertension; coronary artery disease (CAD); chronic stable angina; Prinzmetal's angina; variant angina
Kazano [alogliptin benzoate/metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Keflex [cephalexin]	Z79.2	Antibiotic	Bone, middle ear, skin and skin structures, upper respiratory tract and urinary tract infections; acute prostatitis
Kelnor [ethynodiol diacetate/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Kenalog-10; Kenalog-40 [triamcinolone acetate]	Z79.52	Corticosteroid	Gouty arthritis; bursitis; tenosynovitis; epicondylitis; rheumatoid arthritis; synovitis; osteoarthritis
Keytruda [pembrolizumab]	Z79.899	Antineoplastic	Cancer
Kimidess [ethinyl estradiol/desogestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Klaron [sulfacetamide sodium]	Z79.2	Antibiotic, topical	Acne vulgaris
Klonopin [clonazepam]		Anticonvulsant; CNS depressant	Epilepsy; seizures; panic disorder
Klor-Con [potassium chloride]		Replaces potassium and maintains potassium level	Hypokalemia
Kombiglyze [metformin hydrochloride/saxagliptin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
K-Tab [potassium chloride]		Replaces potassium and maintains potassium level	Hypokalemia
Kurvelo [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy; menstrual disorders
Kyleena [levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Lamisil [terbinafine hydrochloride]		Antifungal	Tinea cruris (jock itch), T. pedis (athlete's foot), T. corporis (ringworm)

Drug	Z Code	Drug Action/Classification	Indications
Lanoxin [digoxin]		Cardiotonic glycoside	Congestive heart failure
Lantus [insulin glargine recombinant]	Z79.4	Insulin	Diabetes mellitus
Larin [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Lasix [furosemide]		Antihypertensive; diuretic	Management of edema associated with congestive heart failure, renal disease, including nephrotic syndrome and hypertension
Lazanda [fentanyl citrate]	Z79.891	Analgesics, narcotic	Breakthrough cancer pain
Lescol XL [fluvastatin sodium]		HMG-CoA reductase inhibitor (statin)	Hypercholesterolemia; hyperlipidemia; hyperlipoproteinemia
Lessina-28 [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Letrozole [letrozole]	Z79.811	Aromatase inhibitor	Postmenopausal breast cancer
Levemir [insulin detemir recombinant]	Z79.4	Insulin	Diabetes mellitus
Levonest [levonorgestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy; menstrual disorders; acne
Levora [levonorgestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Levothroid [levothyroxine sodium]		Thyroid hormone	Hypothyroidism
Levoxyl [levothyroxine sodium]		Thyroid hormone	Euthyroid goiter; hypothyroidism
Lexapro [escitalopram oxalate]		Antidepressant, selective serotonin reuptake inhibitor (SSRI)	Depression; anxiety
Lialda [mesalamine]		Anti-inflammatory	Ulcerative colitis
Librium [chlordiazepoxide hydrochloride]		Antianxiety	Acute withdrawal symptoms, especially from alcohol, or for other anxiety-producing conditions
Lidocaine HCl [lidocaine hydrochloride]		Antiarrhythmic	Management of ventricular arrhythmias or during cardiac manipulation, such as cardiac surgery
Liletta [levonorgestrel]	Z79.3	Contraceptive	Intrauterine device to Prevention of pregnancy
Lincocin [lincocin hydrochloride]	Z79.2	Antibiotic	Severe bacterial infections
Lipitor [atorvastatin calcium]		HMG-CoA reductase inhibitor (statin)	Hypercholesterolemia; hyperlipidemia; hyperproteinemia
Lithium carbonate [lithium carbonate]		Antimanic	Control of manic episodes in bipolar disorders
Lo Loestrin Fe [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Locoid [hydrocortisone butyrate]	Z79.52	Corticosteroid – topical	Atopic dermatitis; other dermatoses
Loestrin [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Lomotil [diphenoxylate hydrochloride/atropine sulfate]		Antidiarrheal	Symptoms of chronic and functional diarrhea
Lopid [gemfibrozil]		Lipid regulating agent	Hypercholesterolemia, hyperlipidemia, hyperlipoproteinemia, hypertriglyceridemia
Lopressor [metoprolol tartrate]		Beta blocker	Angina pectoris; hypertension; acute myocardial infarction
Lorazepam [lorazepam]		Antianxiety; sedative/hypnotic	Anxiety disorder associated with depressive symptoms; controls tension, agitation, irritability, and insomnia
Loryna [drospirenone/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
LoSeasonique [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Lotensin [benazepril hydrochloride]		ACE inhibitor	Hypertension
Lotrel [amlodipine besylate/benazepril hydrochloride]		Antihypertensive	Hypertension
Lotrisone [clotrimazole/ betamethasone dipropionate]		Antifungal-corticosteroid	Relief of redness, swelling, itching, and other discomfort of fungus infections
Lovastatin [lovastatin]		HMG-CoA reductase inhibitor (statin)	Hypercholesterolemia; hyperlipidemia; hyperlipoproteinemia
Lovenox [enoxaparin sodium]	Z79.81	Anticoagulant	Prophylaxis and treatment of venous thrombosis and pulmonary embolism
Low-Ogestrel-28 [norgestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Lupron Depot [leuprolide acetate]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Endometriosis symptoms; uterine fibroids

Drug	Z Code	Drug Action/Classification	Indications
Macrobid [nitrofurantoin]	Z79.2	Antibiotic	Urinary tract infections
Macroclantin [nitrofurantoin]	Z79.2	Antibiotic	Urinary tract infections
Marissa [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Maxipime [cefepime hydrochloride]	Z79.2	Antibiotic	Bacterial infections
Meclizine hydrochloride [meclizine hydrochloride]		Antihistamine	Nausea and vomiting, and dizziness associated with motion sickness
Medrol [methylprednisolone]	Z79.52	Corticosteroid	Endocrine, rheumatic, hematologic disorders; collagen, dermatological, ophthalmic, respiratory, neoplastic, gastrointestinal, nervous system disorders; allergic and edematous states
Meftoxin [cefazolin sodium]	Z79.2	Antibiotic	Bacterial infections
Megace ES [megestrol acetate]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Endometrial or advanced breast cancers; weight loss due to AIDS
Menest [esterified estrogens]	Z79.890	Estrogen therapy	Menopause symptoms; ovarian failure
Menostar [estradiol]	Z79.890	Estrogen therapy	Menopause symptoms; osteoporosis prevention
Mepron [atovaquone]	Z79.2	Antibiotic	Pneumonia due to <i>Pneumocystis jirovecii</i>
Merrem [meropenem]	Z79.2	Antibiotic	Bacterial infections of skin or stomach; bacterial meningitis
Metformin [metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Methadone HCl [methadone hydrochloride]	Z79.891	Analgesic, narcotic; opioid agonist	Pain; treatment of opioid addiction
Methadose [methadone hydrochloride]	Z79.891	Analgesic, narcotic	Acute and chronic pain
Methergine [methylergonovine maleate]		Oxytocic agent	Routine management of postpartum hemorrhage after delivery of placenta
Methylprednisolone [methylprednisolone]	Z79.52	Corticosteroid	Inflammatory disorders
Metronidazole [metronidazole]	Z79.2	Antibiotic	Bacterial infections
Miacalcin [calcitonin salmon]		Calcitonin; a peptide hormone	Hypercalcemia, osteoporosis, postmenopausal symptoms, Paget's disease
Microgestin [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Minastrin [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Minivelle [estradiol]	Z79.890	Estrogen therapy	Menopause symptoms; osteoporosis prevention
Minocin [minocycline hydrochloride]	Z79.2	Antibiotic	Bacterial infections; acne
Mirena [levonorgestrel]	Z79.3	Contraceptive	Intrauterine device for prevention of pregnancy; menstrual disorders
Mobic [meloxicam]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Treatment of pain and inflammation due to osteoarthritis and rheumatoid arthritis
Monoclonal antibodies	Z79.899	Monoclonal antibodies	Cancer; prophylaxis of organ transplant rejection
Monodox [doxycycline]	Z79.2	Antibiotic	Bacterial infections; acne
Monoket [isosorbide mononitrate]		Antianginal; coronary vasodilator, nitrate	Angina pectoris
Mono-Linyah [norgestimate/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy; menstrual disorders; acne
Monurol [fosfomycin tromethamine]	Z79.2	Antibiotic	Bacterial bladder infections
Morphabond ER [morphine sulfate]	Z79.891	Analgesics, narcotic	Pain
Morphine sulfate [morphine sulfate]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Motrin IB [ibuprofen]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain or fever relief
MS Contin [morphine sulfate]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Multaq [dronedrone hydrochloride]		Cardiac rhythm regulator	Treatment of patients with recent episodes of atrial fibrillation or atrial flutter
Mycobutin [rifabutin]	Z79.2	Antibiotic	Mycobacterium avium complex (MAC) prophylactic in HIV patients
Mytesi [crofelemer]		Antidiarrheal	Diarrhea occurring in HIV/AIDS patient's on anti-retroviral therapy
Myzila [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy

Appendix B: Pharmacology List 2021

ICD-10-CM 2021

Drug	Z Code	Drug Action/Classification	Indications
Nabumetone [nabumetone]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Osteoarthritis and rheumatoid arthritis
Nalfon [fenoprofen calcium]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain or inflammation relief
Namzaric [memantine/donepezil hydrochlorides]		Acetylcholinesterase/cholinesterase inhibitors	Dementia due to Alzheimer's
Naprelan [naproxen sodium]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain or inflammation relief
Naprosyn [naproxen]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Rheumatoid, gouty arthritis and osteoarthritis; ankylosing spondylitis; bursitis; dysmenorrhea; pain, mild to moderate; tendonitis
Natazia [estradiol valerate/dienogest]	Z79.3	Contraceptive	Prevention of pregnancy; menstrual disorders
Nebupent [pentamidine isethionate]	Z79.2	Antibiotic	Severe bacterial lung infection in high risk patients with HIV
Nefazodone HCl [nefazodone hydrochloride]		Antidepressant	Depression
Nembutal sodium [pentobarbital sodium]		Sedative/hypnotic	Adjunct medication in diagnostic procedures or for emergency use with convulsive disorders
NeoProfen [ibuprofen lysine]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain or fever relief
Neoral [cyclosporine]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Neurontin [gabapentin]		Anticonvulsant	Epilepsy, partial
Nexium [esomeprazole magnesium]		Proton pump inhibitor	Gastroesophageal reflux disease (GERD), erosive esophagitis
Nexplanon [etonogestrel]	Z79.3	Contraceptive	Implantable device used for prevention of pregnancy
Nitrofurantoin [nitrofurantoin]	Z79.2	Antibiotic	Bacterial urinary tract infections
Nitropress [sodium nitroprusside]		Vasodilator	Potent, rapid action in reducing blood pressure in hypertensive crisis or for controlling bleeding during anesthesia by producing controlled hypotension
Nitrostat [nitroglycerin]		Muscle relaxant; antianginal; antihypertensive; coronary vasodilator	Prophylaxis and treatment of angina pectoris; heart failure associated with myocardial infarction; hypertension, perioperative; surgery, adjunct
Norco [acetaminophen/hydrocodone bitartrate]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Norinyl [mestranol/norethisterone]	Z79.3	Contraceptive	Prevention of pregnancy
Norpace [disopyramide phosphate]		Antiarrhythmic	Coronary artery disease, for prevention, recurrence and control of unifocal, multifocal, and paired PVCs
Nor-QD [norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Nortrel [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Norvasc [amlodipine besylate]		Antihypertensive	Hypertension; coronary artery disease (CAD); chronic stable angina; Prinzmetal's angina; variant angina
Novolin [insulin recombinant]	Z79.4	Insulin	Diabetes mellitus
Novolog [insulin aspart recombinant]	Z79.4	Insulin	Diabetes mellitus
Nucynta [tapentadol hydrochloride]	Z79.891	Analgesic, narcotic	Moderate to severe pain
NuvaRing [etonogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Vaginal ring to Prevention of pregnancy
Ogestrel [norgestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Onglyza [saxagliptin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Oracea [doxycycline]	Z79.2	Antibiotic	Rosacea
Orapred ODT [prednisolone sodium phosphate]	Z79.52	Corticosteroid	Inflammatory disorders
Orbactiv [oritavancin diphosphate]	Z79.2	Antibiotic	Bacterial skin infections
Orencia [abatacept]	Z79.899	Antirheumatic	Rheumatoid arthritis; polyarticular juvenile idiopathic arthritis; psoriatic arthritis
Orilissa [elagolix]	Z79.890	Hormone therapy	Pain associated with endometriosis
Orphenadrine citrate [orphenadrine citrate]		Muscle relaxant	Acute spasms, tension, and post-trauma cases

Drug	Z Code	Drug Action/Classification	Indications
Orsythia [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Ortho-Novum [norethindrone/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Ortho-Tri-Cyclen [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy
Oseni [alogliptin benzoate/pioglitazone hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Osphena [ospemifene]	Z79.810, Z79.890	Selective estrogen receptor modulator (SERM)	Postmenopausal dyspareunia due to vaginal atrophy; osteoporosis prevention and treatment of menopausal symptoms
Otezla [apremilast]	Z79.899	Antirheumatic	Psoriatic arthritis; plaque psoriasis
Oxazepam [oxazepam]		Antianxiety	Anxiety, tension, and alcohol withdrawal
Oxbryta [voxelotor]		Hemoglobin S polymerization inhibitor	Sickle cell disease
Oxycodone HCl [oxycodone hydrochloride]	Z79.891	Analgesic, narcotic	Moderate to severe pain
OxyContin [oxycodone hydrochloride]	Z79.891	Analgesic, narcotic	Moderate to severe pain
Ozempic [semaglutide]	Z79.899	Antidiabetic – noninsulin injectable	Diabetes mellitus
Paxil [paroxetine hydrochloride]		Antidepressant	Anxiety with panic disorder and depression; obsessive-compulsive disorder
PediaPred [prednisolone sodium phosphate]	Z79.52	Corticosteroid	Inflammatory disorders
Pegintron [peginterferon alfa-2b]	Z79.899	Antiviral	Hepatitis C
Penicillin-VK [penicillin V potassium]	Z79.2	Antibiotic	Chorea, prevention; endocarditis, prevention, secondary to tooth extraction; erysipelas; infections of the skin and skin structures, upper respiratory tract; rheumatic fever, prophylaxis; scarlet fever; Vincent's gingivitis; Vincent's pharyngitis
Pentam [pentamidine isethionate]	Z79.2	Antibiotic	Severe bacterial lung infections
Pepcid [famotidine]		Histamine H2-receptor inhibitor	Acid/peptic disorder; adenoma, secretory; gastroesophageal reflux; duodenal and gastric ulcer; Zollinger-Ellison syndrome
Percocet [oxycodone hydrochloride/acetaminophen]	Z79.891	Analgesic, narcotic	Pain, moderate to severe
Persantine [dipyridamole]	Z79.02	Antiplatelet	Therapy for chronic angina pectoris, preventing clots post heart valve surgery
Pfizerpen [penicillin g potassium]	Z79.2	Antibiotic	Severe bacterial infections
Phenobarbital [phenobarbital sodium]		Anticonvulsant	Grand mal epilepsy
Philith [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Pimtree [desogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Piqray [alpelisib]		Kinase inhibitor	Postmenopausal advanced or metastatic breast cancer that is HR positive, HER2 negative
Pirmella [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Pitocin [oxytocin]		Uterotonic	Induction or stimulation of labor at term
Plan B One-Step [levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Plavix [clopidogrel bisulfate]	Z79.02	Antiplatelet	Lessening of the chance of heart attack or stroke
Ponstel [mefenamic acid]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Treatment of pain
Portia-28 [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Pradaxa [dabigatran etexilate mesylate]	Z79.01	Anticoagulant	Prophylaxis and treatment of blood clots in patients with atrial fibrillation
Prasugrel [prasugrel hydrochloride]	Z79.02	Antiplatelet	Lessening the chance of heart attack or stroke
Pravachol [pravastatin sodium]		HMG-CoA reductase inhibitor (statin)	Hypercholesterolemia; hyperlipidemia; hyperlipoproteinemia
Prednisolone [prednisolone]	Z79.52	Corticosteroid	Inflammatory disorders
Prednisone [prednisone]	Z79.52	Corticosteroid	Used for its immunosuppressant effects and for relief of inflammation; used in arthritis, polymyositis and other systemic diseases

Drug	Z Code	Drug Action/Classification	Indications
Pregnyl [chorionic gonadotropin]		Gonadotropic hormone	Prepubertal cryptorchidism; hypogonadism; corpus luteum insufficiency and infertility
Prelone [prednisolone]	Z79.52	Corticosteroid	Inflammatory disorders
Prempro [conjugated estrogens/medroxyprogesterone acetate]	Z79.890	Estrogen/progesterone therapy	Menopause; osteoporosis; atrophic vaginitis
Prevacid [lansoprazole]		Proton pump inhibitor	Acid/peptic disorder, erosive esophagitis, duodenal ulcer, Zollinger-Ellison syndrome
Previfem [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy
Prezcobix [darunavir/cobicistat]	Z79.899	Antiviral	HIV
Prezista [darunavir ethanolate]	Z79.899	Antiviral	HIV
Priftin [rifapentine]	Z79.2	Antibiotic	Tuberculosis
Prilosec [omeprazole magnesium]		Proton pump inhibitor	Acid/peptic disorder; endocrine adenoma; erosive esophagitis; systemic mastocytosis; gastroesophageal reflux; duodenal, peptic and gastric ulcer; Zollinger-Ellison syndrome
Primaxin [cilastatin sodium/imipenem]	Z79.2	Antibiotic	Skin, stomach, female reproductive organs or lower respiratory tract infections
Prinivil [lisinopril]		ACE inhibitor	Congestive heart failure; hypertension
Pristiq [desvenlafaxine]		Antidepressant; serotonin and norepinephrine reuptake inhibitor (SNRI)	Major depressive disorder
Procardia [nifedipine]		Calcium channel blocker	Management of vasospastic angina and chronic stable angina, hypertension
Prograf [tacrolimus]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Prolia [denosumab]	Z79.899	Monoclonal antibody	Treatment and prevention of bone resorption and prevention of bone fracture
Promethazine hydrochloride [promethazine hydrochloride]		Anesthesia, adjunct to; antiemetic; antihistamine; antitussive/expectorant; sedative/hypnotic; vertigo/motion sickness/vomiting	Anesthesia; adjunct; angioedema; conjunctivitis; dermatographism; hypersensitivity, motion sickness; pain; perennial, seasonal, and allergic rhinitis; sedation, obstetrical; urticaria
Protonix [pantoprazole]		Proton pump inhibitor	Short-term treatment and maintenance therapy of erosive esophagitis associated with gastroesophageal reflux disease (GERD)
Protopic [tacrolimus]	Z79.899	Immunosuppressant	Atopic dermatitis (eczema)
Proventil-HFA [albuterol sulfate]		Antiasthmatic/bronchodilator	Asthma
Provera [medroxyprogesterone acetate]	Z79.3, Z79.890	Antineoplastic; contraceptive; progestin	Amenorrhea; carcinoma, endometrium, adjunct; carcinoma, renal; Prevention of pregnancy; hemorrhage
Prozac [fluoxetine hydrochloride]		Selective serotonin reuptake inhibitor (SSRI)	Bulimia nervosa; depression; obsessive-compulsive disorder
Pulmicort [budesonide]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Prophylaxis and treatment of asthma
Qnasl [beclomethasone dipropionate]	Z79.899	Corticosteroid – intranasal	Perennial and seasonal allergies; vasomotor rhinitis
Qtern [dapagliflozin propanediol/saxagliptin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Quartette [levonorgestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Quasense [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Quinidine gluconate [quinidine gluconate]		Antiarrhythmic	Management of cardiac arrhythmias
Qvar Redihaler [beclomethasone dipropionate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Prophylaxis and treatment of asthma
Raloxifene HCl [raloxifene hydrochloride]	Z79.810	Selective estrogen receptor modulator (SERM)	Prevention of thinning of the bones (osteoporosis) only in postmenopausal women
Rapaflo [silodosin]		Antiadrenergic	Benign prostatic hyperplasia
Rapamune [sirolimus]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Rayos [prednisone]	Z79.52	Corticosteroid; antiasthmatic	Arthritis; blood disorders; allergies; asthma
Rebetol [ribavirin]	Z79.899	Antiviral	Chronic hepatitis C
Rebif [interferon beta-1a]	Z79.899	Antiviral	Treatment of relapsing multiple sclerosis

Drug	Z Code	Drug Action/Classification	Indications
Reclast [zoledronic acid]	Z79.83	Bisphosphonate	Prevention of thinning of the bones (osteoporosis); Paget's disease; bone cancer
Relenza [zanamivir]		Antiviral	Treat and prevent influenza A and B
Renvela [sevelamer carbonate]		Phosphate binder	Chronic kidney disease (CKD) on dialysis
Repaglinide [repaglinide]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Reprexain [hydrocodone bitartrate/ibuprofen]	Z79.891	Analgesic, narcotic; nonsteroidal anti-inflammatory drug (NSAID)	Pain, inflammation or fever relief
Restasis [cyclosporine ophthalmic emulsion]		Anti-inflammatory, ophthalmic	Ocular inflammation due to keratoconjunctivitis sicca
Restoril [temazepam]		Sedative/hypnotic	Insomnia
Retrovir [zidovudine]	Z79.899	Antiretroviral	Indicated in symptomatic HIV infection
Reyvow [lasmiditan]		Serotonin 1F receptor agonist	Migraine with or without aura
Rifadin [rifampin]	Z79.2	Antibiotic	Tuberculosis
Rimactane [rifampin]	Z79.2	Antibiotic	Tuberculosis
Rinvoq [upadacitinib]	Z79.899	Antirheumatic	Rheumatoid arthritis
Riomet [metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Risperdal [risperidone]		Antipsychotic/antimanic	Schizophrenia; bipolar I disorder
Ritalin [methylphenidate hydrochloride]		CNS stimulant	Depression; hyperkinetic activity in children
Roxicet [oxycodone hydrochloride/acetaminophen]	Z79.891	Analgesic, narcotic	Pain, moderate to severe
Roxicodone [oxycodone hydrochloride]	Z79.891	Analgesic, narcotic	Pain relief
Rybelsus [semaglutide]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Sabril [vigabatrin]		Anticonvulsant	Refractory complex partial seizures
Safyral [drospirenone/ethinyl estradiol/levomefolate calcium]	Z79.3	Contraceptive	Prevention of pregnancy
Sandimmune [cyclosporine]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Sarafem [fluoxetine hydrochloride]		Selective serotonin reuptake inhibitor (SSRI)	Premenstrual dysphoric disorder (PMDD)
Savaysa [edoxaban tosylate]	Z79.81	Anticoagulant	Prophylaxis and treatment of venous thrombosis, pulmonary embolism; prevention of blood clots due to atrial fibrillation
Seasonale [levonorgestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Seasonique [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Selfemra [fluoxetine hydrochloride]		Selective serotonin reuptake inhibitor (SSRI)	Premenstrual dysphoric disorder (PMDD)
Sepra [sulfamethoxazole trimethoprim]	Z79.2	Antibiotic	Urinary tract infections, acute otitis media, acute exacerbations of chronic bronchitis, and shigellosis
Serevent [salmeterol xinafoate]		Bronchodilator	Asthma
Seromycin [cycloserine]	Z79.2	Antibiotic	Tuberculosis; urinary tract infections
Seroquel XR [quetiapine fumarate]		Antipsychotic	Schizophrenia; bipolar disorder; major depressive disorder
Setlakin [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Silvadene [silver sulfadiazine]	Z79.2	Antibiotic, topical	Wound sepsis due to second/third degree burns
Simulect [basiliximab]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Sinemet [carbidopa/levodopa]		Antiparkinsonism	Parkinson's disease
Singular [montelukast sodium]		Antiasthmatic	Asthma; exercise-induced bronchoconstriction; perennial and seasonal allergic rhinitis
Sirolimus [sirolimus]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Sitagliptin [sitagliptin/metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Sivextro [tedizolid phosphate]	Z79.2	Antibiotic	Skin infections including MRSA
Skyla [levonorgestrel]	Z79.3	Contraceptive	Intrauterine device to Prevention of pregnancy
Soliqua [insulin glargine/lixisenatide]	Z79.4	Insulin	Diabetes mellitus
Solodyn [minocycline hydrochloride]	Z79.2	Antibiotic	Bacterial infections

Appendix B: Pharmacology List 2021

ICD-10-CM 2021

Drug	Z Code	Drug Action/Classification	Indications
Soltamox [tamoxifen citrate]	Z79.810	Selective estrogen receptor modulator (SERM)	Breast cancer
Solu-Cortef [hydrocortisone sodium succinate]	Z79.52	Corticosteroid; antiasthmatic	Asthma; severe inflammation; allergic reactions
Solu-Medrol [methylprednisolone sodium succinate]	Z79.52	Corticosteroid	Anti-inflammatory and antiallergenic for shock and ulcerative colitis
Spiriva [tiotropium bromide]		Antiasthmatic/bronchodilator	Chronic obstructive pulmonary disease (COPD); asthma
Sprintec [norgestimate/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Strattera [atomoxetine hydrochloride]		CNS stimulant	Attention deficit hyperactivity disorder (ADHD)
Streptomycin sulfate [streptomycin sulfate]	Z79.2	Antibiotic	Severe bacterial infections
Sublimaze preservative free [fentanyl citrate]	Z79.891	Analgesic, narcotic	Pain relief
Supprelin LA [histrelin acetate]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Precocious puberty
Suprax [cefixime]	Z79.2	Antibiotic	Bacterial infections
Sustiva [efavirenz]	Z79.899	Antiviral	HIV/AIDS
Syeda [drospirenone/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Sylatron [peginterferon alfa-2b]	Z79.899	Antineoplastic interferons; antiviral interferons	Prevention of recurrent malignant melanoma
Symbicort [budesonide/formoterol fumarate dihydrate]	Z79.51	Corticosteroid – inhaled; antiasthmatic	Prophylaxis and treatment of asthma and COPD
Symbyax [olanzapine/fluoxetine]		Antidepressant	Acute depressive episodes associated with bipolar I disorder; treatment resistant depression
Symtuza [darunavir/cobicistat/emtricitabine/tenofovir alafenamide]	Z79.899	Antiretroviral	HIV
Synarel [nafarelin acetate]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Endometriosis symptoms; precocious puberty
Synercid [dalbapristin/quinupristin]	Z79.2	Antibiotic	Severe blood infections
Synjardy [empagliflozin/metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Synthroid [levothyroxine sodium]		Thyroid hormone	Hypothyroidism
Tacrolimus [tacrolimus]	Z79.899	Immunosuppressant	Prophylaxis of organ transplant rejection
Talicia [omeprazole magnesium/amoxicillin/rifabutin]	Z79.2	Combination antibiotic	Helicobacter pylori infection
Tamiflu [oseltamivir phosphate]		Antiviral	Treatment and prevention of influenza A and B
Tamoxifen citrate [tamoxifen citrate]	Z79.810	Selective estrogen receptor modulator (SERM)	Metastatic breast cancer in postmenopausal women
Tazicef [ceftazidime]	Z79.2	Antibiotic	Confirmed or suspected bacterial infections
Teflaro [ceftaroline fosamil]	Z79.2	Antibiotic	Bacterial skin infections; pneumonia
Tegretol [carbamazepine]		Anticonvulsant; analgesic	Epilepsy, especially with complex symptomatology; specific analgesic for trigeminal neuralgia
Tenormin [atenolol]		Beta blocker	Angina pectoris; hypertension; acute myocardial infarction
Terazosin HCl [terazosin hydrochloride]		Antiadrenergic	Benign prostatic hypertrophy; hypertension
Testim [testosterone]	Z79.890	Testosterone therapy – topical	Primary hypogonadism; hypogonadotropic hypogonadism
Tetracycline HCl [tetracycline hydrochloride]	Z79.2	Antibiotic	Bacterial infections
Tiazac [diltiazem hydrochloride]		Calcium channel blocker	Chronic stable angina, atrial fibrillation, atrial flutter, hypertension, paroxysmal supraventricular tachycardia
Tivorbex [indomethacin]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Treatment of pain, inflammation and joint stiffness
Tobradex [tobramycin/dexamethasone]		Aminoglycoside ocular anti-infective; anti-inflammatory	Infectious conjunctivitis; dermatosis, corticosteroid-responsive with secondary infection; foreign body in eye; corneal inflammation; uveitis

Drug	Z Code	Drug Action/Classification	Indications
Tobramycin [dexamethasone/tobramycin]	Z79.2	Antibiotic	Bacterial eye infections
Topamax [topiramate]		Anticonvulsant	Epilepsy; primary generalized tonic-clonic seizures; seizures associated with Lennox-Gastaut syndrome; migraine headache
Toprol-XL [metoprolol succinate]		Beta blocker	Angina pectoris; hypertension
Toremifene citrate [toremifene citrate]	Z79.810	Selective estrogen receptor modulator (SERM)	Metastatic breast cancer in postmenopausal women
Torisel [temsirolimus]	Z79.899	Antineoplastic	Renal cell carcinoma
Toujeo Solostar [insulin glargine recombinant]	Z79.4	Insulin	Diabetes mellitus
Tradjenta [linagliptin]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Trazodone HCl [trazodone hydrochloride]		Antidepressant	Depression
Trelegy Ellipta [fluticasone furoate/umeclidinium bromide/vilanterol trifenate]	Z79.51	Corticosteroid – inhaled; anitasthmatic	COPD
Trelstar [triptorelin pamoate]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Palliative treatment of prostate cancer symptoms
Tresiba [insulin degludec]	Z79.4	Insulin	Diabetes mellitus
Triamterene and hydrochlorothiazide [triamterene/ hydrochlorothiazide]		Antihypertensive; diuretic	Edema; hypertension
Tri-Estarylla [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy; acne
Trijardy XR [empagliflozin/linagliptin/metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Tri-Legest [ethinyl estradiol/norethindrone acetate]	Z79.3	Contraceptive	Prevention of pregnancy
Tri-Linyah [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy
Tri-Lo-Estarylla [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy
Tri-Lo-Sprintec [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy
Trimethoprim [trimethoprim]	Z79.2	Antibiotic	Acute exacerbation chronic bronchitis; travelers' diarrhea; infections of the middle, lower respiratory tract, and urinary tract; pneumonia, pneumocystis; shigellosis
Tri-Norinyl 28-day [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Tri-Previfem [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy
Triptodur [triptorelin]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Precocious puberty
Tri-Sprintec [ethinyl estradiol/norgestimate]	Z79.3	Contraceptive	Prevention of pregnancy; acne
Trivora-28 [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Trokendi XR [topiramate]		Anticonvulsant	Epilepsy; primary generalized tonic-clonic seizures; seizures associated with Lennox-Gastaut syndrome; migraine headache
Trulicity [dulaglutide]	Z79.899	Antidiabetic – noninsulin injectable	Diabetes mellitus
Truvada [emtricitabine/ tenofovir disoproxil fumarate]	Z79.899	Antiviral	Treatment and prevention of HIV
Turalio [pexidartinib]		Kinase inhibitor	Symptomatic tenosynovial giant cell tumor
Tygacil [tigecycline]	Z79.2	Antibiotic	Bacterial skin or digestive system infections; pneumonia
Tylenol with codeine [acetaminophen/codeine phosphate]	Z79.891	Analgesic, narcotic	Pain and cough
Ubrelevy [ubrogepant]		Antimigraine	Migraine with or without aura
Ultram [tramadol hydrochloride]	Z79.891	Analgesic, non-narcotic (opiate, narcotic-like)	Moderate to severe pain

Appendix B: Pharmacology List 2021

ICD-10-CM 2021

Drug	Z Code	Drug Action/Classification	Indications
Unasyn [ampicillin sodium/sulbactam sodium]	Z79.2	Antibiotic	Bacterial infections
Vabomere [meropenem; vaborbactam]	Z79.2	Antibiotic	Complicated urinary tract infections; pyelonephritis
Vagifem [estradiol]	Z79.890	Estrogen therapy	Menopause symptoms
Valium [diazepam]		Antianxiety; muscle relaxant; anticonvulsant	Anxiety, tension, withdrawal from alcohol, muscle spasms and anticonvulsant therapy; epilepsy, generalized tonic-clonic; status epilepticus; stiff-man syndrome; tetanus
Vancocin HCl [vancomycin hydrochloride]	Z79.2	Antibiotic	Severe bacterial infections
Vancomycin HCl [vancomycin hydrochloride]	Z79.2	Antibiotic	Severe bacterial infections
Vantas [histrelin acetate]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Palliative treatment of prostate cancer symptoms
Vasotec [enalaprilat maleate]		ACE inhibitor	Congestive heart failure; hypertension
Velivet [desogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Venlafaxine HCl [venlafaxine hydrochloride]		Antidepressant, serotonin and norepinephrine reuptake inhibitor (SNRI)	Major depressive disorder; social anxiety disorder; panic disorder
Ventolin HFA [albuterol sulfate]		Antiasthmatic/bronchodilator	Asthma
Verapamil HCl [verapamil hydrochloride]		Calcium channel blocker	Angina pectoris, chronic stable angina, atrial fibrillation, atrial flutter, paroxysmal supraventricular tachycardia, ventricular arrhythmia, hypertension
Viagra [sildenafil citrate]		Phosphodiesterase-5 (PDE5) inhibitor	Erectile dysfunction
Vibativ [telavancin hydrochloride]	Z79.2	Antibiotic	Pneumonia; severe bacterial skin infections
Vibramycin [doxycycline calcium]	Z79.2	Antibiotic	Bacterial infections
Victoza [liraglutide]	Z79.899	Antidiabetic – noninsulin injectable	Diabetes mellitus
Vienva [ethinyl estradiol/levonorgestrel]	Z79.3	Contraceptive	Prevention of pregnancy
Viorele [desogestrel/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Virazole [ribavirin]	Z79.899	Antiviral	Respiratory syncytial virus (RSV)
Viread [tenofovir disoproxil fumarate]	Z79.899	Antiviral	HIV; chronic hepatitis B
Vistaril [hydroxyzine pamoate]		Antianxiety; antiemetic	Treatment of nausea and vomiting, for reducing narcotic requirement in surgery and as tranquilizer for tension, anxiety, or agitation states
Vivelle [estradiol]	Z79.890	Estrogen therapy	Menopause symptoms; osteoporosis prevention
Voltaren [diclofenac sodium]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Treatment of pain, inflammation and joint stiffness due to arthritis
Vumerity [diroxime fumarate]		Immunostimulant	Relapsing forms of multiple sclerosis (MS)
Vytorin [ezetimibe/simvastatin]		HMG-CoA reductase inhibitor (statin); cholesterol absorption inhibitor	Hyperlipidemia; hypercholesterolemia
Wakix [pitolisant hydrochloride]		CNS stimulant	Narcolepsy
Warfarin [warfarin sodium]	Z79.01	Anticoagulant	Prophylaxis and treatment of venous thrombosis, treatment of atrial fibrillation with embolization (pulmonary embolism), arrhythmias, myocardial infarction, and stroke prevention
Wellbutrin SR, Wellbutrin XL [bupropion hydrochloride]		Antidepressant	Depression
Wera [ethinyl estradiol/norethindrone]	Z79.3	Contraceptive	Prevention of pregnancy
Xalatan [latanoprost]		Prostaglandin F2α analogue	Glaucoma, open-angle; ocular hypertension
Xanax, Xanax XR [alprazolam]		Antianxiety; sedative/hypnotic	Anxiety disorders with panic disorder and depression
Xarelto [rivaroxaban]	Z79.01	Anticoagulant	Prophylaxis and treatment of venous thrombosis, pulmonary embolism; prevention of blood clots due to atrial fibrillation
Xeljanz [tofacitinib citrate]	Z79.899	Antirheumatic	Rheumatoid arthritis; psoriatic arthritis
Xenleta [lefamulin acetate]	Z79.2	Antibiotic	Community-acquired bacterial pneumonia
Xgeva [denosumab]	Z79.899	Monoclonal antibody	Treatment and prevention of bone resorption and prevention of bone fracture
Xifaxan [rifaximin]	Z79.2	Antibiotic	E. coli diarrhea

Drug	Z Code	Drug Action/Classification	Indications
Xigduo [dapagliflozin propanediol/metformin hydrochloride]	Z79.84	Oral hypoglycemic	Diabetes mellitus
Xpovio [selinexor]	Z79.899	Antineoplastic	Multiple myeloma in adults
Xultophy [insulin degludec/liraglutide]	Z79.4	Insulin	Diabetes mellitus
Xyrem [sodium oxybate]		CNS depressant; anxiolytic/sedative/hypnotic	Cataplexy and/or excessive daytime sleepiness in narcolepsy
Xyzal [levocetirizine dihydrochloride]		Antihistamine	Perennial allergic rhinitis; chronic idiopathic urticaria
Yasmin [drospirenone/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Yaz [drospirenone/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy; menstrual disorders
Zantac [ranitidine hydrochloride]		Histamine H2-receptors inhibitor	Acid/peptic disorder, erosive esophagitis, gastrointestinal hypersecretion, mastocytosis, gastroesophageal reflux, peptic ulcer, Zollinger-Ellison syndrome
Zerbaxa [ceftolozane sulfate/tazobactam sodium]	Z79.2	Antibiotic	Complicated urinary tract and intra-abdominal infections
Zestoretic [lisinopril/hydrochlorothiazide]		ACE inhibitor	Congestive heart failure; hypertension
Zestril [lisinopril]		ACE inhibitor	Congestive heart failure; hypertension
Zetia [ezetimibe]		Antihyperlipidemic	Hypercholesterolemia; sitosterolemia
Ziac [bisoprolol fumarate/hydrochlorothiazide]		Antihypertensive	Hypertension
Zinacef [cefuroxime sodium]	Z79.2	Antibiotic	Bacterial infections
Zipsor [diclofenac potassium]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain and inflammation relief
Zithromax [azithromycin]	Z79.2	Antibiotic	Infections of the cervix, lower respiratory tract, skin and skin structures, urethra, nongonococcal; mycobacterium avium complex; pharyngitis, streptococcal pneumonia; tonsillitis
Zocor [simvastatin]		HMG-CoA reductase inhibitor (statin)	Hypercholesterolemia; hyperlipidemia; hyperlipoproteinemia; hypertriglyceridemia
Zoladex [goserelin acetate]	Z79.818	Agents affecting estrogen receptors and estrogen levels	Palliative treatment of prostate cancer and breast cancer symptoms; endometriosis
Zoloft [sertraline hydrochloride]		Antidepressant	Anxiety with panic disorder and depression; obsessive-compulsive disorder
Zometa [zoledronic acid]	Z79.83	Bisphosphonate	Multiple myeloma; Paget's disease
Zorvolex [diclofenac]	Z79.1	Nonsteroidal anti-inflammatory drug (NSAID)	Pain, inflammation or fever relief
Zosyn [piperacillin sodium/tazobactam sodium]	Z79.2	Antibiotic	Bacterial infections
Zovia [ethynodiol diacetate/ethinyl estradiol]	Z79.3	Contraceptive	Prevention of pregnancy
Zovirax [acyclovir]		Antiviral	Genital herpes and herpes zoster infections
Zubsolv [buprenorphine/naloxone]		Opioid agonist	Treatment of opioid addiction
Zyban [bupropion hydrochloride]		Smoking cessation aid	Nicotine addiction, smoking
Zyflo [zileuton]		Antiasthmatic	Asthma
Zyloprim [allopurinol]		Antigout	Gouty arthritis, renal calculus, hyperuricemia, hyperuricemia secondary to leukemia, hyperuricemia secondary to lymphoma
Zyprexa [olanzapine]		Antipsychotic/antimanic	Psychotic disorders; schizophrenia
Zyrtec allergy [cetirizine hydrochloride]		Antihistamine	Perennial and seasonal allergic rhinitis; chronic urticaria

Appendix D: Major Complication and Comorbidity (MCC) Code List

Note: The following is a comprehensive list of ICD-10-CM codes designated as MCCs in the tabular section of this manual. Codes listed in this resource and identified as MCCs in the tabular section reflect the most current information that was available at the time of publication. Because the fiscal 2021 IPPS final rule was not available at the time this book was printed, the ICD-10-CM codes designated as MCCs are based on the proposed, version 38, MS-DRG Grouper software and Definitions Manual files published with the fiscal 2021 IPPS proposed rule.

For the most current list of MCC designations based on the final version of the MS-DRG Grouper software and MS-DRG Definitions Manual files, Optum360 has provided an easily searchable data file that can be accessed at the following:

Appendix E: Complication and Comorbidity (CC) Code List

Note: The following is a comprehensive list of ICD-10-CM codes designated as CCs in the tabular section of this manual. Codes listed in this resource and identified as CCs in the tabular section reflect the most current information that was available at the time of publication. Because the fiscal 2021 IPPS final rule was not available at the time this book was printed, the ICD-10-CM codes designated as CCs are based on the proposed, version 38, MS-DRG Grouper software and Definitions Manual files published with the fiscal 2021 IPPS proposed rule.

For the most current list of CC designations based on the final version of the MS-DRG Grouper software and MS-DRG Definitions Manual files, Optum360 has provided an easily searchable data file that can be accessed at the following:

Appendix F: Present on Admission (POA) Tutorial

Present-on-admission (POA) indicators are required on all diagnoses and external cause-of-injury codes for all inpatient acute care hospital discharges, according to the requirement outlined in the Deficit Reduction Act of 2005, section 5001(c). The only exception is for a select group of codes that have been designated as exempt from the POA regulations. Certain facilities are also exempt from this reporting requirement and include the following:

- Critical access hospitals
- Long-term care hospitals
- Cancer hospitals
- Inpatient psychiatric hospitals
- Inpatient rehabilitation facilities
- Veterans Administration/Department of Defense Hospitals
- Children's inpatient facilities

The POA indicator guidelines are not intended to replace the official *ICD-10-CM Official Guidelines for Coding and Reporting*. Nor will the POA guidelines supersede the Uniform Hospital Discharge Data Set (UHDDS) definition of principal diagnosis, defined as the condition established after study to be chiefly responsible for occasioning the admission of the patient to the hospital. The definition of "additional diagnoses" also remains the same. Coders must report all conditions that coexist at the time of admission, develop subsequently, or that affect the treatment received and/or the length of stay. This significantly affects assignment of the POA indicators. Because the POA indicator should accurately reflect the patient's conditions upon admission, review of POA guidelines as well as the *ICD-10-CM Official Guidelines for Coding and Reporting* is required.

The following is a summary of the POA guidelines:

- A POA condition is defined not only as one that is clearly present at the time of admission, but also one that was clearly present but not diagnosed until after the time of admission.
- Present on admission is defined as present at the time the order for an inpatient admission is made, whether or not the patient's episode of care originated in the emergency department, ambulatory surgery area, or other outpatient area. Conditions that develop during an outpatient encounter are considered present on admission.
- A POA indicator is assigned to the principal diagnosis, secondary diagnoses, and the external cause-of-injury codes.
- The POA guidelines are not intended to replace any of the other *ICD-10-CM Official Guidelines for Coding and Reporting*.
- The intent of the POA guidelines is not to determine whether or not a condition should be coded, but rather how to apply the POA indicator.

The following reporting options, with definitions, should be used to indicate whether a condition was POA:

- Y Yes: Present at the time of inpatient admission
N No: Not present at the time of inpatient admission
U Unknown: Documentation is insufficient to determine if condition is present at the time of inpatient admission
W Clinically undetermined: Provider is unable to clinically determine whether condition was or was not present at the time of inpatient admission

Unreported/not used—(exempt from POA reporting)—Most ICD-10-CM codes require the assignment of a POA indicator. However, there are some diagnoses that are considered exempt from the POA reporting. For these exempt conditions the POA field should be left blank.

Timeframe for POA identification and documentation

There is no timeframe during the encounter in which a condition must be diagnosed to be considered present on admission. In many cases, it is not clinically possible for the provider to determine a definitive diagnosis until well into the admission, after labs, imaging, and other tests have been

performed and results examined. In these cases the condition is still considered to be present on admission, indicated with Y.

Examples

- A patient was admitted for diagnostic work-up for cachexia. The final diagnosis was malignant neoplasm of lung with metastasis.
Assign Y in the POA field for the malignant neoplasm, which was clearly present on admission, although it was not diagnosed until after the admission occurred.
- A patient with severe cough and difficulty breathing was diagnosed during his hospitalization to have lung cancer.
Assign Y in the POA field for the lung cancer. Even though the cancer was not diagnosed until after admission, it is a chronic condition that was clearly present before the patient's admission.
- A urine culture was obtained on admission. The provider documented urinary tract infection when the culture results became available a few days later.
Assign Y to the urinary tract infection since the diagnosis is based on test results from a specimen obtained on admission. It may not be possible for a provider to make a definitive diagnosis for a period of time after admission. There is no required timeframe as to when a provider must identify or document a condition for it to be considered present on admission.

Condition is on the "Exempt from Reporting" list

The POA field is left blank for codes excluded from POA reporting.

Examples

- A patient was admitted for inpatient surgery on a burn contracture from scar tissue from a burn five years ago.
Assign Y for the principal condition of the scar; however, the secondary code for the specifics of the burn injury with a seventh character for sequela is left blank since it is excluded from POA reporting.
- A patient was admitted to inpatient for a PEG tube insertion because of residual dysphagia due to a recent CVA.
No POA indicator is assigned for the dysphagia following a CVA. Codes under I69.- are defined as sequela of cerebrovascular disease and are exempt from POA reporting.
- A patient was admitted to inpatient for corrective surgery for a malunion of a closed femur fracture.
No POA indicator is assigned for the malunion of a closed fracture because the seventh character for malunion of fractures is considered a subsequent encounter and is exempt from POA reporting.
- A patient was admitted for breast reconstruction following mastectomy.
The POA indicator field is left blank as this Z code is exempt from POA reporting.
- A patient was admitted for changing the battery in his AICD as it is at the end of its useful life.
The POA indicator field is left blank as this Z code is exempt from POA reporting.

POA explicitly documented

If the provider explicitly documents a condition as being present on admission or not present on admission, assign the appropriate Y or N POA indicator based on that documentation. If there is conflicting documentation by different providers, query the attending physician.

Examples

- Even though sepsis is not diagnosed in the ED, the discharge summary states that the patient presented with sepsis at the time of admission.
The provider explicitly stated that the sepsis was present on admission and therefore the Y POA indicator should be used.
- The patient was admitted with chills and cough and two days later diagnosed with pneumonia. The discharge summary documents that the pneumonia was not present on admission.
Although the patient showed some symptoms of pneumonia on admission, the provider may have clinical evidence (e.g., chest x-rays, cultures) that indicates that pneumonia did not develop until after admission. Since this

was explicitly stated in the discharge summary, the appropriate POA indicator is N.

- A consult note states that a patient came in with renal failure while the discharge summary states that the renal failure was not present on admission.

When in doubt and there is conflicting documentation, query the attending physician.

Conditions diagnosed prior to inpatient admission

Conditions that were diagnosed prior to admission—for example, chronic conditions such as hypertension, diabetes, and asthma—are assigned the POA indicator of Y. A tip to help establish that a condition was POA is to check the patient's medication history for drugs that are routinely prescribed for these types of chronic conditions.

Examples

- The history and physical states that the patient has a history of hypertension and seizure disorder, and it is noted that the patient is currently on Atenolol and Dilantin.

The hypertension and seizure disorder existed prior to admission; therefore, the appropriate POA indicator is Y. Verification that the patient is on long-term use of Atenolol and Dilantin can help solidify that these conditions are currently being treated.

- A 56-year-old male was admitted as an inpatient for multi-trauma wounds. Because the patient was unconscious on admission, his medical history was unknown. A progress note two days into the stay noted that the patient was on Metformin for history of type 2 diabetes.

The timeframe of the diagnosis is irrelevant to POA. Even though it was not discovered until two days into the encounter that the patient had a history of DM2, the DM2 was still present prior to this admission and would be identified as such with the Y POA indicator.

- A patient was admitted to an inpatient facility from the ED. The admitting provider indicated that the patient had a current history of lung cancer and chronic kidney disease.

Both of these conditions are indicated with Y, present on admission.

- During the course of an eight-day inpatient stay with surgery, a patient was diagnosed postoperatively with hypertension and discharged on Metoprolol.

The hypertension was not diagnosed prior to admission and would be reported with an N POA indicator.

Conditions diagnosed during the admission but clearly present before admission

The POA indicator Y is assigned for conditions that clearly presented with applicable signs and symptoms but may have not been definitively diagnosed until later on, or even at the end of the encounter. Even if the presenting diagnosis was documented on admission as suspected, possible, or rule out, or written as a differential diagnosis and later confirmed, it is still considered present on admission.

Examples

- A patient was admitted with jaundice, fatigue, and mental confusion. Differential diagnosis on admission lists possible liver failure. The definitive diagnosis of liver failure is not made until two days after admission.

Assign Y to the liver failure since the symptoms were present on admission and the differential diagnosis listed "possible" liver failure on admission even though the final diagnosis was two days later.

- An aid worker recently returned from Afghanistan presents to the ED with hematemesis, chest pain, and fever. Patient is put into inpatient isolation with suspected TB documented on the H & P. TB is confirmed the next day.

The POA indicator Y is assigned because, even though the TB was only "suspected" on admission, it was confirmed the next day.

Condition develops during outpatient encounter prior to inpatient admission

Assign Y for any condition that develops during an outpatient encounter such as same-day surgery, observation, or extended recovery prior to a written order for inpatient admission. This also pertains to conditions that develop in

facilities such as transitional care units, skilled nursing homes, long-term care, hospice, or rehabilitation facilities with the patient transferring to inpatient hospital admission.

Examples

- A patient underwent outpatient surgery. During the recovery period, the patient developed atrial fibrillation and was subsequently admitted to the hospital as an inpatient.

Assign Y on the POA field for the atrial fibrillation since it developed prior to a written order for inpatient admission.

- A patient was treated in observation and while in observation fell out of bed and broke a hip. The patient was subsequently admitted as an inpatient to treat the hip fracture.

Assign Y on the POA field for the hip fracture since it developed prior to a written order for inpatient admission.

- An elderly patient underwent outpatient surgery with plans to go home after the surgery. In recovery, the patient developed shortness of breath, chest pain, and fever. A sputum sample was taken, and the surgeon decided to admit the patient to inpatient. The next day the patient was diagnosed with staphylococcal pneumonia based on sputum results and admitting chest x-ray.

Assign Y to the staphylococcal pneumonia even though it was not diagnosed until the day following the admission. Even though the patient had undergone outpatient surgery, the sputum sample, signs, and symptoms were evident prior to the inpatient admission.

Documentation does not indicate whether condition was present on admission

If the documentation in the medical record is unclear as to the presence of a condition on admission, assign a U for unknown. This should be used sparingly and, if possible, the physician should be queried for further clarification.

Example

- A wheelchair-bound patient was admitted in respiratory failure from a long-term care facility to an inpatient hospital with severe aspiration pneumonia. A progress note three days into the admission listed a pressure ulcer stage 2 on the lower back.

Assign U for the stage 2 pressure ulcer if unknown whether it was present on admission. Since the patient was wheelchair-bound and critically ill on admission, it is possible that the ulcer was present and not immediately addressed. The admitting physician can be queried to clarify, or a U is assigned if that is not possible.

Documentation states it cannot be determined whether the condition was or was not present on admission

A W is assigned when the documentation states that it cannot be clinically determined whether the condition was POA or not.

Examples

- An elderly patient was admitted with multi-trauma injuries from a motor vehicle accident. Two days into the admission, a urinary tract infection was diagnosed. No labs or urine cultures had been taken on admission as focus was stabilization from traumatic wounds. Documentation from the provider in a progress note stated that it was not clinically possible to determine whether the UTI was present on admission.

Assign W for the UTI as it was specifically stated that it was not clinically possible to determine whether it was present on admission.

- A patient was admitted with high fever and pneumonia. The patient rapidly deteriorated and became septic. The discharge diagnosis listed sepsis and pneumonia. The documentation was unclear as to whether the sepsis was present on admission or developed shortly after admission.

Query the physician as to whether the sepsis was present on admission, developed shortly after admission, or it cannot be clinically determined as to whether it was or was not present on admission.

Chronic condition with acute exacerbation during the admission

If a single code identifies only the chronic condition and not the acute exacerbation, assign Y. For instance, when there is no code for the acute exacerbation of a chronic condition as in acute exacerbation of chronic leukemia, the Y is assigned for the chronic leukemia.

For a single combination code that identifies both the chronic and acute exacerbation, see the combination code instructions.

Example

- Documentation on admission stated that the patient had chronic myelomonocytic leukemia. A progress note three days into the stay stated that the patient had, since admission, developed an acute exacerbation of his myelomonocytic leukemia.

There is no code for an acute exacerbation of chronic myelomonocytic leukemia; therefore, assign Y since the chronic leukemia (either not specified as in remission, or in relapse) is represented by a single code and was present on admission.

Acute and chronic conditions

Assign Y to acute conditions present on admission and N to acute conditions not present at the time of admission.

Assign Y to conditions specified as chronic, even though they may not be diagnosed until after admission.

See the POA guideline "Codes that contain multiple clinical concepts" for a single code that identifies both the acute and chronic condition.

Examples

- A patient was admitted to the hospital for coronary artery bypass surgery. Postoperatively he developed a pulmonary embolism.
Assign N in the POA field for the pulmonary embolism. This is an acute condition that was not present on admission.
- A patient admitted with sepsis due to pneumonia with acute respiratory failure, developed acute renal failure on day three.
Assign Y for the sepsis, pneumonia, and acute respiratory failure, which were all acute conditions, present on admission. Assign N for the acute renal failure; even though it is an acute condition, it was not present until after the patient was admitted.
- A patient admitted with hypoglycemia, weakness, confusion, and slurred speech was diagnosed the next day with type 2 diabetes.
Assign Y to the type 2 diabetes since it is a chronic condition that was present on admission, even though it was not diagnosed until the next day.

Codes that contain multiple clinical concepts

If at least one of the clinical concepts included in a code was not present on admission, assign N. If all the clinical concepts included in a code are present on admission, assign Y.

Examples

- Patient has history of gastrojejunal ulcer which started bleeding two days into the encounter.
Assign a POA indicator of N to chronic gastrojejunal ulcer with bleeding; although the gastrojejunal ulcer is a chronic condition that was present at the time of admission, the bleeding did not occur until after the admission.
- A patient with chronic diastolic heart failure decompensated after admission.
Assign N to the code for acute on chronic diastolic (congestive) heart failure. Although the heart failure was present on admission, the acute decompensation of the failure was not.
- A patient with viral hepatitis B progressed to hepatic coma after admission.
Assign N for the viral hepatitis B with hepatic coma because a condition described by part of the code description did not develop until after admission.
- A patient with known systolic congestive heart failure was admitted to the hospital with decompensated systolic heart failure.

Assign Y in the POA field for the acute on chronic systolic (congestive) heart failure as both the chronic and acute parts of the condition were present on admission.

Assign Y for infection codes that include the organism if the infection was present on admission even though the culture results are not available until after admission.

Example

- A patient was septic on admission with blood, sputum, and urine cultures taken. Two days later, *E. coli* was determined to be the causal organism.

Assign Y even though the test results were not confirmed until after admission.

Conditions documented as possible, probable, suspected, or rule out at the time of discharge or conditions documented as impending or threatened at the time of discharge

If the final diagnosis contains language identifying a condition as possible, probable, suspected, or rule out, or as an impending or threatened diagnosis but the diagnosis is based on signs and symptoms that were present on admission, the POA indicator is Y. If those signs and symptoms were not present on admission, the appropriate POA indicator is N.

Examples

- A patient underwent inpatient surgery, after which the patient developed fever and was treated aggressively. The physician's final diagnosis documented "possible postoperative infection following surgery."
Assign N on the POA field for the postoperative infection since final diagnoses that contain the terms "possible," "probable," "suspected," or "rule out" and that are based on symptoms or clinical findings that were not present on admission should be reported as N.
- A patient with prior cardiac intervention history was admitted with chest pain. After two days, the chest pain diminished with no underlying cause found. The discharge summary stated, "Suspected costochondritis or coronary artery spasm. Pain resolved. Follow up at regular cardiology office visit."
Since the chest pain was present on admission, both suspected conditions of costochondritis and coronary artery spasm are represented by the POA indicator of Y.
- A patient was admitted with a known history of coronary atherosclerosis, status post myocardial infarction five years ago, and was then admitted for treatment of impending myocardial infarction. The patient was transferred to a larger facility with a cath lab. The final diagnosis was documented as "impending myocardial infarction."
Assign Y to the impending myocardial infarction because the condition is present on admission.

Same diagnosis code for two or more conditions

When two or more separate conditions are classified to the same diagnosis code in the same encounter, assign Y if all conditions represented by the single code were present on admission and N if any of the conditions were not present on admission.

Examples

- A patient was admitted with diabetes type 2 with ketoacidosis.
Assign Y since both the diabetes and ketoacidosis were present on admission.
- A patient involved in a car accident was admitted with hemorrhage to the abdomen secondary to the trauma; shortly after being admitted the patient also developed a seroma as a result of the trauma.
The secondary traumatic hemorrhage was present on admission, and the traumatic seroma did not develop until after admission. Both of these conditions are classified to one code, but because both conditions were not present when the patient was admitted, a POA of N should be assigned.

Obstetrical conditions

The POA assignment for obstetrical conditions is not affected by whether the patient delivers during the encounter but rather by whether the pregnancy

complication was or was not present at the time of admission. If two or more conditions are classified to a single code, all conditions represented by that single code must be present on admission to correctly assign a Y. If all conditions are not present at the time of admission, the appropriate POA indicator is N. Several obstetrics codes are listed in the POA exclusion list; for obstetrics codes that are not on the exclusion list, all applicable POA guidelines apply.

Examples

- A female patient was admitted to the hospital and underwent a normal delivery.

Leave the "present on admission" (POA) field blank. Code O80 Normal delivery, is on the "exempt from reporting" list.

- A patient was admitted in late pregnancy due to excessive vomiting and dehydration. During admission, the patient went into premature labor.

Assign Y for the excessive vomiting and the dehydration. Assign N for the premature labor.

- A patient was admitted in active labor. During the stay, a breast abscess was noted when the mother attempted to breastfeed. The provider was unable to clinically determine whether the abscess was present on admission.

Assign W for the breast abscess since the provider was unable to clinically determine whether the abscess was present on admission.

- A patient was admitted in active labor. After 12 hours of labor, it was noted that the infant was in fetal distress, and a cesarean section was performed.

Assign N for the fetal distress even if it is used for the principal diagnosis, since it did not develop until later in the admission. In obstetrics cases, the principal diagnosis may have a POA indicator of N.

Perinatal and congenital conditions

Newborns are not considered admitted until after birth; therefore all conditions that develop in utero, occur during delivery, or are present at birth are represented by the POA indicator Y. Any conditions that develop after birth and admission are represented by N.

All congenital conditions and anomalies not found in chapter 17 should have a POA indicator of Y assigned. Chapter 17 codes in categories Q00–Q99 are exempt from POA reporting. All congenital conditions, regardless of the coding chapter to which they are assigned, are considered present on admission.

Examples

- A single liveborn infant was delivered in the hospital via cesarean section. The physician documented fetal bradycardia during labor as the final diagnosis in the newborn record.

Assign Y because the bradycardia developed prior to the newborn admission (birth).

- A newborn developed diarrhea, which was believed to be due to the hospital baby formula.

Assign N because the diarrhea developed after admission.

- A newborn was diagnosed with cephalhematoma due to birth injury.

Assign Y because the injury occurred during delivery.

- A newborn was diagnosed with congenital pneumonia.

Assign Y for the congenital pneumonia. Congenital conditions from chapter 16 are always considered present on admission and require the POA indicator.

- A newborn was diagnosed with congenital hydrocephalus.

There should be no POA indicator assigned. This condition is coded in chapter 17 and is excluded from POA reporting.

- A 10-year-old boy was admitted for complications of spina bifida with hydrocephalus.

No POA indicator is assigned. This condition is coded in chapter 17 and is excluded from POA reporting.

External cause and injury codes

If an injury or poisoning occurred prior to or at the time of admission and the seventh character indicates an initial encounter or active treatment, the code for the injury/poisoning is reported with POA indicator Y. Injury and poisoning codes S00–T88 with the seventh character indicating subsequent or sequela

are exempt from POA indicators since, in order to be a subsequent or sequela encounter, the condition must have occurred before the admission. Many of the external causes of morbidity codes from chapters V, W, and X are also exempt from POA reporting when the seventh character of S or D, representing subsequent or sequela encounters, are used.

Coders should be extremely careful in assigning the appropriate POA indicator if a patient suffers an injury while an inpatient. For example, if a patient falls from the hospital bed and fractures a hip, the codes representing that injury (along with the appropriate initial-encounter seventh character) should be assigned N for the corresponding POA indicator.

Examples

- A 12-year-old was admitted for treatment of fractured arm from falling out of a tree house.

The injury itself and the cause of the injury are both assigned a Y POA indicator.

Note: The injury code and external cause code POA indicators should always match.

- A patient admitted for pneumonia sustained a laceration of the right arm after falling and hitting his arm against a cart in the hospital room, requiring stitches.

Assign N for the laceration for the right arm because it was not present on admission. The external cause code POA indicator should also be N.

- A patient was admitted for manipulation of a knee contracture due to a scar from a burn injury 10 years ago.

Assign Y for the code for the scar, but leave blank the POA indicator for the burn injury with the seventh character of 5 for sequela. Sequela and subsequent-encounter codes in chapter 19 are exempt from POA reporting.

Appendix G: Hospital Acquired Conditions

Hospital-acquired conditions (HACs) are conditions considered reasonably preventable through the application of evidence-based guidelines. These conditions, in and of themselves, are either a complication or comorbidity (CC) or major complication or comorbidity (MCC) that as a secondary diagnosis will move the MS-DRG assignment from a lower-paying MS-DRG to a higher-paying MS-DRG. However, if these conditions are not present on admission (meaning they developed during the hospital stay), the CC or MCC designation is nullified and the case will not group to the higher-paying MS-DRG based solely upon the reporting of the HAC code.

HACs are grouped into 14 categories. ICD-10-CM codes in the tabular section of this book that are grouped to one of these HAC categories are identified by an icon specific to that category. As many of these HACs are conditional, this resource provides any additional stipulations that may be required before the code can be considered a HAC. For example, code I26.02 has an **H10** indicating it falls in the HAC 10 category for Deep Vein Thrombosis (DVT) or Pulmonary Embolism (PE) with Total Knee or Hip Replacement. However I26.02 is not, by itself, a HAC there must also be a specific ICD-10-PCS code, such as 0SR9019 Replacement of Right Hip Joint with Metal Synthetic Substitute, Cemented, Open Approach, applied in order for I26.02 to act as a HAC.

Note: The resource used to compile this list is based on the proposed, version 38, MS-DRG Grouper software and Definitions Manual files published with the fiscal 2021 IPPS proposed rule. The final, version 38, MS-DRG Grouper files and MS-DRG Definitions Manual files can be found at the following: <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/PPS-Regulations-and-Notices.html>.

Appendix H: Centers for Medicare & Medicaid Services Hierarchical Condition Categories (CMS-HCC)

In the 1970s, Medicare began demonstration projects that contracted with health maintenance organizations (HMOs) to provide care for Medicare beneficiaries in exchange for prospective payments. In 1985, this project changed from demonstration status to a regular part of the Medicare program, Medicare Part C. The Balanced Budget Act (BBA) of 1997 named Medicare's Part C managed care program Medicare+Choice, and the Medicare Modernization Act (MMA) of 2003 again renamed it to Medicare Advantage (MA).

Medicare is one of the world's largest health insurance programs, and about one-third of the beneficiaries on Medicare are enrolled in a MA private health care plan. Due to the great variance in the health status of Medicare beneficiaries, risk adjustment provides a means of adequately compensating those plans with large numbers of seriously ill patients while not overburdening other plans that have healthier individuals. Medicare Advantage (MA) plans have been using the Hierarchical Condition Category (HCC) risk adjustment model since 2004.

The Risk Adjustment Model

The primary purpose of a risk adjustment model is to predict (on average) the future health care costs for specific consortiums enrolled in Medicare Advantage (MA) health plans. CMS is then able to provide capitation payments to these private health plans. Capitation payments are an incentive for health plans to enroll not only healthier individuals but those with chronic conditions or who are more seriously ill by removing some of the financial burden.

The MA risk adjustment model uses HCCs to assess the disease burden of its enrollees. HCC diagnostic groupings were created after examining claims data so that enrollees with similar disease processes, and consequently similar health care expenditures, could be pooled into a larger data set in which an average expenditure rate could be determined. The medical conditions included in HCC categories are those that were determined to most predictably affect the health status and health care costs of any individual. Several important principles to the risk adjustment model and the development of the HCC categories include but are not limited to:

1. The HCC diagnostic categories should be clinically meaningful.
 - Diagnostic categories are well-defined.
 - Clinically specific diseases or medical conditions are grouped to each category.
2. The HCC diagnostic categories should predict medical expenditures.
 - The diagnoses grouped to a specific category should have as close to the same cost burden not only in the current year but also in the future.
3. The HCC diagnostic categories should have adequate sample sizes and discretionary categories excluded to be as accurate and stable in their estimate of costs as possible.
 - A diagnostic category that groups extremely rare diseases or conditions would not be reliably effective in determining current or future costs.
 - Codes that are not credible as cost predictors or may be subject to coding variation should be excluded, when possible.
4. The HCC diagnostic categories should be both hierarchical and additive.
 - Hierarchical measurement is used within a specific disease process.
 - Disease processes that are unrelated to each other are measured additively.
5. The diagnostic classification should encourage specificity and should not reward coding proliferation.
 - More diagnosis codes and vague diagnosis codes do not equal greater disease burden.

More than 10,000 ICD-10-CM diagnosis codes map to 86 HCCs in the current risk adjustment model. Diagnoses are excluded from mapping when they do not predict future cost or are vague or variable in diagnosis, coding, or treatment, such as symptoms or osteoarthritis. Also excluded are diagnosis codes from laboratories, radiology, and home health claims.

Risk Adjustment Factors

The CMS-HCC risk adjustment model uses "risk adjustment factors" to calculate a risk score for each member. This score summarizes that particular patient's

expected cost of care relative to other members'. Each member's risk score is based on demographic and health status information and is calculated as the sum of these demographic and health factors weighted by their estimated marginal contributions to total risk. The model also takes into account where the patient resides (community or institutional), Medicaid eligibility (full or partial benefits), the patient's Medicare enrollment status (new or established), age, disability status, whether the patient is frail or has end-stage renal disease (ESRD), and even prescription drug use.

No procedure codes, ICD-10-PCS or CPT, are included in the MA risk adjustment model. The model relies solely on diagnostic and demographic data. Not all ICD-10-CM diagnoses map to an HCC, and there is no specific code sequencing involved. The CMS-HCC model is additive as well as hierarchical. The additive functionality allows a patient to have more than one HCC category assigned, providing a more complete clinical picture and prediction of resource consumption. The hierarchical aspect of the model provides a means of ranking diagnoses that are similar in disease process, by severity. The hierarchy of the condition categories ensures the patient's conditions are classified to the most severe condition within the related group. Less severe conditions within a particular hierarchy are superseded by more severe diagnoses within the same group. The hierarchy and additive relationship permits this model to characterize the person's illness level within each disease process, while still allowing the effects of unrelated disease processes to be counted in the patient's overall score.

Certain combinations of coexisting diagnoses for an individual can increase medical costs. The CMS-HCC model adjusts for these higher costs by the addition of "disease interaction" factors. For each patient, multiple HCCs assigned, along with demographic and disease interaction factors, are used to calculate a single, combined risk adjustment factor (RAF). The RAF score for an individual member represents all of the HCCs that have been submitted from all sources for that member to CMS during the course of an entire calendar year.

There are separate CMS-HCC models for new enrollees and continuing enrollees. The new enrollee model uses demographic factors only, such as age, sex, and disability status, and is used when the enrollee has less than 12 months of medical history. The community model accounts for age, sex, original reason for Medicare entitlement (age or disability), Medicaid eligibility, and clinical conditions as measured by HCCs. In the second step, expected costs are adjusted for outliers based on the member's risk score and whether the patient has ESRD.

Demographic data (age, sex, eligibility) as well as health status (diagnoses codes submitted on claims to CMS) of an MA population are used to determine the reimbursement to the health plan to care for their members.

CMS considers a RAF score of 1.0 as the benchmark to indicate the score of the average healthy patient with the same demographic and diagnostic factors. These patients are expected to use average or lower-than-average resources. When the RAF score is higher than 1.0, CMS considers the patient to be sicker than the average patient with the same criteria and expects greater-than-average resource utilization.

A low RAF score may accurately indicate a healthier patient, but it may also falsely indicate a healthier patient due to incomplete or inaccurate coding, incomplete or insufficient record documentation, or patients who fail to complete an annual assessment.

A high RAF score may accurately indicate a sicker patient, or it may be falsely inflated from overcoding due to diagnoses that are reported but not documented, or from copying and pasting from previous encounters or problem lists of resolved conditions.

Documentation Requirements

Payment is made per HCC category (not per diagnosis code). No matter how many times in the year the diagnosis codes are reported, a single payment is made to the MA plan each year. Each year the list of HCCs and the RAF for each patient is "reset." This means the annual health assessment is extremely important, and adequate documentation is critical. Accurate risk adjustment payment relies on complete medical record documentation and diagnosis coding. CMS requires that all applicable diagnosis codes be reported and that all diagnoses be reported to the highest level of specificity and that these be substantiated by the medical record.

CMS's Guiding Principle:

The risk adjustment diagnosis must be based on clinical medical record documentation from a face-to-face encounter, coded according to the *ICD-10-CM Guidelines for Coding and Reporting*; assigned based on dates of service within the data collection period, submitted to the MA

organization from an appropriate risk adjustment provider type and an appropriate risk adjustment physician data source.

A “face-to-face” health service encounter between a patient and healthcare provider describes an encounter between the patient and the provider (MD, DO), including qualified nonphysician practitioners (NPP) (e.g. nurse practitioner or physician’s assistant), which is face-to-face with the patient. CMS provides a current listing of acceptable physician specialty types for risk adjustment data submission within the 2012 Regional Technical Assistance Participant Guide. The only exception to the face-to-face encounter requirement is pathology services (professional component only). Currently, CMS does not provide a listing of all services that are considered face-to-face visits for risk adjustment data, but does provide guidance on what types of services are not acceptable for risk adjustment in the Participant Guide. For example, diagnostic radiology does not qualify because diagnostic radiologists typically do not document confirmed diagnoses. Other examples of services that are not acceptable include diagnostic reports that have not been interpreted, such as laboratory reports.

It is essential that the medical record documentation show evidence by provider authentication that the direct face-to-face service was personally furnished by the physician or qualified NPP. Examples of these services include office visits, hospital visits, preoperative anesthesia assessment, and surgical and invasive procedures.

Risk adjustment relies on annual health information. Each enrollee is assigned an individual risk score based on the health status information obtained from the diagnosis codes on the claims. The CMS-HCC model relies on ICD-10-CM coding specificity for accurate risk adjustment by using the most specific code available that is substantiated by the documentation in the medical record. Providers should fully document and accurately code the evaluation and management of all severe and chronic conditions to ensure a full, complete, and accurate clinical record of the patient’s condition and reflect the work involved in caring for the patient, particularly those with complex and challenging health issues. All conditions affecting the treatment or management of the patient’s health should be documented at least once a year, as applicable to care provided, to accurately describe the true complexity and severity of the patient’s health. If the diagnosis coding on the claim is not accurate or complete, the claim may indicate that the provider did much less medical decision-making, evaluation, and management than was actually performed.

Documentation to support or validate risk adjustment conditions may be found anywhere in the note for the face-to-face encounter. It is important to ensure that the note accurately reflects all chronic conditions that affect the health and care of the patient. Each encounter must be unique and reflect only that visit as it occurred. Insufficient documentation influences the assignment of diagnosis codes and directly affects the patient’s risk score.

Documentation should properly validate all reported conditions. Each page of progress notes should be properly authenticated and include the patient’s name and the date.

Providers should document each clinical diagnosis to the highest degree of specificity per encounter, including all complications and/or manifestations, including clear links to causal conditions. Only confirmed conditions should be documented—no rule-out conditions or abnormal findings without clinical significance. All known conditions, including chronic conditions, that affect the care and treatment of the patient at least once per year should be noted.

Providers should specifically document the condition and clinical significance, and any pertinent changes, using terminology such as decreased, increased, worsening, improving, or unchanged, or abnormal findings.

Documentation Tips

- Document all cause-and-effect relationships.
- Report the most specific diagnosis code available that is supported by the documentation.
- Include all current diagnoses as part of the current medical decision-making, and document for every visit.
- Identify diagnoses that are current or chronic problems rather than a past medical history or previous resolved condition.
- Document history of heart attack, status codes, etc., that affect the patient’s care as “history of” or “PMH” when they no longer exist or are not current conditions.
- Ensure each progress note has the date, signature, and credentials/specialty.
- Document the thought processes used to assess each condition.
- Know high revenue HCCs that are often undiagnosed or undercoded.
- Avoid “unspecified” codes.

- Ensure the codes reported are accurate.
- Ensure each encounter is billed.
- Review rejection reports, and audit reports to assess risks.

Audits

Because reimbursement is by patient, rather than based on an average of the entire population, and is based upon documentation, there is the potential for upcoding. Audits are conducted by the MA plan and CMS recovery auditors.

Initial Validation Audit (IVA)

CMS requires that the MA plan validate HCCs. This is usually performed by an independent auditor working with the plan or a contracted vendor to validate the MA plan’s data submitted to CMS.

The MA plan submits the one best medical record that supports each HCC identified for the beneficiary.

Risk Adjustment Data Validation Audit

Risk adjustment data validation (RADV) audits were introduced in 2011 and updated for 2015. They are performed by CMS to validate the integrity and accuracy of risk-adjusted payments by verifying that the diagnosis codes the MA plans submit are supported by the medical record documentation for a member.

MA plans can be selected by CMS for RADV audits annually and if chosen are required to submit their members’ medical records to CMS. Providers are required to assist the MA plan by providing the medical record documentation included in the audit. Even though each diagnosis needs to be reported only once in a calendar year, during a RADV audit up to five dates of service may be submitted to support any one HCC.

To be validated, medical record documentation must meet certain criteria and standards. Even if the diagnosis is documented and coded correctly, any deficiency in the documentation can make the encounter and the HCC invalid. Diagnoses that cannot be validated are considered payment errors. The results of the audit are communicated to the MA plan, which then communicates these results to the provider. Under- and overpayments are subject to payment adjustment. The results of RADV audits can be extrapolated over the MA plan population to calculate potential payment errors and overpayments/recoverments. Regulations include a RADV appeal process, a document dispute process, and a procedure for obtaining physician-signature attestations.

The following items are reviewed during the validation process:

- The record is for the correct enrollee.
- The record is from the correct calendar year for the payment year being audited.
- The record is legible.
- The date of service is present on the records and is for a face-to-face visit.
- The record is from a valid provider type.
- Valid credentials and/or a valid physician specialty are documented on the record.
- The record contains a signature from an acceptable type of physician.
- There is a diagnosis on the record.
- The diagnosis supports an HCC.
- The diagnosis supports the submitted HCC.

Mitigate audit risk by coding each reportable diagnosis each time it meets reporting guidelines. Audit regularly to assess areas of risk and in need of improvement and to capture conditions documented but not coded. Check for additional qualifying HCCs. Ensure claims are submitted and that corrected claims are submitted when indicated. There are three claims submission deadlines: January, March, and September. CMS adjusts each member’s risk score twice a year, with the final reconciliation in August of the year after the plan year.

If providers emphasize correct coding and documentation and perform internal audits to determine where the risks are and prepare for audits, incorrect payment is less likely.

For additional information on risk adjustment coding, see Optum360’s *Risk Adjustment Coding and HCC Guide*.

Appendix I: Long-term Care Hospital Prospective Payment System Overview

Information in this appendix is based on the Centers for Medicare and Medicaid Services (CMS) FY 2021 long-term care hospital prospective payment system (LTCH PPS) proposed rule published in the *Federal Register*, volume 85, number 104, May 29, 2020 ("Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and Proposed Policy Changes and Fiscal Year 2021 Rates").

Classification As a Long-term Care Hospital

Under the regulations at § 412.23(e)(1), to qualify to be paid under the long-term care hospital prospective payment system (LTCH PPS), a hospital must have a provider agreement with Medicare. Furthermore, § 412.23(e)(2)(i), which implements section 1886(d)(1)(B)(iv) of the Social Security Act, requires that a hospital have an average Medicare inpatient length of stay of greater than 25 days to be paid under the LTCH PPS. In accordance with section 1206(a)(3) of the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67), as amended by section 15007 of Public Law 114–255, CMS amended the regulations to specify that Medicare Advantage plans' and site-neutral payment rate discharges are excluded from the calculation of the average length of stay for all LTCHs, for discharges occurring in cost reporting period beginning on or after October 1, 2015.

The following hospitals are paid under special payment provisions, as described in § 412.22(c) and, therefore, are not subject to the LTCH PPS rules:

- Veterans Administration hospitals
- Hospitals that are reimbursed under state cost control systems approved under 42 CFR part 403
- Hospitals that are reimbursed in accordance with demonstration projects authorized under section 402(a) of the Social Security Amendments of 1967 (Pub. L. 90–248) (42 U.S.C. 1395b–1), section 222(a) of the Social Security Amendments of 1972 (Pub. L. 92–603) (42 U.S.C. 1395b–1 (note)) (statewide all-payer systems, subject to the rate-of-increase test at section 1814(b) of the Act), or section 3201 of the Patient Protection and Affordable Care Act (Pub. L. 111–148 (42 U.S.C. 1315a))
- Nonparticipating hospitals furnishing emergency services to Medicare beneficiaries

Proposed Medicare Severity Long-Term Care Diagnosis-Related Group Classification and Relative Weights for FY 2021

Background

Section 123 of the BBRA required that the secretary of the Department of Health and Human Services implement a PPS for LTCHs to replace the cost-based payment system under TEFRA. Section 307(b)(1) of the BIPA modified the requirements of section 123 of the BBRA by requiring that the HHS secretary examine the feasibility and impact of basing payment under the LTCH PPS on the use of existing (or refined) hospital DRGs that have been modified to account for different resource use of LTCH patients.

When the LTCH PPS was implemented for cost reporting periods beginning on or after October 1, 2002, CMS adopted the same DRG patient classification system used at that time under the IPPS. As a component of the LTCH PPS, CMS referred to this patient classification system as the "long-term care diagnosis-related groups (LTC-DRGs)." Although the patient classification system used under both the LTCH PPS and the IPPS are the same, the relative weights are different. The established relative weight methodology and data used under the LTCH PPS result in relative weights under the LTCH PPS that reflect the differences in patient resource use of LTCH patients, consistent with section 123(a)(1) of the BBRA (Pub. L. 106–113).

As part of CMS' efforts to better recognize severity of illness among patients, in the FY 2008 IPPS final rule with comment period (72 FR 47130), the MS-DRGs and the Medicare severity LTC-DRGs (MS-LTC-DRGs) were adopted under the IPPS and the LTCH PPS, respectively, effective beginning October 1, 2007 (FY 2008). (CMS noted, in that same final rule, that it revised the regulations at § 412.503 to specify that for LTCH discharges occurring on or after October 1, 2007, when applying the provisions of 42 CFR part 412, subpart O, applicable to LTCHs for policy descriptions and payment calculations, all references to LTC-DRGs would be considered a reference to MS-LTC-DRGs.

The MS-DRG classifications are updated annually. There are currently 761 MS-DRG groupings. For FY 2021, there would be 767 MS-DRG groupings based on the proposed changes. Consistent with section 123 of the BBRA, as amended by section 307(b)(1) of the BIPA, and § 412.515 of the regulations, CMS used information derived from LTCH PPS patient records to classify LTCH discharges into distinct MS-LTC-DRGs based on clinical characteristics and estimated resource needs. Then CMS assigned an appropriate weight to the MS-LTC-DRGs to account for the difference in resource use by patients exhibiting the case complexity and multiple medical problems characteristic of LTCHs.

For FY 2021, CMS is proposing to continue to use existing methodology to determine the MS-LTC-DRG relative weights. As previously established when CMS implemented the dual-rate LTCH PPS payment structure codified under § 412.522, which began in FY 2016, CMS is proposing that the annual recalibration of the MS-LTC-DRG relative weights be determined: (1) using only data from available LTCH PPS claims that (1) would have qualified for payment under the new LTCH PPS standard federal payment rate if that rate had been in effect at the time of discharge when claims data from time periods before the dual-rate LTCH PPS payment structure applies are used to calculate the relative weights; and (2) qualify for payment under the new LTCH PPS standard federal payment rate when claims data from time periods after the dual-rate LTCH PPS payment structure applies are used to calculate the relative weights (80 FR 49624). That is, under the current methodology, MS-LTC-DRG relative weight calculations do not use data from cases paid at the site-neutral payment rate under § 412.522(c)(1) or data from cases that would have been paid at the site-neutral payment rate if the dual-rate LTCH PPS payment structure had been in effect at the time of that discharge. In addition, for FY 2021, CMS is proposing to continue to exclude the data from all-inclusive rate providers and LTCHs paid in accordance with demonstration projects, as well as any Medicare Advantage claims from the MS-LTC-DRG relative weight calculations.

Furthermore, for FY 2021, in using data from applicable LTCH cases to establish MS-LTC-DRG relative weights, CMS is proposing to continue to establish low-volume MS-LTC-DRGs (that is, MS-LTC-DRGs with less than 25 cases) using existing quintile methodology in determining the MS-LTC-DRG relative weights because LTCHs do not typically treat the full range of diagnoses as do acute care hospitals. Therefore, for purposes of determining the relative weights for the large number of low-volume MS-LTC-DRGs, CMS grouped all of the low-volume MS-LTC-DRGs into five quintiles based on average charges per discharge. Then, under the existing methodology, CMS accounted for adjustments made to LTCH PPS standard federal payments for short-stay outlier (SSO) cases (that is, cases for which the covered length of stay at the LTCH is less than or equal to five-sixths of the geometric average length of stay for the MS-LTC-DRG), and adjustments made to account for nonmonotonically increasing weights, when necessary. The methodology is premised on more severe cases under the MS-LTC-DRG system requiring greater expenditure of medical care resources and higher average charges such that, in the severity levels within a base MS-LTC-DRG, the relative weights should increase monotonically with severity from the lowest to highest severity level.

Patient Classifications into MS-LTC-DRGs

The MS-DRGs (used under the IPPS) and the MS-LTC-DRGs (used under the LTCH PPS) are based on the CMS DRG structure. As noted previously in this section, CMS refers to the DRGs under the LTCH PPS as MS-LTC-DRGs although they are structurally identical to the MS-DRGs used under the IPPS. The MS-DRGs are organized into 25 major diagnostic categories (MDCs), most of which are based on a particular organ system of the body; the remainder involve multiple organ systems (such as MDC 22 Burns). Within most MDCs, cases are then divided into surgical DRGs and medical DRGs. Surgical DRGs are assigned based on a surgical hierarchy that orders operating room (O.R.) procedures or groups of O.R. procedures by resource intensity. The GROUPEX software program does not recognize all ICD-10-PCS procedure codes as procedures affecting DRG assignment. That is, procedures that are not surgical (for example, EKGs), or minor surgical procedures (for example, a biopsy of skin and subcutaneous tissue (procedure code 0JBH3ZX)) do not affect the MS-LTC-DRG assignment based on their presence on the claim.

Generally, under the LTCH PPS, a Medicare payment is made at a predetermined specific rate for each discharge that varies based on the MS-LTC-DRG to which a beneficiary's discharge is assigned. Cases are classified into MS-LTC-DRGs for payment based on the following six data elements:

- Principal diagnosis
- Additional or secondary diagnoses
- Surgical procedures

- Age
- Sex
- Discharge status of the patient

The Health Information Portability and Accountability Act (HIPAA) requires covered entities to use the applicable medical data code set requirements when conducting HIPAA transactions (45 CFR 162.1000). Currently, upon the discharge of the patient, the LTCH must assign appropriate diagnosis and procedure codes from the most current version of ICD-10-CM for diagnosis coding and ICD-10-PCS for inpatient hospital procedure coding, both of which were required to be implemented October 1, 2015 (45 CFR 162.1002(c)(2) and (3)).

To create the MS-DRGs (and by extension, the MS-LTC-DRGs), base DRGs were subdivided according to the presence of specific secondary diagnoses designated as complications or comorbidities (CCs) into one, two, or three levels of severity, depending on the impact of the CCs on resources used for those cases. Specifically, there are sets of MS-DRGs that are split into two or three subgroups based on the presence or absence of a CC or a major complication or comorbidity (MCC).

Medicare administrative contractors (MAC) enter the clinical and demographic information submitted by LTCHs into their claims processing systems and subject this information to a series of automated screening processes called the Medicare Code Editor (MCE). These screens are designed to identify cases that require further review before being assigned into a MS-LTC-DRG. During this process, certain cases are selected for further explanation (74 FR 43949).

After screening through the MCE, each claim is classified into the appropriate MS-LTC-DRG by the Medicare LTCH Grouper software on the basis of diagnosis and procedure codes and other demographic information (age, sex, and discharge status). The Grouper software used under the LTCH PPS is the same software program used under the IPPS. Following the MS-LTC-DRG assignment, the MAC determines the prospective payment amount by using the Medicare Pricer program, which accounts for hospital-specific adjustments. Under the LTCH PPS, CMS provided an opportunity for LTCHs to review the MS-LTC-DRG assignments made by the MAC and to submit additional information within a specified timeframe as provided in § 412.513(c).

The Grouper software is used both to classify past cases to measure relative hospital resource consumption to establish the MS-LTC-DRG relative weights and to classify current cases for purposes of determining payment. The records for all Medicare hospital inpatient discharges are maintained in the MedPAR file. The data in this file are used to evaluate possible MS-DRG and MS-LTC-DRG classification changes and to recalibrate the MS-DRG and MS-LTC-DRG relative weights during the annual update under both the IPPS (§ 412.60(e)) and the LTCH PPS (§ 412.517), respectively.

Proposed Changes to the MS-LTC-DRGs for FY 2021

As specified by § 412.517(a), which require that the MS-LTC-DRG classifications and relative weights be updated annually, and consistent with our historical practice of using the same patient classification system under the LTCH PPS as is used under the IPPS, in FY 2021 proposed rule, CMS is proposing to update the MS-LTC-DRG classifications effective October 1, 2020 through September 30, 2021 (FY 2021), consistent with the proposed changes to specific MS-DRG classifications.

Accordingly, the proposed MS-LTC-DRGs for FY 2021 will be the same as the MS-DRGs that are being used under the IPPS for FY 2021. In addition, because the proposed MS-LTC-DRGs for FY 2021 are the same as the proposed MS-DRGs for FY 2021, the other proposed changes that affect MS-DRG (and by extension MS-LTC-DRG) assignments under proposed Grouper Version 38, including the proposed changes to the MCE software and the ICD-10-CM/PCS coding system, also are applicable under the LTCH PPS for FY 2021.

Development of the Proposed MS-LTC-DRG Relative Weights for FY 2021

CMS is proposing to continue to use current methodology to determine the MS-LTC-DRG relative weights for FY 2021, including the continued application of established policies related to the hospital-specific relative value methodology, the treatment of severity levels in the MS-LTC-DRGs, low-volume and no-volume MS-LTC-DRGs, adjustments for nonmonotonicity, the steps for calculating the MS-LTC-DRG relative weights with a budget neutrality factor, and only using data from applicable LTCH cases (which includes the policy of using only cases that would meet the criteria for exclusion from the site-neutral payment rate [or, for discharges occurring prior to the implementation of the dual-rate LTCH PPS payment structure, would have met the criteria for exclusion had those criteria been in effect at the time of the discharge]).

Data

For FY 2021 IPPS/LTCH PPS proposed rule, consistent with proposals regarding the calculation of the proposed MS-LTC-DRG relative weights for FY 2021, CMS obtained total charges from FY 2019 Medicare LTCH claims data from the December 2019 update of the FY 2019 MedPAR file, which are the best available data at this time, and is proposing to use version 38 of the Grouper to classify LTCH cases. Consistent with historical practice, CMS is proposing that if more recent data become available, that data would be used, with the finalized version 38 of the Grouper, in establishing the FY 2021 MS-LTC-DRG relative weights in the final rule.

To calculate the proposed FY 2021 MS-LTC-DRG relative weights under the dual-rate LTCH PPS payment structure, CMS is proposing to continue to use applicable LTCH data, which includes the policy of using only cases that meet the criteria for exclusion from the site-neutral payment rate (or would have met the criteria had they been in effect at the time of the discharge) (80 FR 49624). Specifically, CMS began by first evaluating the LTCH claims data in the December 2019 update of the FY 2019 MedPAR file to determine which LTCH cases would meet the criteria for exclusion from the site-neutral payment rate under § 412.522(b) or had the dual-rate LTCH PPS payment structure applied to those cases at the time of discharge. CMS identified the FY 2019 LTCH cases that were not assigned to MS-LTC-DRGs 876, 880, 881, 882, 883, 884, 885, 886, 887, 894, 895, 896, 897, 945, and 946, which identify LTCH cases that do not have a principal diagnosis relating to a psychiatric diagnosis or to rehabilitation and for which one of the following is true:

- The admission to the LTCH was “immediately preceded” by discharge from a subsection (d) hospital and the immediately preceding stay in that subsection (d) hospital included at least three days in an intensive care unit (ICU), as defined under the ICU criterion.
- The admission to the LTCH was “immediately preceded” by discharge from a subsection (d) hospital and the claim for the LTCH discharge includes the applicable procedure code that indicates at least 96 hours of ventilator services were provided during the LTCH stay, as defined under the ventilator criterion. Claims data from the FY 2019 MedPAR file that reported ICD-10-PCS procedure code 5A1955Z were used to identify cases involving at least 96 hours of ventilator services in accordance with the ventilator criterion. (CMS notes that, for purposes of developing the MS-LTC-DRG relative weights, it has previously addressed the treatment of cases that would have been excluded from the site-neutral payment rate under the statutory provisions that provided for temporary exception from the site-neutral payment rate under the LTCH PPS for certain spinal cord specialty hospitals or for certain severe wound care discharges from certain LTCHs provided by sections 15009 and 15010 of Pub. L. 114-255, respectively. This temporary exception from the site-neutral payment rate for certain spinal cord specialty hospitals is effective for discharges in cost reporting periods beginning during FYs 2018 and 2019, and the temporary exception from the site-neutral payment rate for certain severe wound care discharges from certain LTCHs was effective for a discharge in cost reporting period beginning during FY 2018. These statutory provisions will no longer be in effect for any discharges occurring in FY 2021 [that is, an LTCH with a cost reporting period that begins on the last day of FY 2019, on September 30, 2019, would end on September 29, 2020, the day before the start of FY 2021 on October 1, 2020]. Therefore, CMS says it no longer needs to address the treatment of these cases for purposes of developing the MS-LTC-DRG relative weights for FY 2021 and subsequent years.)

Furthermore, consistent with historical methodology, CMS excluded any claims in the resulting data set that were submitted by LTCHs that were all-inclusive rate providers and LTCHs that are paid in accordance with demonstration projects authorized under section 402(a) of Pub. L. 90-248 or section 222(a) of Pub. L. 92-603. In addition, consistent with historical practice and policies, CMS excluded any Medicare Advantage (Part C) claims in the resulting data. Such claims were identified based on the presence of a GHO Paid indicator value of “1” in the MedPAR files. The claims that remained after these three trims (that is, the applicable LTCH data) were then used to calculate the MS-LTC-DRG relative weights for FY 2021.

In summary, in general, CMS identified the claims data used in developing the proposed FY 2021 MS-LTC-DRG relative weights in this proposed rule, by trimming claims data that were paid the site-neutral payment rate or would have been paid the site-neutral payment rate had the dual-payment-rate structure been in effect. Finally, CMS proposes to trim the claims data of all-inclusive rate providers reported in the December 2019 update of the FY 2019 MedPAR file and any Medicare Advantage claims data. There were no data from any LTCHs that are paid in accordance with a demonstration project reported in the December 2019 update of the FY 2019 MedPAR file, but, had there been any, CMS would have trimmed the claims data from those LTCHs as well, in

accordance with established policy. CMS is proposing to use the remaining data (that is, the applicable LTCH data) to calculate the relative weights for FY 2021.

Steps for Determining the Proposed FY 2021 MS-LTC-DRG Relative Weights

CMS is proposing to continue to use its current methodology to determine the proposed FY 2021 MS-LTC-DRG relative weights. To determine the proposed relative weights, CMS is proposing to group applicable LTCH cases to the appropriate proposed MS-LTC-DRG, while taking into account the proposed low-volume quintiles (as described previously) and cross-walked proposed no-volume MS-LTC-DRGs. After establishing the appropriate proposed MS-LTC-DRG (or proposed low-volume quintile), CMS is proposing to calculate the proposed FY 2021 relative weights in several steps.

Step 1 Remove cases with a length of stay of seven days or less and statistical outliers

Step 2 Remove statistical outliers

Step 3 Adjust charges for the effects of short-stay outliers (SSO)

Step 4 Calculate the proposed FY 2021 MS-LTC-DRG relative weights on an iterative basis.

Step 5 Determine a proposed FY 2021 relative weight for MS-LTC-DRGs with no applicable LTCH cases

Step 6 Adjust the proposed FY 2021 MS-LTC-DRG relative weights to account for nonmonotonically increasing relative weights

Step 7 Calculate the proposed FY 2021 MS-LTC-DRG reclassification and recalibration budget neutrality factor

Accordingly, in determining the proposed FY 2021 MS-LTC-DRG relative weights in this proposed rule, consistent with existing methodology, the agency is proposing to apply a normalization factor of 1.25878 and a budget neutrality factor of 0.9993445. Table 11, which is available via the internet on the CMS website, lists the proposed MS-LTC-DRGs and their respective proposed relative weights, geometric mean length of stay, and five-sixths of the geometric mean length of stay (used to identify SSO cases under § 412.529(a)) for FY 2021.

Proposed Changes to the LTCH PPS Payment Rates and Other Changes to the LTCH PPS for FY 2021

Overview

The basic methodology for determining LTCH PPS standard federal payment rates is currently set forth at 42 CFR 412.515 through 412.533 and 412.535. In this section, CMS discusses the factors it is proposing to use to update the LTCH PPS standard federal payment rate for FY 2021, that is, effective for LTCH discharges occurring on or after October 1, 2020, through September 30, 2021. Under the dual-rate LTCH PPS payment structure required by statute, beginning with discharges in cost reporting periods beginning in FY 2016, only LTCH discharges that meet the criteria for exclusion from the site-neutral payment rate are paid based on the LTCH PPS standard federal payment rate specified at § 412.523.

Before the dual-payment-rate system was implemented in FY 2016, all LTCH discharges were paid similarly to those now exempt from the site-neutral payment rate. That legacy payment rate was called the standard federal rate.

In this FY 2021 IPPS/LTCH PPS proposed rule, CMS presents proposals related to the annual update to the LTCH PPS standard federal payment rate for FY 2021. It is also proposing to adjust the LTCH PPS standard federal payment rate to account for the estimated effect of the changes to the area wage level for FY 2021 on estimated aggregate LTCH PPS payments, in accordance with § 412.523(d)(4). In addition, as discussed in the FY 2019 IPPS/LTCH PPS final rule (83 FR 41532 through 41537), CMS has eliminated the 25 percent threshold policy in a budget-neutral manner. The budget neutrality requirements are codified in the regulations at § 412.523(d)(6). Under these regulations, a temporary, one-time factor is applied to the standard federal payment rate in FY 2019 and FY 2020, and a permanent, one-time factor in FY 2021. These factors as established in the correction to the FY 2019 IPPS/LTCH PPS final rule (83 FR 41536) area as follows:

- For FY 2019, a temporary, one-time factor of 0.990878
- For FY 2020, a temporary, one-time factor of 0.990737
- For FY 2021 and subsequent years, a permanent, one-time factor of 0.991249

Therefore, in determining the FY 2021 LTCH PPS standard federal payment rate, CMS is proposing to:

- Remove the temporary, one-time factor of 0.990737 for the estimated cost of elimination of the 25-percent threshold policy in FY 2020 by applying a factor of (1/0.990737)
- Apply a permanent, one-time factor of 0.991249 for the estimated cost of the elimination of the 25-percent threshold policy in FY 2021

Proposed Annual Update to the LTCH PPS Standard Federal Payment Rate for FY 2021

CMS has used an estimated market basket increase to update the LTCH PPS. As previously noted, for FY 2021 CMS is proposing to rebase and revise the 2013-based LTCH market basket to reflect a 2017 base year. The proposed 2017-based LTCH market basket is primarily based on the Medicare cost report data submitted by LTCHs and, therefore, specifically reflects the cost structures of only LTCHs. CMS is proposing to use data from cost reports beginning in FY 2017 because these data are the latest available complete data at the time of rulemaking for purposes of calculating cost weights for the market basket. CMS believes that the proposed 2017-based LTCH market basket appropriately reflects the cost structure of LTCHs. CMS is proposing to use the proposed 2017-based LTCH market basket to update the LTCH PPS standard federal payment rate for FY 2021.

Section 1886(m)(3)(A) of the Social Security Act provides that, beginning in FY 2010, any annual update to the LTCH PPS standard federal payment rate is reduced by the adjustments specified in clauses (i) and (ii) of subparagraph (A). Clause (i) of section 1886(m)(3)(A) of the act provides for a reduction, for FY 2012 and each subsequent rate year, by the productivity adjustment described in section 1886(b)(3)(B)(xi)(III) of the act (that is, "the multifactor productivity [MFP] adjustment"). Clause (ii) of section 1886(m)(3)(A) of the act provided for a reduction, for each of FYs 2010 through 2019, by the "other adjustment" described in section 1886(m)(4)(F) of the act; therefore, it is not applicable for FY 2021.

Section 1886(m)(3)(B) of the act provides that the application of paragraph (3) of section 1886(m) of the act may result in the annual update being less than zero for a rate year and may result in payment rates for a rate year being less than such payment rates for the preceding rate year.

LTCH QRP Overview

The LTCH QRP creates LTCH quality reporting requirements, as mandated by section 3004(a) of the ACA. Every year, by October 1, CMS publishes the quality measures LTCHs must report.

The IMPACT act added section 1899B to the SSA and requires the reporting of standardized patient assessment data regarding quality measures and standardized patient assessment data elements (SPADE). It requires the submission of data pertaining to quality measure, resource use, and other domains. Using standardized quality measures and standardized data, the intent of the IMPACT Act, among other obligations, is to allow for the exchange of standardized and interoperable data among post-acute providers and other providers. The IMPACT Act intends for standardized post-acute care data to improve Medicare beneficiary outcomes through shared decision-making, care coordination, and enhanced discharge planning.

For FY 2014 and each subsequent year, if an LTCH fails to submit the required quality data, the LTCH will be subject to a 2 percentage point reduction in the annual payment update. CMS strongly encourages submitting quality data prior to the deadline to allow LTCH providers an opportunity to review their data submissions for completeness and accuracy and to address any submission issues.

LTCH Continuity Assessment Record and Evaluation Data Set

The LTCH Continuity Assessment Record and Evaluation (CARE) Data Set is applicable to all patients receiving inpatient services in a facility certified as a hospital and designated as an LTCH under the Medicare program. These hospitals are certified as acute-care hospitals that treat patients requiring extended hospital-level care, typically following initial treatment at a general acute-care hospital. If a hospital is classified as an LTCH, for purposes of Medicare payments (as denoted by the last four digits of its six-digit CMS Certification Number [CCN] in the range of 2000–2299), it is subject to the requirements of the LTCH QRP. It is not applicable to patients receiving services in LTCH units that are not designated as LTCHs under the Medicare program. Data collection using the LTCH CARE Data Set is applicable regardless of patient's age, diagnosis, length of stay, or payment/payer source. Data collected must be submitted in the time frame, manner, and form established by CMS for the LTCH QRP.

Effective July 1, 2018, the data collection instrument for these measures is the LTCH CARE Data Set version 4.00.

Effective October 1, 2020, the data collection instrument for these measures is the LTCH CARE Data Set version 5.00.

Note: CMS is delaying the release of LTCH CARE Data Set version 5.00 needed to support the Transfer of Health (TOH) Information Quality Measures in order to provide maximum flexibilities for providers of LTCHs to respond to the COVID-19 public health emergency (PHE).

The release of updated versions of the LTCH CARE Data Set will be delayed until October 1st of the year that is at least one full fiscal year after the end of the COVID-19 PHE. For example, if the COVID-19 PHE ends on September 20, 2020, LTCHs will be required to begin collecting data using the updated versions of the item sets beginning with patients discharged on October 1, 2021.

Standardized Patient Assessment Data Elements

The IMPACT Act required CMS to develop, implement, and maintain standardized patient assessment data elements (SPADE) for post-acute care (PAC) settings. The four PAC settings specified in the IMPACT Act are home health agencies (HHAs), inpatient rehabilitation facilities (IRFs), long-term care hospitals (LTCHs), and skilled nursing facilities (SNFs). The goals of implementing cross-setting SPADEs are to facilitate care coordination, interoperability, and improve Medicare beneficiary outcomes.

The IMPACT Act further required that the assessment instruments be modified to include core data elements on health assessment categories and that such data be standardized and interoperable. Implementation of a core set of standardized assessment items across PAC settings has important implications for Medicare beneficiaries, families, providers, and policymakers.

For FY 2019 and each subsequent year, LTCHs must report standardized patient assessment data, required under section 1899B(b)(1) of the Social Security Act. Section 1899B(b)(1)(B) of the act defines standardized patient assessment data as data required for at least the quality measures described in section 1899B(c)(1) of the act and that is with respect to the following categories:

1. Functional status
2. Cognitive function
3. Special services, treatments, and interventions
4. Medical conditions and comorbidities
5. Impairments
6. Other categories deemed necessary and appropriate by the secretary of the Department of Health and Human Services

In FY 2020 IPPS/LTCH PPS final rule, CMS adopted the first five categories listed above in addition to a new category. Each category and their respective data elements are outlined in the following table.

Category	Data Elements
Functional Status	Car transfer Walking 10 feet on uneven surfaces 1-step (curb) 4 steps 12 steps Picking up object
Cognitive Function	Brief interview for mental status (BIMS) Confusion assessment method (CAM) Patient health questionnaire — 2 to 9 (PHQ-2 to 9)
Special Services, Treatments, and Interventions	Chemotherapy (IV, oral, other) Radiation Oxygen therapy (intermittent, continuous, high-concentration oxygen delivery system) Suctioning (scheduled, as needed) Tracheostomy care Noninvasive mechanical ventilator (bilevel positive airway pressure [BiPAP]; continuous positive airway pressure [CPAP]) Invasive mechanical ventilator IV medications (antibiotics, anticoagulation, vasoactive medications, other) Transfusions Dialysis (hemodialysis, peritoneal dialysis) IV access (peripheral IV, midline, central line) Parenteral/IV feeding Feeding tube Mechanically altered diet Therapeutic diet High-risk drug classes: use and indication
Medical Conditions and Comorbidities	Pain interference (pain effect on sleep, pain interference with therapy activities, and pain interference with day-to-day activities)

Category	Data Elements
Impairments	Hearing
	Vision
Social Determinants of Health (SDOH)	Race
	Ethnicity
	Preferred language
	Interpreter services
	Health literacy
	Transportation
	Social isolation

For the first program year in which measures or standardized patient assessment data are adopted, LTCHs will be required to report data only on patients who are admitted and discharged during the last quarter (October 1 to December 31) of the calendar year that applies to the program year. For subsequent program years, LTCHs will be required to report data on patients who are admitted and discharged during the 12-month calendar year that applies to the program year.

Note: CMS is delaying the release of new or revised SPADEs in order to provide maximum flexibilities for providers of LTCHs to respond to the COVID-19 public health emergency (PHE).

The release of new or revised SPADEs will be delayed until October 1st of the year that is at least one full fiscal year after the end of the COVID-19 PHE. For example, if the COVID-19 PHE ends on September 20, 2020, LTCHs will be required to begin collecting data beginning with patients discharged on October 1, 2021.

Quality Measures Currently Adopted for the FY 2022 LTCH QRP

The LTCH QRP currently has 17 measures for the FY 2022 program year, which are outlined in the following table:

Quality Measures Currently Adopted for the FY 2022 LTCH QRP	
LTCH CARE Data Set	
Short Name	Measure Name & Data Source
Pressure Ulcer/Injury	Changes in Skin Integrity Post-Acute Care: Pressure Ulcer/Injury
Application of Falls	Application of Percent of Residents Experiencing One or More Falls with Major Injury (Long Stay) (NQF #0674)

Form, Manner, and Timing of Data Submission Under the LTCH QRP

Under the current CMS policy, LTCHs report data on LTCH QRP assessment-based measures and standardized patient assessment data by reporting the designated data elements for each applicable patient on the LTCH CARE Data Set patient assessment instrument and then submitting the completed instruments to CMS using the Quality Improvement and Evaluation System (QIES) Assessment and Submission Processing (ASAP) system. Data on LTCH QRP measures that are also collected by the CDC for other purposes are reported by LTCHs to the CDC through the NHSN, and the CDC then transmits the relevant data to CMS. Readers are referred to the FY 2018 IPPS/LTCH PPS final rule (82 FR 38454 through 38456) for the data collection and submission timeframes that were finalized for the LTCH QRP.

In the FY 2020 IPPS/LTCH PPS final rule, CMS finalized their proposal to move the implementation date of any new version of the LTCH CARE Data Set from April to October, beginning October 1, 2020. This would give LTCHs an additional six months (April-October) to update their systems so that they can comply with the new reporting requirements.

Appendix K: Severe Wound Diagnosis Codes by Category

The following lists the ICD-10-CM codes describing severe wound diagnoses. CMS allows for a temporary exception for certain wound care discharges from the site-neutral payment rate for certain long-term care hospitals (LTCHs). This exception applies to discharges occurring during FY2018 (that is, for cost reporting period beginning on or after October 1, 2017, and on or before September 30, 2018) from LTCHs that are grandfathered hospitals-within-hospitals (HwHs) (that is, hospitals that are described under § 412.23(e)(2)(i) that meet the criteria of § 412.22(f)) when the individual discharged “has a severe wound.” Based upon the FY 2018 IPPS/LTCH final rule classification, the definition of “severe wound” has been refined to include only five categories (stage 3 wound, stage 4 wound, unstageable wound, nonhealing surgical wound, and fistula) and exclusions are limited to discharges that both meet the definition of a severe wound and are additionally grouped to certain specified MS-LTC-DRGs.

Note: An updated ICD-10-CM list was not available at the time this publication was printed and therefore does not reflect any FY 2021 code changes. An updated list of severe wound codes, effective October 1, 2020, can be found at:
